In 1921, a young female doctor started analysis with Sigmund Freud. In a diary, she recorded what moved her. The present volume not only contains a full translation of these records, but also collects four essays by two psychoanalysts and two analytical historians who take their cue from the young doctor's notes to think about Freud and his methods. The discovery of the diary marks a small sensation for the history of social science. Three factors make the document unique: first, it records not a training analysis, but the analysis of an actual patient, second, the analysis took place before Freud fell ill with cancer, and third, the analysand obviously noted down what was said in the practice word by word.

Hugh's River Cottage Veg Every Day! became the UK's best-selling vegetable cookbook, persuading us through sheer temptation to make vegetables the mainstay of our daily cooking. In this much-anticipated follow-up, Hugh delivers more irresistible recipes, and this time, takes things one step further. Fuelled by his passionate belief that plant foods should be the dominant force in our kitchens, Hugh has put cheese, butter, cream, eggs, and refined flour and sugar firmly to one side. Instead, he uses veg, fruit, wholegrains, nuts, seeds, spices and cold-pressed oils to explore the length and breadth of what can be achieved with natural, unprocessed plant foods. River Cottage Much More Veg! makes it clear that unadulterated ingredients are the very best building blocks for delicious and healthy meals. In typical Hugh style, the recipes are easy, utterly foolproof and delicious. All but a handful are gluten-free, and at least half the dishes require 20 minutes (or less) hands-on work time. With recipes such as Roast squash and chickpeas with spicy apricot sauce, Blackened cauliflower with pecans and tahini, Spiced beetroot, radicchio and orange traybake, Celeriac and seaweed miso broth, Seared summer cabbage with rosemary, chilli and capers, and Baked celery agrodolce, River Cottage Much More Veg! demonstrates how easy it is to make versatile, plentiful and delicious vegetables the bedrock of your diet.

 Jealousy and envy permeate the practice of psychoanalytic and psychotherapeutic work. New experience and new relevance of old but neglected ideas about these two feeling states and their origins warrant special attention, both as to theory and practice. Their great complexity and multilayered nature are highlighted by a number of contributions: the very early inception of the "triangular" jealousy situations; the prominence of womb envy and hatred against femininity rooted in the envy of female procreativity; the role of shame and the core of both affects; the massive effects of the embodiment of these feelings in the conscience (i.e., the envious and resentful attacks by the "inner judge" against the self); the attempt to construct a cultic system of sacrifices the would countermand womb envy by an all-male cast of killing, rebirth, redemption, and blissful nourishment; and finally, the projection of envy, jealousy, and their context of shame and self-condemnation in the form of the Evil Eye. Taken together, the contributions to the stunning and insightful volume form a broad spectrum of new insights into the dynamics of two central emotions of rivalry and their clinical and cultural relevance and application.

The current book asserts that reality television serves a broader social purpose than simple entertainment. Instead, this type of programming can best be understood as a revealing exposition on contemporary politics, culture, and social issues. Reality television addresses many different social groups. The book primarily examines the social and political messages conveyed by reality television to its viewers. Focusing on the notion of consumer citizenship, the study analyzes the German television program Deutschland sucht den Superstar (Germany seeks a Superstar) as a reflection of contemporary social and political issues in Germany. The Reformation period witnessed an explosion in the number of biographies of contemporary religious figures being published. Whether lives of reformers worthy of emulation, or heretics deserving condemnation, the genre of biography became a key element in the confessional rivalries that raged across Europe in the sixteenth and seventeenth centuries. Offering more than a general survey of Life writing, this volume examines key issues and questions about how this trend developed among different confessions and how it helped shape lasting images of reformers, particularly Luther and Calvin up to the modern period. This is the

first-ever full length study of the subject showing that Lives of the reformers constitute an integral part of the intellectual and cultural history of the period, serving as an important source of information about the different Reformations. Depending on their origin, they provide a lesson in theology but also in civic values and ideals of education of the period. Genevan Lives in particular also point up the delicate issue of 'Reformed hagiography' which their authors try to avoid with a varying degree of success. Having consistently been at the forefront of the study of the intellectual history of the Reformation Irena Backus is perfectly placed to highlight the importance of Life writing. This is a path-breaking study that will open up a new way of viewing the confessional conflicts of the period and their historiography.

The Practical Guide to Building Reliable Networked Multiplayer Games Networked multiplayer games are a multibillion dollar business: some games now attract tens of millions of players. In this practical, code-rich guide, Joshua Glazer and Sanjay Madhav guide you through every aspect of engineering them. Drawing on their immense experience as both game developers and instructors, the authors lead you through building a robust multiplayer architecture, and creating every engine-level system. You'll learn through in-depth working code examples for two complete games: an action game and a real time strategy (RTS) game. First, Madhav and Glazer review the essentials of networking and network programming from the standpoint of game developers. Next, they walk through managing game data transmission, updating game objects across the network, and organizing the devices that join your game. You'll learn how to ensure reliable performance despite the Internet's inherent inconsistencies, and how to design game code for maximum security and scalability. The authors conclude by addressing two increasingly crucial issues: incorporating gamer services and hosting your games in the cloud. This guide's content has been extensively tested through the authors' multiplayer game programming courses at USC. It is equally valuable both to

students and to working game programmers moving into networked games. Coverage includes How games have evolved to meet the challenges of networked environments Using Internet communication protocols and standards in game development Working with Berkeley Socket, the most widely used networking construct in multiplayer gaming Formatting game data for efficient Internet transmission Synchronizing states so all players share the same world Organizing networking topologies for large-scale games Overcoming latency and jitter problems that cause delays or lost data Scaling games without compromising performance Combating security vulnerabilities and software cheats Leveraging the networking functionality of the popular Unreal 4 and Unity game engines Integrating gamer services such as matchmaking, achievements, and leaderboards Running game servers in the cloud About the Website C++ source code for all examples is available at [github.com/MultiplayerBook](https://github.com/MultiplayerBook). Instructors will also find a full set of PowerPoint slides and a sample syllabus.

This book brings C.G. Jung into conversation with the French philosopher Emmanuel Levinas, taking a radical view of post-modernist theory which, the author argues, is relentlessly introverted. Frances Gray presents completely new research which extends analytical psychology into the world of dispute resolution in mediation within a deeply philosophical framework. Arguing that mediation is a therapeutics that entails a psycho-social archaeology which, in turn, requires recognition of the foundational roles of sex/gender, time and narrative in inter-subjective relationships, this book develops Jung's approach to projection as an ethical process that assumes the presence of a sex/gendered Other. Chapters explore the possibility of a psycho-social archaeology through development of the argument that a radical turn to the fundamentals of our own consciousness can open up a landscape on which we begin to fashion the moral courage necessary for the practice of alternative dispute resolution in mediation. This book highlights Jung's contention that withdrawal of projection is a fundamentally moral endeavour and that although Levinas' face of the Other can be seen as a way of acknowledging the Otherness of the Other, there are limits to its application in Jungian thinking. This book maintains that the face of the Other is critical to any moral encounter and, above all, brings us to the transformational possibilities of the process of dispute resolution in mediation. Jung and Levinas will appeal to researchers, students and practitioners of analytical psychology, dispute resolution, applied ethics, conflict studies and transformation.

Der Autor porträtiert herausragende Schweizer Zeitgenossen aus Politik, Sport und Fernsehen sowie Schräges aus dem schweizerischen Alltag auf seine ganz eigene Art und Weise. Manchmal tönt es positiv, manchmal unvorteilhaft. Wahrheit und Erfindung geben sich die Hand. Oft werden recherchierte Texte bewusst zu pointierten Sprüchen umgewandelt - so etwas wie Karikaturen in Worten. Den Betroffenen wurden ab und an Aussagen in den Mund gelegt, die sie selber nie geäußert haben. Ein reines Lesevergnügen für politisch orientierte Menschen und notorische Nörgler mit Humor.
