Year after year, edition after edition, this has been the introductory textbook of choice for hundreds of institutions nationwide. Throughout the text, sequential figures of complicated derivations help students visualize the abstract-providing them with the kind of logical continuity too often lacking in

other introductory texts. Over 2600 end-of-chapter problems are included, arranged in groups and labeled by chapter and section for easy reference. Beiser is sensitive to the realities of student mathematical preparation and includes an appendix on useful mathematics. This text speaks directly and clearly to the students, giving them all the information they need in a way they can follow. This combination provides a text that is complete, clear, conversational, and logical.

This volume of Advances in Intelligent and Soft Computing contains accepted papers presented at SOCO 2013, CISIS

2013 and ICEUTE 2013, all conferences held in the beautiful and historic city of Salamanca (Spain), in September 2013. Soft computing represents a collection or set of computational techniques in machine learning, computer science and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a through peer-review process, the 8th SOCO 2013 International Program Committee selected 40 papers which are published in these conference proceedings, and represents an acceptance rate of 41%. In this relevant edition a special emphasis was put on the organization of special sessions. Four special sessions were organized related to relevant topics as: Systems, Man, and Cybernetics, Data Mining for Industrial

and Environmental Applications, Soft Computing Methods in Bioinformatics, and Soft Computing Methods, Modelling and Simulation in Electrical Engineer. The aim of the 6th CISIS 2013 conference is to offer a meeting opportunity for academic and industry-related researchers belonging to the various, vast communities of Computational Intelligence, Information Security, and Data Mining. The need for intelligent, flexible behaviour by large, complex systems, especially in mission-critical domains, is intended to be the catalyst and the aggregation stimulus for the overall event. After a thorough peer-review process, the CISIS 2013 International Program Committee selected 23 papers which are published in these conference proceedings

achieving an acceptance rate of 39%. In the case of 4th ICEUTE 2013, the International Program Committee selected 11 papers which are published in these conference proceedings. The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference and the SOCO, CISIS and ICEUTE conferences would not exist without their help.
