To celebrate the 270th anniversary of the De Gruyter publishing house, the company is providing permanent open access to 270 selected treasures from the De Gruyter Book Archive. Titles will be made available to anyone, anywhere at any time that might be interested. The DGBA project seeks to digitize the entire backlist of titles published since 1749 to ensure that future generations

have digital access to the high-quality primary sources that De Gruyter has published over the centuries.

Recent Findings on the Impairment of Airmanship by Alcohol Rowman & Littlefield

The French Revolution was the first of the great social upheavals which transformed European society; its effects on the French national educational system and its wider influence on education is obviously important. Little has been written on the topic and Professor Barnard offers a modern study. He begins with a survey of the educational system under the Ancien Régime and describes the criticisms and schemes of reform which had already been offered before the Revolution. Then follow accounts of the educational

activities of the revolutionary assemblies and the individual institutions set up during the period. The story ends with an account of the lasting influence of these reforms. Throughout, Professor Barnard emphasises the importance of the concept of education as a fundamental civic right and the duty of the state to provide and regulate it. The book gives the student of the history of education, of social history and modern France a useful survey of a central topic.

News Networks in Early Modern Europe attempts to redraw the history of European news communication in the 16th and 17th centuries. News is defined partly by movement and circulation, yet

histories of news have been written overwhelmingly within national contexts. This volume of essays explores the notion that early modern European news, in all its manifestations – manuscript, print, and oral – is fundamentally transnational. These 37 essays investigate the language, infrastructure, and circulation of news across Europe. They range from the 15th to the 18th centuries, and from the Ottoman Empire to the Americas, focussing on the mechanisms of transmission, the organisation of networks, the spread of forms and modes of news communication, and the effects of their translation into new locales and languages.

 The Right Way to Win shows you how to do well while doing good. It gives readers the tools and techniques for fixing and enforcing ethical behavior. These same methods drive long-term business success. Short, practical, and fun-to-read, the book shows readers how to: Make defensible ethical decisions, build consensus, and counter adversaries; Implement and sustain ethical decisions by driving individual accountability; and Navigate crises and cutting-edge issues where reputational risk soars. The Right Way to Win appeals to general readers, business and professional-school students, employees and executives, and managers

overseeing leadership development and corporate training. This title is also available as a digital curriculum. Click here to learn more!

Handbook of the Ryukyuan

Languages Pickle Partners Publishing
 An Introduction to Rhetorical Communication offers a true integration of rhetorical theory and social science approaches to public communication. This highly successful text guides students through message planning and presentation in an easy step-by-step process. An Introduction to Rhetorical Communication provides students with a solid grounding in the rhetorical tradition and the basis for developing effective messages.

An Introduction to Ryukyuan

Languages Walter de Gruyter GmbH &

Co KG

In this book, first published in 1962, Professor Hilton Hotema provides his insights into how we could all live longer by learning the body's simple requirements of breathing fresh air, avoiding animal flesh, banning any cooked food, and by gradually lessening the amount of food consumed. Hotema firmly believes that breathing fresh air and consuming organic fruits and natural organic liquids alone could extend our lives and also lays bare his secret that what kills at an early age is not the illusion of time, but rather overeating, breathing in toxic, unclean air, and elements such as electronic radiation, dirty electricity and medications. A must-read for any health-conscious individual.

An Introduction to Rhetorical

Communication Cornell University Press
This book aims to provide a one-stop reference with comprehensive and helpful advice on a very broad range of issues encountered when writing or editing, either professionally or whilst studying. A completely expanded, revised, and updated version of the first edition, it presents the house style of Oxford University Press, drawing on the experience of the Dictionary Department and the Press's in-house academic desk editors. It gives clear advice on common spelling difficulties, names of people and places, foreign words and phrases, abbreviations, and broad aspects of usage, including capitalization and punctuation.

In 1929, the noted French paleontologist and Jesuit priest Pierre Teilhard de Chardin met Lucile Swan, an American sculptor at a dinner party in Peking. This first evening together began a remarkable friendship that lasted for twenty-five years and was recorded in their correspondence. This volume tells their story in their own words.

chrestienne Bloomsbury Academic
Despite significant gains in promoting economic growth and living conditions (or "human progress") globally over the last twenty-five years, much of the developing world remains plagued by poverty and its attendant problems,

including high rates of child mortality, illiteracy, environmental degradation, and war. In *Growth and Empowerment*, Nicholas Stern, Jean-Jacques Dethier, and F. Halsey Rogers propose a new strategy for development. Drawing on many years of work in development economics—in academia, in the field, and at international institutions such as the World Bank—the authors base their strategy on two interrelated approaches: building a climate that encourages investment and growth and at the same time empowering poor people to participate in that growth. This plan differs from other models for development, including the dogmatic approach of market fundamentalism popular in the 1980s and 1990s. Stern, Dethier, and Rogers see economic

development as a dynamic process of continuous change in which entrepreneurship, innovation, flexibility, and mobility are crucial components and the idea of empowerment, as both a goal and a driver of development, is central. The book points to the unique opportunity today—after 50 years of successes and failures, and with a growing body of analytical work to draw on—to pursue new development strategies in both research and action. Historia Placitorum Coronae Woeli Pub Serv 2018 version of the OSINT Tools and Resources Handbook. This version is almost three times the size of the last public release in 2016. It reflects the changing intelligence needs of our clients in both the public and private

sector, as well as the many areas we have been active in over the past two years.

The Oxford Dictionary for Writers and Editors Walter de Gruyter GmbH & Co KG

Why was the UN a bystander during the Rwandan genocide? Do its sins of omission leave it morally responsible for the hundreds of thousands of dead? Michael Barnett, who worked at the U.S. Mission to the United Nations from 1993 to 1994, covered Rwanda for much of the genocide. Based on his first-hand experiences, archival work, and interviews with many key participants, he reconstructs the history of the UN's involvement in Rwanda. In the weeks leading up to the genocide, the author documents, the UN was increasingly

aware or had good reason to suspect that Rwanda was a site of crimes against humanity. Yet it failed to act. Barnett argues that its indifference was driven not by incompetence or cynicism but rather by reasoned choices cradled by moral considerations. Employing a novel approach to ethics in practice and in relationship to international organizations, Barnett offers an unsettling possibility: the UN culture recast the ethical commitments of well-intentioned individuals, arresting any duty to aid at the outset of the genocide. Barnett argues that the UN bears some moral responsibility for the genocide. Particularly disturbing is his observation that not only did the UN violate its moral responsibilities, but also that many in New York believed that they were "doing

the right thing" as they did so. Barnett addresses the ways in which the Rwandan genocide raises a warning about this age of humanitarianism and concludes by asking whether it is possible to build moral institutions.

The UNESCO atlas on endangered languages recognizes the Ryukyuan languages as constituting languages in their own right. This represents a dramatic shift in the ontology of Japan's linguistic make-up. Ryukyuan linguistics needs to be established as an

independent field of study with its own research agenda and objects. This handbook delineates that the UNESCO classification is now well established and adequate. Linguists working on the Ryukyuan languages are well advised to refute the ontological status of the Ryukyuan languages as dialects. The Ryukyuan languages constitute a branch of the Japonic language family, which consists of five unroofed Abstand (language by distance) languages. The Handbook of Ryukyuan Languages provides for the most appropriate and

up-to-date answers pertaining to Ryukyuan language structures and use, and the ways in which these languages relate to Ryukyuan society and history. It comprises 33 chapters, written by the leading experts of Ryukyuan languages. Each chapter delineates the boundaries and the research history of the field it addresses, comprises the most important and representative information.
