Reading Reconsidered Akasha Classics
What actions are justified when the fate of a nation hangs in the balance, and who can see the best path ahead? Julius Caesar has led Rome successfully in the war against Pompey and returns celebrated and beloved by the people. Yet in the senate fears intensify that his power may become supreme and threaten the welfare of the republic. A plot for his murder is hatched by Caius Cassius who persuades Marcus Brutus to

support him. Though Brutus has doubts, he joins Cassius and helps organize a group of conspirators that assassinate Caesar on the Ides of March. But, what is the cost to a nation now erupting into civil war? A fascinating study of political power, the consequences of actions, the meaning of loyalty and the false motives that guide the actions of men, Julius Caesar is action packed theater at its finest.

A Wind in the Door Delta

Join the famous treasure-hunting Kidds on their first adventure ever! The #1 New York Times bestselling series from James Patterson is jam-packed with

action, humor, and heart! Read-i-cide: The systematic killing of the love of reading, often exacerbated by

the inane, mind-numbing practices found in schools. Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the decline, poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative book *Readicide: How Schools are Killing Reading and What You Can Do About It*, author and teacher Kelly Gallagher suggests it is time to recognize a new and significant contributor to the death of reading: our schools. *Readicide*, Gallagher argues that American schools are actively (though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading

by:Valuing standardized testing over the development of lifelong readersMandating breadth over depth in instructionRequiring students to read difficult texts without proper instructional support and insisting students focus on academic textsIgnoring the importance of developing recreational readingLosing sight of authentic instruction in the looming shadow of political pressuresReadicide provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading-;steps that will help prevent the loss of another generation of readers.

In *A Wrinkle in Time* Quintet book two, Charles Wallace falls ill, and Meg, Calvin, and their teacher, Mr. Jenkins, must travel inside C.W. to make him well, and save the universe from the evil Echthros. It is November. When Meg comes home from school, Charles Wallace tells her he saw dragons in the twin's vegetable garden. That night Meg, Calvin and C.W. go to the vegetable garden to meet the Teacher (Blajeny) who explains that

what they are seeing isn't a dragon at all, but a cherubim named Proginoskes. It turns out that C.W. is ill and that Blajeny and Proginoskes are there to make him well - by making him well, they will keep the balance of the universe in check and save it from the evil Echthros. Meg, Calvin and Mr. Jenkins (grade school principal) must travel inside C.W. to have this battle and save Charles' life as well as the balance of the universe. Sophie's World Simon and Schuster Although several of Robert Louis Stevenson's major works -- Treasure

Island, Kidnapped, The Strange Case of Dr. Jekyll and Mr. Hyde -- have been enshrined in the Western canon of popular literature, these novels represent only a fraction of a prodigious body of writing that spans virtually every genre. Stevenson was a prolific and preternaturally skilled writer, and in these essays, he offers insight, tips, and inspiration that will capture the imagination of both fans of his work and would-be writers.

NATIONAL BESTSELLER • "A dazzling journey across the sciences and humanities in search of deep laws to unite them." —The Wall Street Journal
One of our greatest scientists—and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*—gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and

the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

The latest volume in the Core Classics series, this edition of the King Arthur legends will please teachers and students alike. The magic realm of Camelot is made inviting by a lively text that preserves the spirit

and feel of the Middle Ages but also makes the story accessible to young readers. Enhanced by the Howard Pyle illustrations, the adventures of Gawaine, Galahad, and the other Knights of the Round Table are enchanting in their own right but also make a perfect supplement to the Core Knowledge history unit on the Middle Ages. As always in the Core Classics series, helpful word glosses are added to the text and an introduction is provided by E. D. Hirsch, Jr.

In 1978, Greil Marcus asked twenty other writers on rock—including Dave Marsh, Lester Bangs, Nick Tosches, Ellen Willis, Simon Frith, and Robert Christgau—a question: What one rock and roll album would you take to a desert island? The resulting essays were collected in *Stranded*, twenty passionate declarations that, appropriately, affirmed the solitary and obsessive activity that rock listening had become. Here are salutes, elegies, thank-you notes, and love letters to records such as the Rolling Stones' *Beggars Banquet*, the Ramones' *Rocket to Russia*, Captain Beefheart's *Trout Mask Replica*, *Something Else By the Kinks*, and out-of-print classics by the Ronettes, Little Willie John, and Huey 'Piano' Smith; the whole is supplemented with Marcus's

own invaluable annotated fifty-page discography, a “Treasure Island” of rock and roll. *Stranded* remains a classic of rock and roll literature, and perhaps the best possible answer to the question: What one rock and roll book would you take to a desert island?

"Dirty money, tax havens and the offshore system describe the ugliest and most secretive chapter in the history of global economic affairs. Tax havens have declared war on honest, law-abiding people around the world.

Wealthy individuals hold over ten trillion dollars offshore. Tax havens are the most important single reason why poor people and poor countries stay poor. Britain and the United States are the world's two most important tax havens. Tax havens now lie at the very heart of the global economy. Over half of world trade, and most international lending, is processed through them. Tax havens have been instrumental in nearly every

major economic event, in every big financial scandal, and in every financial crisis since the 1970s, including the latest global economic crisis. "Treasure Islands" show how this happens and reveal what the economics text books will not tell you."

Available Open Access under CC-BY-NC licence. This book explores the critical role that local knowledge plays in public policy processes as well as its role in the co-production of policy relevant knowledge with the scientific and professional communities. The authors consider the mechanisms used by local organisations and the constraints and opportunities they face, exploring what

the knowledge-to-policy process means, who is involved and how different communities can engage in the policy process. Ten diverse case studies are used from around Indonesia, addressing issues such as forest management, water resources, maritime resource management and financial services. By making extensive use of quotes from the field, the book allows the reader to 'hear' the perspectives and beliefs of community members around local knowledge and its effects on individual and community life.
