Edexcel GCSE (9-1) Combined Science Student Book Hachette UK

WHAT OTHER PEOPLE ARE SAYING ABOUT THE MINDFUL ENGLISH TEACHER "I found the book really helpful, as a person who has struggled with anxious thoughts in the past, I've found it has helped me process those in a mindful way that has left me with more confidence. I like how the book is very accepting of different teaching styles and differentiates between by using different teaching voices in the book. I found the book accessible and the writing was easy to read. It was an engaging read as well as an educational one." An English teacher. "This book is basically a 'go to' book for student teachers. It is easy to read and detailed, which alongside Francis Gilbert's study guides really sets student teachers on the road to success. Thanks Francis!" Chloe Charles, PGCE English teacher. "I think mindfulness, planning, reciprocal reading, all discussed at length in the book, have been effective tools in developing my pedagogy and are methods I will definitely use in my teaching. I think the book is an excellent introduction to teaching English and makes the theory and learning easy and accessible." An English teacher. "A useful guide for both new and experienced teachers who want to excel." An English teacher. "A great read with so many useful tips and tasks. It made me step back and reflect easily on my practice." An English teacher. "This book looks at English teaching in a refreshing and non-intimidating manner. It is inclusive for all training and qualified teachers with a clear structure that encourages passionate and creative teaching in modern schools." Sarah Stevens, PGCE English teacher. In need of some inspiration? Are you feeling you're losing your mojo? This is the ultimate guide for English teachers in the 21st century because it not only offers advice about the content, skills and strategies necessary to become an effective English teacher but also provides invaluable help in dealing with the stresses and strains of the job. The well-being of students and teachers are seen as integral to outstanding teaching and learning. The Mindful English Teacher is jam-packed with creative ways to be happy and productive on the job: it is full of useful meditations, creative visualisations and activities which not only make being an English teacher fun but also with its moments of relaxation. It is undergirded with a firm grounding in theory and evidence-based practice, which is explored in the form of lively scripts, real-life conundrums & audits. The scripts can be read by groups of teachers, making the book ideal to use for school-based CPD or Initial Teacher Education. This unique guide aims to inject a genuine sense of joy into one of the most challenging jobs in teaching, using techniques that have been proven to work in a wide range of educational settings.

WJEC GCSE Geography UCL Press

considers what the STEM subjects contribute separately to the curriculum and how they relate to each other in the wider education of secondary school students describes and evaluates different curriculum models for STEM suggests ways in which a critical approach to the pedagogy of the classroom, laboratory and workshop can support and encourage all pupils to engage fully in STEM addresses the practicalities of introducing, organising and sustaining STEM-related activities in the secondary school looks to ways schools can manage and sustain STEM approaches in the long-term Hachette UK

This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Teaching STEM in the Secondary School Oxford University Press - Children

This book aims to provide a micro-level, working model of a methodological approach and practical guidelines for building a corpus, informed by the work on the CorCenCC project (Corpws Cenedlaethol Cymraeg Cyfoes - the National Corpus of Contemporary Welsh). It focuses specifically on the development of detailed design frames for corpora across communicative modes (spoken, written and e-language), and the practical processes involved in the planning, collection, transcription, collation and (re)presentation of language data. The book is designed to be of significant value and relevance to those interested in critically engaging with corpus methodology. Although Welsh is the language under discussion, the processes and approaches discussed in the building of CorCenCC can be applied to a lesser or greater extent to other language contexts. This book provides a working model, and an account of how to build a corpus dataset from which step by step guidelines for creating other linguistic corpora in any language can be easily extrapolated. It will be of value to students and scholars of minority languages and corpus linguistics.

The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in What

Should Schools Teach? The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes.

Eduqas Biology for A Level Year 1 and AS McGraw-Hill Education (UK)

Help your students develop enquiring minds as they learn the geographical knowledge and skills they need through the enquiries of the new OCR B specification which include and up-to-date case studies, a wide range of activities and exam-style questions developed to support and stretch students of all abilities. - Supports students of all abilities through differentiated activities including scaffolded questions and extension questions. - Highlights opportunities for fieldwork throughout the book, and includes guidance on carrying out fieldwork. - Develops students' geographical skills including activities and clear explanations of how to use mathematical and statistical skills. - Helps students gain confidence for the exam with a variety of exam-style practice questions at different levels, with tips on how to approach them.

Teaching about the Holocaust in English Secondary Schools Createspace Independent Publishing Platform

First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years.

Building a National Corpus PublicAffairs

The Teacher Book This booklet contains answers and transcripts for all exercises. The Spanish Listening Booklet matches to the minutest details the content of the 19 units included in the best-selling workbook for beginner-to-pre-intermediate learners "Spanish sentence builders", by the same authors. For best results, the two books should be used together. This book fully implements Dr Conti's popular approach to listening-skills instruction, L.A.M. (aka Listening-As-Modelling), laid out in his seminal work: "Breaking the Sound Barrier: Teaching Learners how to Listen" (Conti and Smith, 2019). L.A.M. is based on the concept that listening instruction should train students in the mastery of the key micro-listening skills identified by cognitive psychologists. Each unit contains around 13 listening tasks, which provide continuous and extensive recycling of the target constructions and vocabulary items and address the development of the key listening micro-skills. The tasks include engaging and tested Conti classics such as: "Spot the intruder", "Missing details", "Faulty transcript", "Break the flow", "Faulty translation", "Gapped translation" and "Listening slalom", alongside more traditional listening comprehension tasks.
