This pocket-sized reference for new and seasoned intensive care unit (ICU) nurses contains critical knowledge presented in the clear, precise, "Fact Facts" format. It provides quick access to a broad array of guidelines, procedures, and equipment used by ICU nurses daily as well as on a less frequent basis. The book covers assessment and procedural skills, medications, intravenous (IV) therapy, nutrition, wound care, sterile field setup, and patient preparation. It facilitates equipment mastery for respiratory and cardiac care along with troubleshooting tips for monitoring and mechanical devices. Also included is information on specific types of critical care units, such as cardiac, surgical, neuro, and the burn unit. Documentation, advance directives, organ donations, palliative and end-of-life care are also discussed. The resource addresses the requirements of The Joint Commission and recommendations of the Centers for Disease Control and Prevention, such as isolation precautions and use of personal protective

equipment. Other important information is provided such as normal hemodynamic measurements, basic electrocardiographic (EKG) rhythms, 12-lead EKG electrode placement, and a "Do Not Use" abbreviation list in the appendix that will help prevent medication errors. Key Features: Provides quick access to information needed on a daily basis Covers equipment, medications, procedures, and specialty care Includes reliable data for basic EKG rhythms, IV therapy, expected treatments and patient care, abbreviation list, and troubleshooting tips Targeted to new ICU nurses, and experienced critical care nurses alike Helps nurses quickly access information with the "Fast Facts in a Nutshell" feature *ACCCN's Critical Care Nursing - E-Book* Boston Medical Pub Incorporated The new third edition offers a wealth of revised and expanded content that reflects the latest changes in critical care nursing. This edition retains its easy-to-read format and continues to present concise nursing care plans. Research Applications boxes throughout focus on

current issues in critical care nursing. An expanded number of Pathophysiology Flow Charts reinforce difficult concepts. New information on Geriatric Considerations is highlighted throughout and Clinical Alerts call attention to concerns from a variety of clinical settings. New Internet Resources are found in each chapter for further research on related topics.

John Wiley & Sons  
Critical Care Nursing: Learning from Practice takes a unique approach to critical care. Based around case scenarios that have the patient as the central focus, each chapter is constructed around an example of a critically ill patient with specific care needs. The chapters then go on to critically explore the knowledge and skills required to deliver expert care. This book looks at a range of critical care scenarios, including: The patient with acute lung injury The patient with fever The patient with an acute kidney injury The patient with long term needs The patient with increased intra-abdominal pressure The Patient following cardiac surgery

Each chapter develops knowledge of the related physiology/pathophysiology, appropriate nursing interventions that are research/evidence based, technical skills, data interpretation and critical appraisal skills, enabling the reader to apply fundamental knowledge to more complex patient problems. Critical Care Nursing: Learning from Practice is an essential resource for practitioners faced with complex and challenging patient cases. *Priorities in Critical Care Nursing - E-Book* Covenant Books, Inc. Today's critical care nurse needs a variety of skills and the ability to work with very different types of patients. The Basic Critical Care Training Program is designed for any nurse who wishes to obtain the solid foundation of skills and knowledge needed to safely and effectively care for the critically ill patient. Nurses who are just beginning their careers, nurses currently working with critically ill patients, and nurses who wish to change their clinical emphasis and begin working in critical care units are excellent candidates for this program. This program allows you to study when you want to and to practice valuable critical thinking skills prior to taking care of patients. This 75-contact-hour program is accredited by the American Nurses Credentialing Center (ANCC) Commission on Accreditation and is designed to be coordinated with a well-designed

preceptor/mentor training program in a critical care unit. The program is based on the textbook recommended! by the American Association of Critical Care Nurses: AACN Clinical Reference for Critical Care Nursing. That textbook is required for the course and must be purchased separately. The course consists of 28 modules, as follows: Cardiac (5 modules), Respiratory (6 modules), Neurological (5 modules), Gastrointestinal (3 modules), Hematology (2 modules), Endocrine (2 modules), Renal (2 modules), Special (3 modules). Each module consists of questions referring to material presented in the text. Upon completion of this course, you will be able to provide safe, entry-level critical care nursing practice as you begin working with a preceptor/mentor in a critical care unit. Completing the Basic Critical Care Training Program will distinguish you as a knowledgeable, skilled, and committed professional. *Fast Facts for the Critical Care Nurse* Critical Care Nursing, Diagnosis and Management, 7<sup>th</sup> Edition of: Oxford handbook of critical care

The book titled "Mastering ICU Nursing: A Quick Reference Guide, Interview Q&A, and Terminology" is a complete guide to the field of intensive care nursing. The book covers all aspects of ICU nursing, from the history and definition of the field to the role and responsibilities of an ICU nurse, to the characteristics of critically ill patients. The first section of the ICU Nursing book provides an overview of basic anatomy and physiology concepts, including the pathophysiology of common critical illnesses and assessing and monitoring vital signs. The second section focuses on equipment and technology used in ICU, including mechanical ventilation and hemodynamic monitoring and interpretation. The third section covers pharmacology in ICU, including common medications used, administration and titration of intravenous medications, and adverse effects and interactions of medications. The fourth section focuses on patient

assessment and management, including comprehensive patient assessment, management of acute respiratory failure, and management of shock and sepsis. The fifth section covers nursing care in ICU, including infection control, wound care and pressure ulcer prevention, and nutrition and fluid management. The sixth section addresses ethical and legal issues in ICU nursing practice, including ethical dilemmas and decision-making, advance care planning and end-of-life care, and legal issues in ICU nursing practice. The seventh section provides information on continuing education and professional development opportunities, certification and speciality nursing organizations, and leadership and advocacy in ICU nursing. The eighth section includes questions and answers related to ICU nursing, and the ninth section provides interview questions and answers for those interested in pursuing a career in ICU nursing. The tenth section of the book covers ICU nursing terminology, while the final section looks at future directions in ICU nursing, including emerging trends and technologies, evidence-

based practice, and quality improvement initiatives. This Nursing book is an essential

resource for both novice and experienced ICU nurses who wish to gain an extensive

understanding of the field and stay up-to-date with the latest trends and best practices.
