Examining Young

Learners: Research and Practice in Assessing the English of School-age

Learners Routledge

Modern linguistics is a relative newcomer in the scientific world, and text-linguistics, or discourse analysis, is one of its youngest disciplines. This fact has inclined many toward scepticism of its value for the Hebraist, yet much benefit is thereby overlooked. In this work, the author examines recent contributions to Hebrew text-linguistics by Niccacci, Andersen, Eskhult, Khan, and Longacre, evaluating them against a twofold standard of theoretical and methodological integrity, and clarity of communication. An extensive introduction to one particularly promising model of text analysis (from Longacre's tagmemic school) is given, and a step-by-step methodology is presented. Analyses according to this model and methodology are

given of seven extended text samples, each building on the findings of the previous analyses: Judg. 2; Lev. 14.1-32; Lev. 6.1-7.37; parallel instructions and historical reports about the building of the Tabernacle, from Exodus 25-40; Judg. 10.6-12.7; and the book of Ruth in its entirety. Considerable attention is given to the question of text-linguistics and reported speech.

Another 60 writing topics Plural Publishing Series contains structured teaching units for nine most commonly studied text types.

Text Linguistics and Translation BRILL

Featuring a major synthesis and critique of interdisciplinary narrative theory, *Story Logic* marks a watershed moment in the study of narrative. David Herman argues that narrativeøis simultaneously a cognitive style, a discourse genre, and a resource for writing. Because stories are strategies that help humans make sense of their world, narratives not only have a logic but also are a logic in their own

right, providing an irreplaceable resource for structuring and comprehending experience. *Story Logic* brings together and pointedly examines key concepts of narrative in literary criticism, linguistics, and cognitive science, supplementing them with a battery of additional concepts that enable many different kinds of narratives to be analyzed and understood. By thoroughly tracing and synthesizing the development of different strands of narrative theory and provocatively critiquing what narratives are and how they work, *Story Logic* provides a powerful interpretive tool kit that broadens the applicability of narrative theory to more complex forms of stories, however and wherever they appear. *Story Logic* offers a fresh and incisive way to appreciate more fully the power and significance of narratives. [Writing Science](#) Taylor & Francis
Originally published in 1985, the various chapters in this volume give examples of research on all three aspects of

text understanding – namely, structure, world knowledge and process. More than this, however, the research described represents a shift in emphasis from studying stories, which dominated the field in the late 1970s, to studying expository text. This focus on stories was probably due to the essential first step in any science of examining the simplest materials possible. However, the editors thought that it was time to shift the research focus from stories to expository text and this volume is their attempt to provide this transition.

Teaching New Literacies in Grades

K-3 Mohr Siebeck
By taking an integrated approach to the practice of translation, Hatim and Mason provide a refreshingly unprejudiced contribution to translation theory. They argue that the division of the subject into literary and non-literary, technical and non-technical and so on, is unhelpful and misleading. Instead of dwelling on these differentials, the authors focus on what common ground exists between these distinctions. The proposed model is presented through a series of case studies,

each of which has as its focus one particular feature of text constitution, while not losing sight of how this contributes to the whole analytic apparatus. Topics covered include: * a comprehensive description of the interpreting process * power and ideology in translation * discourse errors * curriculum design for translator training
The World of Science Education Cornell University Press
This book aims to help teachers and those who support them to re-imagine the work of teaching, learning and leading. In particular, it shows how transformations of educational practice depend on complementary transformations in classroom-school- and system-level organisational cultures, resourcing and politics. It argues that transforming education requires more than professional development to transform teachers; it also calls for fundamental changes in learning and leading practices, which in turn means reshaping organisations that support teachers and teaching – organisational cultures,

the resources organisations provide and distribute, and the relationships that connect people with one another in organisations. The book is based on findings from new research being conducted by the authors – the research team for the (2010-2012) Australian Research Council-funded Discovery Project Leading and Learning: Developing Ecologies of Educational Practice.
Proceedings of the International Seminar SEMANTIKS & PRASASTI 2023 Theme: Language in the Workplace (PRASASTI 2023) Cambridge University Press
The papers collected in this volume (including a comprehensive introduction) investigate semantic and discourse-related aspects of subordination and coordination, in particular the relationship between subordination/coordination at the sentence level and subordination/coordination – or hierarchical/non-hierarchical organization – at the discourse level. The contributions in part I are concerned with central theoretical questions; part II consists of corpus-based cross-linguistic studies of clause combining and

discourse structure, involving at least two of the languages English, German, Dutch, French and Norwegian; part III contains papers addressing specific - predominantly semantic - topics relating to German, English or French; and the papers in part IV approach the topic of subordination, coordination and rhetorical relations from a diachronic (Old Indic and Early Germanic) perspective. The book aims to contribute to a better understanding of information packaging on the sentence and text level related, within a particular language as well as cross-linguistically.

Story Logic John Benjamins Publishing

"There is a big difference between assigning complex texts and teaching complex texts..."

---Doug, Fisher, Nancy Frey, and Diane Lapp

....And that's the crux, isn't it? That's why in this brand new edition of the bestselling *Text Complexity*, the renowned author team provide four new chapters that lay open the instructional routines that take students to new places as readers. No matter what discipline you teach, you will learn how to craft purposeful instruction

pitched to your readers' comprehension capacities, your curriculum's themes, and your own assessments on what students need next. Doug, Nancy, and Diane provide: How-to's for measuring word and sentence length and other countable features of any written work while giving ample consideration to the readers in your room, and how their background knowledge, experiences, and motivations come into play

A rubric for analyzing literary texts for plot structure, point of view, imagery, clarity, and more—and a complexity scale for analyzing informational texts that describe, inform, and explain

Classroom scenarios of teachers and students engaging with fiction and nonfiction texts that provide enough of a stretch, so you'll know the difference between a healthy struggle and frustration

The authors' latest thinking on routines that invite students to interact with complex texts and with one another, including teacher modeling, close reading, scaffolded small group reading, and independent reading

It's time to see text complexity as a dynamic, powerful tool for

sliding the right text in front of our students' at just the right time. Think of this second edition as *Text Complexity-2-Go*, because it's all about the movement of minds at work, going deeper than anyone ever thought possible.

Targeting Text Corwin Press

Textual Parameters in Older Languages takes a contemporary approach to the inherent limitations of using older texts as data for linguistic analysis, drawing on methods of text analysis, pragmatics and sociolinguistics to supplement traditional historical and philological methods. The focus of the book is on the importance of controlling for textual parameters-defined by the editors as dimensions of variation associated with texts and their production, including text type, degree of poeticality, orality, and dialect-in the analysis of older language data. Failure to do so can result in invalid generalizations; recognizing the influence of textual parameters, conversely, raises a myriad of issues for the practice and theory of historical linguistics. The 12 essays in this collection apply this

approach in analyses of anaphora, non-finite verbal forms, particles, punctuation, word order and other phenomena in a wide range of languages including Ancient Tamil, Sanskrit, Latin, Heian Japanese, Medieval Greek, Old French, Old Russian, Middle English, and Modern Danish. An in-depth introduction by the editors lays out the goals of the textual parameters approach, and considers the methodological and theoretical consequences of the evidence presented in the book as a whole.

Excel Revise in a Month - Year 6 Selective Schools Scholarship Tests:
Includes an introduction to the NSW Selective High Schools Test, the Cooperative Scholarship Testing Program (CSTP), the Scholarship Selection Test (SST), the Australian Cooperative Entry Program (ACEP), and the EAA Placement Test. Covers the essential areas of these tests: reading comprehension, general ability, maths and written expression. Includes fully explained answers to all questions. Excel Revise in a Month Year 6 Selective Schools Scholarship Tests will help your child revise for success with the

following features: key points - provides a detailed summary of each topic, as well as helpful hints and tips sample - supplies model questions and responses to all question types practice tasks & dash; develops the necessary skills to answer questions correctly real test - allows your child to practise questions like those in the real test sample test papers allows your child to become familiar with the format of the Selective Schools and Scholarship Tests suggested time helps prepare your child to answer questions under the time constraints of the Selective Schools and Scholarship Tests
Expository Discourse in Children, Adolescents, and Adults Elsevier "[A] series of seven teacher resource books that support teaching and learning activities in Australian Curriculum English"--foreword.
ActivEpi Companion Textbook Routledge For literacy teachers looking for practical ways to implement a Curriculum and Instruction Model that's more inquiry-driven and idea-centered, look no further than this book. This resource helps bridge

the divide between conceptual curriculum and actionable practice, and provides practical support for teachers implementing Concept-Based literacy lessons. Readers will find Step-by-step help with lesson planning for conceptual understanding and transfer Ideas for supporting inductive learning Classroom Snapshots that showcase familiar literacy practices in Concept-Based classrooms Strategies to promote critical, reflective, and conceptual thinking Model elementary and secondary Concept-Based lesson and unit plans A chapter devoted to answering frequently asked questions
A Survey of Modern English Cambridge University Press Reading Expository Material focuses on the techniques on how to apply the skills in reading tasks outside of formal reading instruction. This book explores the problems related to skill application that are encountered by reading specialists and educators. Organized into six parts encompassing 17 chapters, this book starts with an overview of the categories of the study,

including the reader, the text, and the interaction of reader with text. This text then examines the readers' metacognitive development, the development of study skills, and learning strategies. Other chapters explore the concept of knowledge and explain how knowledge comes into play in the process of perception and comprehension. This book discusses as well the developments in cognitive psychology and in artificial intelligence. The final chapter reviews how to enable teachers in the classroom to deal more realistically with the facts of a reader-text interaction. Reading specialists, researchers, and educators with an interest in the teaching of and learning from expository materials will find this book useful.

Communication Development and Disorders for Partners in Service ASCD

School success in the 21st century requires proficiency with expository discourse -- the use and understanding of informative language in spoken and written modalities. This occurs, for example, when high school students read their textbooks and listen to

their teachers' lectures, and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations. Although many students are proficient with the expository genre, others struggle to meet these expectations. This book is designed to provide information on the use and understanding of expository discourse in school-age children, adolescents, and young adults. Recently, researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders. Although many books have addressed the development of conversational and narrative discourse, by comparison, books devoted to the topic of expository discourse are sparse. This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders. It will be of interest to a range of professionals, including speech-language pathologists, teachers, linguists, and

psychologists who are concerned with language development and disorders.

Proceedings of the Eleventh International Conference on Languages and Arts (ICLA 2022)

Bloomsbury Publishing
The Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts, Volume II brings together state-of-the-art research and practice on the evolving view of literacy as encompassing not only reading, writing, speaking, and listening, but also the multiple ways through which learners gain access to knowledge and skills. It forefronts as central to literacy education the visual, communicative, and performative arts, and the extent to which all of the technologies that have vastly expanded the meanings and uses of literacy originate and evolve through the skills and interests of the young. A project of the International Reading Association, published and distributed by Routledge/Taylor & Francis. services.

Evaluating the K-12 Literacy Curriculum

Routledge

This is an open access book. Language in the workplace has been increasingly interesting object of language study. The gathering of language speakers with various social and cultural backgrounds makes the workplace a rich place with linguistic data for research. Varieties of spoken or written language, interaction between co-workers, miscommunication, meaning coming up in the interaction, the new technical terms related to certain professions, and language for virtual work are some many phenomena of language in the workplace that can become the object of linguistic research.

Ethical Design of Artificial Intelligence-based Systems for Decision Making

Springer Science & Business Media

Even the youngest readers and writers in today's classrooms can benefit enormously from engagement with a wide range of traditional and nontraditional texts. This teacher-friendly handbook is packed with creative strategies for introducing K-3 students to fiction,

poetry, and plays; informational texts; graphic novels; digital storytelling; Web-based and multimodal texts; hip-hop; advertisements; math problems; and many other types of texts.

Prominent authorities explain the research base underlying the book's 23 complete lessons and provide practical activities and assessments for promoting decoding, fluency, comprehension, and other key literacy skills. Snapshots of diverse classrooms bring the material to life; helpful reproducibles are included.

The Translator As Communicator

Blake Education
This book is about the use of language in the science classroom. It discusses the evolution of scientific discourse for learning in secondary schools, and examines the form and function of language across a variety of levels including lexiogrammar, discourse semantics, register, genre and ideology. Special attention is paid to how this knowledge is imparted. It will be of particular interest to educators involved with linguistics and/or science curriculum and teachers of English for special and

academic purposes.; It is aimed at teachers of undergraduates in science and literacy, linguists teaching in English for special and academic purposes and students in higher education with an interest in science and literacy.

Sammlung Routledge Teaching the Dimensions of Literacy provides both the conceptual knowledge to support teachers' instructional decisions in the reading/literacy classroom and a multitude of instructional strategy lessons for classroom use with both monolingual and bilingual students. It proposes that teachers need to help children become code breakers (the linguistic dimension), meaning makers (the cognitive dimension), text users and critics (the sociocultural dimension), and scientists (the developmental dimension).

Acknowledging and addressing all four dimensions, this text links literacy theory, literacy research, and literacy practice in a useable way. Covering both reading and writing, it features clear, concise, and useable reading and writing strategy lessons and ways to modify them

for different types of students. Changes in the Second Edition: Entirely reorganized, the text is more user friendly, builds a stronger link between theory and practice, and makes it is easier for teachers to locate appropriate strategy lessons to use with their students. Academic literacy is addressed more

fully.
Targeting Text Springer Nature
 Discourse and the Translator both incorporates and moves beyond previous studies of translation. Its logical and informative approach to the problems of translation ensures that it will be essential for all those who work with

languages 'in contact'. Incorporating research in sociolinguistics, discourse studies, pragmatics and semiotics, the authors analyse the process and product of translation in their social contexts. Through this analysis, the book emphasises the importance of the translator as a mediator between cultures.
