THE GOOD LUCK GIRLS

The country of Arketta calls them Good Luck Girls—they know their luck is anything but.

Sold to a "welcome house" as children and branded with cursed markings.

Trapped in a life they would never have chosen. When

Clementine accidentally kills a man, the girls risk a dangerous escape and harrowing journey to find freedom, justice, and revenge in a country that wants them to have none of those things. Pursued by Arketta's most vicious and powerful forces, both human and inhuman, their only hope lies in a bedtime story passed from one Good Luck Girl to another, a story that only the youngest or most desperate

would ever believe. It's going to take more than luck for them all to survive. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. Createspace Independent Publishing Platform Thirty Acres traces the course of one man's life as he enters into the age-old rhythms of the land and of the seasons. At the same time, it is a novel on a

grand social scale, spanning and documenting the tumultuous half-century in which a new, industrial urban society crowded out Quebec's traditional rural one.

Ten-year-old Ernest lives a

flat, colorless life. Each day is the same: he comes home right after school, eats a healthy snack, and does his homework. Enter Victoria, the new girl in class. Victoria instantly falls in love with Ernest, and bulldozes her way into his life. Much to Ernest's surprise, he likes it. Bit by bit, color seeps into Ernest's humdrum existence--and he begins to realize that life can hold an endless variety of

love, friendship, adventure, and change."Quirky characters, heightening suspense, and hilarious situations are deftly combined in this tender novel, which examines a few of the large and small ways people affect one another."

Bright Connections  
A sequence of more than 60 Palaeolithic cultural layers makes the well-site of

Hummal in the arid steppe region of El Kowm [Central Syria], that has been investigated since 2002, a very important site. Since about one million years ago, humans repeatedly occupied the area of the spring during a range of environmental conditions. This study deals with the upper most part of a sequence of more than 30 Mousterian strata. While organic remains such as animal

bones are badly preserved and therefore rare, the stone artefacts provide rich material for a techno-typological analysis. Herds of grazing wild animals such as horses, gazelles, ostriches, and camels gathered at the waterhole in the course of their annual migrations and were hunted by humans. Additionally, the site had ready access to high-quality flint. The presence,

absence, relative frequency, and size of certain artefact types such as cores, cortical flakes, and tools allow the reconstruction of different supply strategies. For obtaining standardised blanks, two variants of the Levallois method were applied. They served for the production of different tools in the course of time. Sixth Grade Penguin The ideas of philosophers (Ficino, Pico, Della Porta,

Bruno) on magic interfered with popular alternative and witchcraft rites. This book focuses on “wandering scholastics” (Trithemius, Agrippa, Paracelsus, Bruno) and will be a stimulating read for all those interested in Renaissance mentality. Le Monde de Greensboro, N.C. : Unicorn Press
