This book deals with computer performance by addressing basic preconditions. Besides general considerations about performance, several new approaches are presented. One of them targets memory structures by introducing the possibility of overlapping non-interfering (virtual) address spaces. This approach is based on a newly developed jump transformation between different symbol spaces. Another approach deals with efficiency and accuracy in scientific calculations. Finally the concept of a Neural Relational Data Base Management System is introduced and the performance potential of quantum computers assessed.

Boxing is one of the oldest and most exciting of sports: its bruising and bloody confrontations have permeated Western culture since 3000 BC. During that period, there has hardly been a time in which young men, and

sometimes women, did not raise their gloved or naked fists to one other. Throughout this history, potters, sculptors, painters, poets, novelists, cartoonists, song-writers, photographers and film-makers have been there to record and make sense of it all. In her encyclopaedic investigation, Kasia Boddy sheds new light on an elemental sports and struggle for dominance whose weapons are nothing more than fists. Boddy examines the shifting social, political and cultural resonances of this most visceral of sports, and shows how from Daniel Mendoza to Mike Tyson, boxers have embodied and enacted our anxieties about race, ethnicity, gender and sexuality. Looking afresh at everything from neoclassical sculpture to hip-hop lyrics, *Boxing* explores the way in which the history of boxing has intersected with the history of mass media, from cinema to radio to pay-per-view. The book also offers an intriguing new perspective on the work of such diverse figures as Henry Fielding, Spike Lee, Charlie Chaplin, Philip Roth, James Joyce, Mae West, Bertolt Brecht, and

Charles Dickens. An all-encompassing study, *Boxing* ultimately reveals to us just how and why boxing has mattered so much to so many.

This is the first ever biography of (Edward) Swan Hennessy (1866-1929), an Irish-American composer who came to live in Paris from around 1903. Born in Rockford, Illinois, he grew up in Chicago, studied at the conservatory of music in Stuttgart, Germany, lived in various places across Europe, finally settling in the most vibrant musical metropolis of the time. Here he became influenced by the French Impressionists and tried to adapt his work to his musical environment as best as he could - or, perhaps, insofar as this was allowable. From 1912 - and especially after World War I - he realised

his true mission: as a member of a group of Celticist Breton composers, he built upon his Irish heritage and henceforth wrote in a uniquely 'Celtic' style, fusing characteristics of Irish traditional music with the art music of his time. *Pathfinder RPG: Secrets of Magic (P2)* Springer Nature

What if fourteen

individuals, working for change in their own communities around the world, came together to tell their stories? In *A Definition of Snow*, fourteen writers do just that. Gathered by Project VOICE over a period of three years, the writers describe their day-to-day experiences working in social, humanitarian, medical, development and peace-related fields, in Africa, Latin America, Asia and the Middle East, in ways that are powerful, honest and thought-provoking. Such stories, until now, have been mostly unavailable. But they are highly important - and they should be told by those who experienced them and continue to experience them on a daily basis. *A Definition of Snow* aims to project these unique voices, and bring their stories to readers for the first time. "I come from Africa, a continent that is very rich in many ways. We are very wealthy in non-material things such as happiness, laughter, joy, contentment, generosity and love. We are also wealthy in natural resources, breath-taking scenery and fertile land. However, we are famously known in the western world for poverty, disease,

corruption and war. The truth is, we are more than that and there is our side of the story that is often not told." - Sheila Chepkoech, Kenya "I wanted to be free of dictatorship. I wanted to be able to speak my mind without being punished. I wanted to decide for myself what I wanted to be in life. Nobody should decide for me." - Hintsa Solomon, Eritrea/Germany "Girls no longer marry at 14, they do not school stop at 14 - this is probably one of the best things we have done for the community. It is not easy to change people's mentality and their convictions." - Noha Rbeiz, Lebanon

Mohr Siebeck Despite the increasing prominence of Klossowski's philosophical work, there exists no full-length or sustained treatment of his writings on Nietzsche. This study analyses Klossowski's semiotic of intensity as a conceptual foundation for his philosophy and interpretation of Nietzsche, grounded in the central principles of his theory of signs. It then explores its implications for the categories of chance, causality,

individuation and time, drawing a series of parallels between Klossowski's texts and the work of other scholars, such as McTaggart, Eco, D. Z. Albert, M. Silverstein, Meillassoux, N. Land and J. Stambaugh. Throughout, this work lends accessibility to Klossowski's often opaque and idiosyncratic style. It should be relevant to anyone interested in Klossowski's philosophical work, in contemporary Nietzsche scholarship, or in the 20th Century linguistic and existential Continental tradition.

Vandenhoeck & Ruprecht As linguistic systems comprising a large variety of written and oral registers including derivate "languages" and "dialects," Latin and Arabic have been of paramount importance for the history of the Euromediterranean since Antiquity. Moreover, due to their long-term function as languages of administration, intellectual activity, and religion, they are often regarded as cultural markers of Europe and the (Arabic-)Islamic sphere respectively. This volume explores the many dimensions and ramifications of Latin-

Arabic entanglement both from macro-historical as well as from micro-historical perspectives. Visions of history marked by the binary opposition of "Islam" and "the West" tend to ignore these important facets of Euromediterranean entanglement, as do historical studies that explain complex transcultural processes without giving attention to their linguistic dimension. *Origins of the Sphinx Music and Spirituality* La 4e de couverture indique : "Kevin Mattison argues that Deuteronomy was designed to amend the Covenant Code (Exod 20:22-23:19). He proposes a model of amendment, which draws on existing models of replacement and supplementation to provide a more complete explanation of Deuteronomy's rewriting of the Covenant Code." *Enlivening Faith* Paizo Incorporated This book investigates the emergence of the modern concept of zeitgeist, the notion of a pervasive contemporary coherence, in the late 18th century. It traces zeitgeist's descent from genius saeculi and investigates its association with public spirit and public opinion

before surveying its prominence around the Wars of Liberation in Germany and during the politically restless 1820s in England. This trajectory shows that zeitgeist emerged from the 18th-century discourses about culture and the public functioning of social collectives. Under the impact of the French Revolution the term came to describe social processes of political and cultural challenge. Zeitgeist was discussed as a social dynamic in which emerging elites disseminate new ideas which find enough public approval to influence cultural and political behaviour and practice. These findings modify the view that zeitgeist eludes critical grasp and is mainly invoked for manipulative purposes by showing that the zeitgeist discussions around 1800 contributed to the formation of modern politics and capture key aspects of how ideas are disseminated within societies and across borders, providing a way of reading history horizontally.

Emerald City yearns for blood. . . Cinder had no idea what she was getting

into when she fell into Oz, but the devilishly sexy Scarecrow was as unexpected as the glass shards in her feet. He's dangerous, that much she knows, but despite his penchant for villainy, Crow is nothing compared to what she's running from. Cinder is desperate to get away from the peril behind her, but prophesy breeds new violence. There is no escape. The threat to Oz grows around them and though Cinder is strong, she has her own ghosts to battle. She shouldn't be worried about the heat in Crow's eyes; she should be putting as much distance as possible between herself and the Enchanted Forest. If she's not careful, those ghosts will come back to haunt her. With Oz the epicenter of the merging worlds and new monsters being released, will Cinder be strong enough to survive the breaking? Will she walk away with her heart and soul intact? It's time for madness to come to Oz. . . If you like Sarah J Maas, Gena Showalter, J.R. Ward, Laura Thalassa, or Jennifer L.
