**If Polar Bears Disappeared** Simon and Schuster

The Arctic might be a bit too chilly for humans to live there, but it is the perfect home for polar bears. But the earth is getting warmer and the ice is melting. Where will the polar bears live? How can we help protect their home? This is a Stage 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades. A Critical Companion to Robert Zemeckis offers a comprehensive, academic and detailed study of the works of Robert Zemeckis, whose films include successful productions such as the Back to the Future trilogy (1985-90), Forrest Gump (1994), Contact (1997), Cast Away (2000) and The Polar Express (2004), but also lesser known films such as I Wanna Hold Your Hand (1978), Used Cars (1980), and Allied (2015). Most of Zemeckis' major productions were not only successful when they were first released but continue to enjoy popularity—with critics and fans alike—even today. This volume investigates several distinct areas of Zemeckis' works and addresses the different approaches: the philosophical, the artistic, the socio-cultural, and the personal. The methodologies adopted by the contributors differ significantly from each other, thus offering the reader a variegated and compelling picture of Zemeckis' oeuvre, which includes nineteen films. Contrary to

the few volumes published in the past on the subject, the chapters in this volume offer specific case studies that have been previously ignored (or only partially mentioned) by other scholars. A Critical Companion to Robert Zemeckis offers a great variety of interdisciplinary approaches to Zemeckis' films, illuminating, re-reading and/or interpreting for the first time the entire career of the director, from his first films to the most recent ones.

The Arctic and World Order Chronicle Books

The Arctic, long described as the world's last frontier, is quickly becoming our first frontier—the front line in a world of more diffuse power, sharper geopolitical competition, and deepening interdependencies between people and nature. A space of often-bitter cold, the Arctic is the fastest-warming place on earth. It is humanity's canary in the coal mine—an early warning sign of the world's climate crisis. The Arctic “regime” has pioneered many innovative means of governance among often-contentious state and non-state actors. Instead of being the “last white dot on the map,” the Arctic is where the contours of our rapidly evolving world may first be glimpsed. In this book, scholars and practitioners—from Anchorage to Moscow, from Nuuk to Hong

Kong—explore the huge political, legal, social, economic, geostrategic and environmental challenges confronting the Arctic regime, and what this means for the future of world order.

**The Polar Express** Simon and Schuster

"In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" – Pope Francis, *Laudato Si'*  
In his second encyclical, *Laudato Si': On the Care of Our Common Home*, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." *Laudato Si'* outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

The Memoirs of a Polar Bear stars three generations of talented writers and performers—who

happen to be polar bears The Memoirs of a Polar Bear has in spades what Rivka Galchen hailed in the New Yorker as "Yoko Tawada's magnificent strangeness"—Tawada is an author like no other. Three generations (grandmother, mother, son) of polar bears are famous as both circus performers and writers in East Germany: they are polar bears who move in human society, stars of the ring and of the literary world. In chapter one, the grandmother matriarch in the Soviet Union accidentally writes a bestselling autobiography. In chapter two, Tosca, her daughter (born in Canada, where her mother had emigrated) moves to the DDR and takes a job in the circus. Her son—the last of their line—is Knut, born in chapter three in a Leipzig zoo but raised by a human keeper in relatively happy circumstances in the Berlin zoo, until his keeper, Matthias, is taken away... Happy or sad, each bear writes a story, enjoying both celebrity and "the intimacy of being alone with my pen."

**Heart of the Mummy** HarperCollins

Weaving these pieces together are candid interviews with the star-studded cast and crew, including Robert Zemeckis and his team of filmmaking visionaries, that deliver rare insight into the film as they divulge the secrets behind their creative process.
