My 1001 Nights Raintree

TV presenter, writer and adventurer Alice Morrison gives her own unique and personal insight into Morocco, her home for 1001 nights. When Alice Morrison headed out to Morocco, it was to take on one of the most daunting challenges: to run in the famous Marathon des Sables. Little did she expect to end up living there. But as soon as she settled in a flat in Marrakech, she was won over by the people, the spectacular scenery and the ancient alleyways of the souk. Soon she was hiking over the Atlas mountains, joining nomads to sample their timeless way of life as they crossed the Sahara desert, and finding peace in a tranquil oasis. Despite more than 10 million tourists coming to Morocco each year, there is remarkably little that has been written about its people, their customs and the extraordinary range of places to visit, from bustling markets to vast, empty deserts. Alice makes sure she samples it all, and as she does she provides a stunning portrait of a beautiful country. As a lone woman, she often attracts plenty of curiosity, but her willingness to participate - whether thigh deep in pigeon droppings in a tannery or helping out herding goats - ensures that she is welcomed everywhere by a people who are among the most hospitable on the planet. Alice came to fame with her BBC2 series *Morocco to Timbuktu*, and now she joins the ranks of great travel writers who can bring a country vividly to life and instantly transport the reader to a sunnier place. If you're thinking of going to Morocco, or you want to recall your time there, *My 1001 Nights* is the ideal book.

The Renegades Open Road Media

This action-packed graphic novel follows the adventures of three inspirational superheroes to explore the issues of the climate emergency, for the individual and the planet. Beneath the Arctic ice, the Methanaur is awakening. If this deadly methane monster breaks free, it spells the end of civilization as we know it. Meet Professor Katelyn, Leon, and Mo - also known as The Renegades. Professor Katelyn is a whip-smart scientist who uses her scientific knowledge to develop spectacles that can catch glimpses of the future. Wrestling with his anger at the naysayers who don't seem to care about the environment, Leon has the ability to become invisible - the perfect spy! And then there's Mo who, in the wake of his brother's death in a cyclone, manages to wield a solar shield strong enough to fight the deadliest of foes. Our superheroes grapple with multiple environmental threats, most deadly of all a monster that lurks beneath the melting Arctic ice. If it escapes, this creature of chaos will release huge plumes of methane gas into the atmosphere, changing the balance of our planet's climate forever. Can the Renegades work together to save Earth before it is too late?

The English explorer Henry Hudson devoted his life to the search for a water route through America, becoming the first European to

navigate the Hudson River in the process. In Fatal Journey, acclaimed historian and biographer Peter C. Mancall narrates Hudson's final expedition. In the winter of 1610, after navigating dangerous fields of icebergs near the northern tip of Labrador, Hudson's small ship became trapped in winter ice. Provisions grew scarce and tensions mounted amongst the crew. Within months, the men mutinied, forcing Hudson, his teenage son, and seven other men into a skiff, which they left floating in the Hudson Bay. A story of exploration, desperation, and icebound tragedy, Fatal Journey vividly chronicles the undoing of the great explorer, not by an angry ocean, but at the hands of his own men. On the brink of a critical moment in human history, this book presents a vision of "planetary stewardship" - a rethinking of our relationship with our planet - and plots a new course for our future. The authors, whose work is the subject of a new Netflix documentary released in summer 2021 and narrated by Sir David Attenborough, reveal the full scale of the planetary emergency we face - but also how we can stabilise Earth's life support system. The necessary change is within our power if we act now. In 2009, scientists identified nine planetary boundaries that keep Earth stable, ranging from biodiversity to ozone. Beyond these boundaries lurk tipping points. To stop short of these tipping points, the 2020s must see the fastest economic transition in history. This book demonstrates how societies are reaching positive tipping points that make this transition possible: Activism groups such as Extinction Rebellion, or the schoolchildren inspired by Greta Thunberg demand political action; countries are committing to eliminating greenhouse gas emissions; and one tipping point has even already passed - the price of clean energy has dropped below that of fossil fuels. Inside the pages of this scientifically-led publication, world-leading climate-change experts explain the greatest crisis humanity has ever faced. - Expert-authored text in an accessible style for both adults, and children ages 14+ - A breakdown of the 9 planetary boundaries for relative stability on Earth, ranging from biodiversity to the ozone layer - An exploration of climate "tipping points" - good and bad - Stunning infographics and images visualising the problems and solutions to climate change - Contains detailed and unique images of Earth produced by Globaia, the world's leading visualisers of human impact

The Arctic and its surrounding marginal seas are considered some of the most sensitive elements of the global environment, which may respond rapidly to climate change. However, due to various reasons, our knowledge of the processes which drive the Arctic system today and in the past is still relatively sparse. Based on a multidisciplinary approach, German and Russian scientists describe in this book the natural paleorecords and modern data which were collected over the past 6 years. These marine and terrestrial datasets provide important new insights into the causes, impacts, and feedback mechanisms of this extreme Arctic environment.
