 Task-based teaching has created enormous interest among teachers in recent years. But how does the idea of designing tasks (e.g. discussions, problems, games) that encourage learners to use real language work in practice? This book explains the basic principles behind task-based learning and teaching and gives practical examples of how to make it work in different teaching situations.

 Eight European and North American scholars explore the concept of divinity in the Scrolls (monotheism vs. a host of divine beings, and the efficacy of prayer), the Scrolls' relation to important halakic issues (the interpretation of sacrifice and the continuity of halakic tendencies), the question of Hellenistic influence (especially the Greek language), and the Scrolls' apocalypticism and messianism. Included is one index of ancient literature and one of modern authors. Collins is professor of the Old Testament at Yale and Kugler is professor of religious studies at Gonzaga.  Offering students choices about their learning, says author Mike Anderson, is one of the most powerful ways teachers can boost student learning, motivation, and achievement. In his latest book, Anderson offers numerous examples of choice in action, ideas to try with different students, and a step-by-step process to help you plan and incorporate choice into your classroom. You'll explore \* What effective student choice looks like in the classroom. \* Why it's important to offer students choices. \* How to create learning environments, set the right tone for learning, and teach specific skills that enable choice to work well. When students have more choices about their learning, they can find ways of learning that match their personal needs and be more engaged in their work, building skills and work habits that will serve them well in school and beyond. This teacher-friendly guide offers everything you need to help students who are bored, frustrated, or underperforming come alive to learning through the fundamental power of choice.

**Save the Cat! Writes a Novel** Purdue University Press  
 Includes no. 53a: British wartime books for young people.

*Forthcoming Books* Springer  
 Lead from the Outside is a necessary guide to harnessing the strengths of being an outsider by Stacey Abrams, one of the most prominent black female politicians in the U.S. Leadership is hard. Convincing others—and often yourself—that you possess the answers and are capable of world-affecting change requires confidence, insight, and sheer bravado. Stacey Abrams's Lead from the Outside is the handbook for outsiders, written with the awareness of the experiences and challenges that hinder anyone who exists beyond the structure of traditional white male power—women, people of color, members of the LGBTQ community, and millennials ready to make a difference. In Lead from the Outside, Stacey Abrams argues that knowing your own passion is the key to success, regardless of the scale or target. From launching a company, to starting a day care center for homeless teen moms, to running a successful political campaign,

finding what you want to fight for is as critical as knowing how to turn thought into action. Stacey uses her experience and hard-won insights to break down how ambition, fear, money, and failure function in leadership, while offering personal stories that illuminate practical strategies. Stacey includes exercises to help you hone your skills and realize your aspirations. She discusses candidly what she has learned over the course of her impressive career: that differences in race, gender, and class are surmountable. With direction and dedication, being in the minority actually provides unique and vital strength, which we can employ to rise to the top and make real change.

 The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The "practical orientation" section explains how to develop objectives and then use them to enhance student learning, and the "theoretical orientation" section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn.

 The result of years of blood, sweat, and story writing--along with an MFA, some published stories, an optioned screenplay, and a million cups of coffee--"A Writer's Workbook" is Sharp's ingenious collection of exercises to inspire, encourage, warm up and jump-

start anyone who writes.

*Practical Research* Farrar, Straus and Giroux

Teaching English in Africa is a practical guide written for primary and secondary school teachers working all over the continent. This book relates the practice of English language teaching directly to the African context. As well as covering the underlying theory of how children learn languages and how teachers can best facilitate this learning, it also provides practical resources and ideas for activities and techniques that have proved successful in English classrooms in Africa, both at primary and secondary level. It is intended to be a practical guide, so references and citations are kept to a minimum and concepts are presented using examples that are likely to be familiar to most teachers working in Africa. If there is a bias in this book, it is towards the needs of teachers working in low-resource, isolated contexts in Africa, as these teachers are so often neglected by literature on teaching methodology.

*Macmillan Language Arts Today* Ten Speed Press

This book highlights the need to develop new educational perspectives in which multilingualism is valorised and strategically used in settings and contexts of instruction and learning. Situated in the current educational debate about multilingualism and ethno-linguistic minorities, chapter authors examine the polarised response to heightened linguistic diversity and how the debate is very much premised on binary views of monolingualism and multi- or bilingualism. Contributors argue that the diverse linguistic backgrounds of immigrant and minority students should be considered an asset, instead of being

regarded as a barrier to teaching and learning. From its title through to its conclusion, this book underlines the current perspective of multilingualism as possessing cutting edge potential for transforming diverse classrooms into more inhabitable, more equitable and more efficiently organised spaces for learning. This book will be of interest to scholars and researchers in educational linguistics, applied linguistics, sociolinguistics, anthropological linguistics, pedagogics, educational studies, and educational anthropology.
