In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired

advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and

encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

This book takes the "houseplant look" outside by exploring the wonders of lush, green, foliage plants that are hardy in the garden to -10F. Unlike flowers that fade, these

big-leaved, larger-than-life plants provide year-round impact for decades and small, urban gardens that are well protected are the perfect home for them. Jungle gardens can be shady and immersive, sunny and open or somewhere in between and there are plants suited to all these environments including

purple-leaved bananas, desert-island palms, spiky agaves, architectural Pseudopanax, and succulents such as Echeveria and Aeonium. Beautiful special photography by Sarah Cuttle features standout jungle gardens that demonstrate how to combine foliage plants effectively and create backdrops and container displays that make the plants pop. This book is the irresistible next step for all houseplant addicts and for all who are ready to embark on their very
