CUMMINGS SLADE

Where All Light Tends to Go Government Printing Office

A basic guide to the inspection, repair, and maintenance of tires and tracks for off-road vehicles.

Luna Farming Legacy Rowman & Littlefield

"In this magnificent book, Oliver Schuchard provides more than sixty-five exquisite black-and-white photographs spanning his thirty-eight years of photography. In addition, he explains the aesthetic rationale and techniques he used in order to produce these photographs, emphasizing the profound differences between, yet necessary interdependence of, craft and content. Although Schuchard believes that craft is important, he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are, in fact, functions of one another. The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher. He chose the splendid photographs included in this book from among nearly 5,000 negatives that had been exposed all over the world, from Missouri to Maine, California, Alaska, Colorado, France, Newfoundland, and Hawaii, among many other locations. Approximately 250 negatives survived the initial review, and each of those was printed before a final decision was made on which photographs were to be featured in the book. The final choices are representative of

Schuchard's work and serve to substantiate his belief that craft, concept, and self must be fully understood and carefully melded for a good photograph to occur. This amazing work by award-winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike, as well as by anyone who simply enjoys superb photography."--Publishers website.

The Men All Singing Ashgate Publishing, Ltd.

This volume contains papers presented at the 11th International Conference on Jet Cutting Technology, held at St. Andrews, Scotland, on 8-10 September 1992. Jetting techniques have been successfully applied for many years in the field of cleaning and descaling. Today, however, jet cutting is used in operations as diverse as removing cancerous growths from the human body, decommissioning sunsea installations and disabling explosive munitions. The diversity is reflected in the papers presented at the conference. The papers were divided into several main sections: jetting basics -- materials; jetting basics -- fluid mechanics; mining and quarrying; civil engineering; new developments; petrochem; cleaning and surface treatment; and manufacturing. The high quality of papers presented at the conference has further reinforced its position as the premier event in the field. The volume will be of interest to researchers, developers and manufacturers of systems, equipment users and contractors.

Ruled Notebook A4 Basic Books

Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

In the eighth action-packed thriller in the New York Times bestselling Pike Logan series, ISIS, the most maniacal terrorist organization the modern world has ever seen, is poised to make their most audacious strike yet. The United States has anticipated and averted countless attacks from terrorist groups—thanks in large part to the extralegal counterterrorist unit known as the Taskforce. But in *The Insider Threat*, a much more insidious evil is about to shatter the false sense of safety surrounding civilized nations. While world powers combat ISIS on the battlefield, a different threat is set in motion by the group—one that can't be defeated by an airstrike. Off the radar of every Western intelligence organization, able to penetrate America or any European state, they intend to commit an act of unimaginable barbarity. Only Pike Logan and the Taskforce stand in the way of an attack no one anticipates, a grand deception that will wreak unthinkable chaos and reverberate throughout the Western world.

Backpacker John Deere Publishing

Throughout the mining and processing of minerals, the mined ore undergoes a number of crushing, grinding, cleaning, drying, and product sizing operations as it is processed into a marketable commodity. These operations are highly mechanized, and both individually and collectively these processes can generate large amounts of dust. If control technologies are inadequate, hazardous levels of respirable dust may be liberated into the work environment, potentially exposing workers. Accordingly, federal regulations are in place to limit the respirable dust exposure of mine workers. Engineering controls are implemented in mining operations in an effort to reduce dust generation and limit worker exposure.

Helps students become familiar with the question format on standardized tests and learn how to apply logic and reasoning skills to word knowledge. Focuses on exact word definitions and secondary word meanings, relationships between words and how to draw logical conclusions about possible answer choices. Identifies analogies, cause/effect, part/whole, type/category, synonyms, and antonyms.

Load Restraint Guide Princeton University Press

Selling Shakespeare tells a story of Shakespeare's life and career in print, a story centered on the people who created, bought, and sold books in the early modern period. The interests and investments of publishers and booksellers have defined our ideas of what is 'Shakespearean', and attending to their interests demonstrates how one version of Shakespearean authorship surpassed the rest. In this book, Adam G. Hooks identifies and examines four pivotal episodes in Shakespeare's life in print: the debut of his narrative poems, the appearance of a series of best-selling plays, the publication of collected editions of his works, and the cataloguing of those works. Hooks also offers a new kind of biographical investigation and historicist criticism, one based not on external life documents, nor on the texts of Shakespeare's works, but on the books that were printed, published, sold, circulated, collected, and catalogued under his name.

Introduction to Prescribed Fire in Southern Ecosystems University Press of Colorado

Provides basic safety principles that should be followed to ensure the safe carriage of goods. Includes clear and useful illustrations throughout. The guide is in two parts, the first part for drivers and operators and the second part for engineers and designers.

Car Safety Wars University of Chicago Press

This cooperative effort by USDA Forest Service Research and the National Forest System assesses the state of knowledge related to the conservation status of four forest carnivores in the western United States: American marten, fisher, lynx, and wolverine. The conservation assessment reviews the biology and ecology of these species. It also discusses management considerations stemming from what is known and identifies information needed. Overall, we found huge knowledge gaps that make it difficult to evaluate the species' conservation status.

National Geographic Adventurer of the Year Jennifer Pharr Davis unlocks the secret to maximizing perseverance--on and off the trail Jennifer Pharr Davis, a record holder of the FKT (fastest known time) on the Appalachian Trail, reveals the secrets and habits behind endurance as she chronicles her incredible accomplishments in the world of endurance hiking, backpacking, and trail running. With a storyteller's ear for fascinating detail and description, Davis takes readers along as she trains and sets her record, analyzing and trail-testing the theories and methodologies espoused by her star-studded roster of mentors. She distills complex rituals and histories into easy-to-understand tips and action items that will help you take perseverance to the next level. The Pursuit of Endurance empowers readers to unlock phenomenal endurance and leverage newfound grit to achieve personal bests in everything from sports and family to the boardroom.

The Coastal Everglades Learning Express (NY)

Jim ran a profitable lawn mowing business for over twenty years. When he went into business with his son in 1983, there was no book, so they learned everything the hard way, through experience. After retiring in 2005, Jim wrote a guide that cuts right to the heart of the mowing business, showing you how to find customers and keep them happy, and how to operate efficiently, so you'll maximize your profits. As Jim learned, trial and error is slow and very expensive. Early on, they made the same mistakes over and over, spending whole seasons using wrong machines, pursuing wrong goals. You can follow ideas that wreck your profits, and don't even realize you're doing it! The business limps along, earning little or nothing and soon disappears. Every year, Americans spend more than \$100 billion on lawn care. Jim learned to steer a healthy chunk of that money in his direction, and wants to teach you to do the same, opening the door to a lifetime of security and independence. The book is based on the combined experience of Jim and his son, a total of nearly fifty years of full-time mowing. No fantasy, no pie in the sky: Just a sharp focus on the facts and the vital questions, putting you years ahead of your competitors. No wasted time or money. The book includes a Quick Start Guide, so you'll earn maximum profits, starting on the first day.

A-10s Over Kosovo Penguin

First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, "marked a real turning point . . . and proved that a war can be won by airpower alone." Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower--the members of the 40th Expeditionary Operations Group. Their descriptions--a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot--provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

Car Safety Wars is a gripping history of the hundred-year struggle to improve the safety of American automobiles and save lives on the highways. Described as the "equivalent of war" by the Supreme Court, the battle involved the automobile industry, unsung and long-forgotten safety heroes, at least six US Presidents, a reluctant Congress, new auto technologies, and, most of all, the mindset of the American public: would they demand and be willing to pay for safer cars? The "Car Safety Wars" were at first won by consumers and safety advocates. The major victory was the enactment in 1966 of a ground breaking federal safety law. The safety act was pushed through Congress over the bitter objections of car manufacturers by a major scandal involving General Motors, its private detectives, Ralph Nader, and a gutty cigar-chomping old politician. The act is a success story for government safety regulation. It has cut highway death and injury rates by over seventy percent in the years since its enactment, saving more than two million lives and billions of taxpayer dollars. But the car safety wars have never ended. GM has recently been charged with covering up deadly defects resulting in multiple ignition switch shut offs. Toyota has been fined for not reporting fatal unintended acceleration in many models. Honda and other companies have—for years—sold cars incorporating defective air bags. These current events, suggesting a failure of safety regulation, may serve to warn us that safety laws and agencies created with good intentions can be corrupted and strangled over time. This book suggests ways to avoid this result, but shows that safer cars and highways are a hard road to travel. We are only part of the way home.

The Great Divergence Penguin

THE INSPIRATION FOR THE MAJOR MOTION PICTURE DEVIL'S PEAK—starring Billy Bob Thornton, Robin Wright, Hopper Penn, and Jackie Earle Haley! In the country-noir tradition of *Winter's Bone* meets *Breaking Bad*, a savage and beautiful story of a young man seeking redemption—a finalist for the Edgar Award for Best First Novel. The area surrounding Cashiers, North Carolina, is home to people of all kinds, but the world that Jacob McNeely lives in is crueler than most. His father runs a methodically organized meth ring, with local authorities on the dime to turn a blind eye to his dealings. Having dropped out of high school and cut himself off from his peers, Jacob has been working for this father for years, all on the promise that his payday will come eventually. The only joy he finds comes from reuniting with Maggie, his first love, and a girl clearly bound for bigger and better things than their hardscrabble town. Jacob has always been resigned to play the cards that were dealt him, but when a fatal mistake changes everything, he's faced with a choice: stay and appease his father, or leave the mountains with the girl he loves. In a place where blood is thicker than water and hope takes a back seat to fate, Jacob wonders if he can muster the strength to rise above the only life he's ever known. "Remarkable...This isn't your ordinary coming-of-age novel, but with his bone-cutting insights into these men and the region that bred them, Joy makes it an extraordinarily intimate experience."—Marilyn Stasio, *The New York Times Book Review* "Lyrical, propulsive, dark and compelling. Joy knows well the grit and gravel of his world, the soul and blemishes of the place."—Daniel Woodrell
