CALLAHAN WILLIAMS

Growing a Business Penguin

The original *Mid-Course Correction*, published 20 years ago, became a classic in the sustainability field. It put forth a new vision for what its author, Ray C. Anderson, called the “prototypical company of the 21st century”—a restorative company that does no harm to society or the environment. In *Mid-Course Correction*, Anderson recounts his eureka moment as founder and leader of Interface, Inc., one of the world’s largest carpet and flooring companies, and one that was doing business in all the usual ways. Bit by bit, he began learning how much environmental destruction companies like his had caused, prompting him to make a radical change. *Mid-Course Correction* not only outlined what eco-centered leadership looks like, it also mapped out a specific set of goals for Anderson’s company to eliminate its environmental footprint. Those goals remain visionary even today, and this second edition delves into how Interface worked toward making them a reality, birthing one of the most innovative and successful corporate sustainability efforts in the world. The new edition also explores why we need to create not only prototypical companies, but also the prototypical economy of the twenty-first century. As our global economy shifts toward sustainability, challenges like building the circular economy and reversing global warming present tremendous opportunities for business and industry. *Mid-Course Correction Revisted* contains a new foreword by Paul Hawken, several new chapters by Ray C. Anderson Foundation executive

director John A. Lanier, and interviews with Janine Benyus, Joel Makower, Andrew Winston, Ellen MacArthur and other leaders in green enterprise, the circular economy, and biomimicry. A wide range of business readers—from sustainability professionals to green entrepreneurs to CEOs—will find both wise advice and concrete examples in this new look at a master in corporate and environmental leadership, and the legacy he left.

Regeneration Capstone Publishing

'The future can't be predicted but it can be envisioned and brought lovingly into being.' Donella Meadows Like most of us, Damon Gameau has spent most of his adult years overwhelmed into inaction by the problem of climate change and its devastating effects on the planet. But when Damon became a father, he knew he couldn't continue to look away. So he decided to do what he does best, and tell a story. And the story became an imagining of what the world could look like in 2040, if we all decided to start doing things differently, right now. The result is the era-defining documentary *2040 - a meticulously researched plea for the adoption of community-building, energy-generating, connection-forging, forest-renewing, ocean-replenishing measures that science tells us will reset our planet's health, drive our economies and improve lives across the globe.* *2040: A Handbook for the Regeneration* shows us how we can stitch this magnificent vision into everyday life by engaging in activities such as cooking, shopping, gardening, sharing, working and teaching our kids. It shows us that climate change is a practical problem that can be tackled by each of us, one small step at a time, and that we can make a genuine difference - if we know what to do. Brimming with practical

wisdom and even 50 delicious recipes, 2040: A Handbook for the Regeneration empowers you to become the change you want to see in the world. This is a specially formatted fixed-layout ebook that retains the look and feel of the print book. PRAISE FOR THE 2040

DOCUMENTARY '2040 is the Australian documentary everyone's going to be talking about' Mamamia 'even better than That Sugar Film!' Tom Tilley of Triple J's Hack 'In 2040, Gameau defaults to the position of inspiring people rather than alarming or overwhelming them. You leave the film wanting more, not less, of these sorts of productions.' Guardian 'a real glimpse of a greener future' Sydney Morning Herald

The Future Crown Currency

Paul Hawken believes that the impending ecological catastrophe cannot be prevented by individuals - only big business is powerful and influential enough to reverse the present trend. In this book he sets out to show the need for a new relationship between governments and businesses, believing that their present collusion against the public is undemocratic.

Makers Greenleaf Book Group

In the early 1980s, Springfield Remanufacturing Corporation (SRC) in Springfield, Missouri, was a near bankrupt division of International Harvester. Today it's one of the most successful and competitive companies in the United States, with a share price 3000 times what it was thirty years ago. This miracle turnaround is all down to one man, Jack Stack, and his revolutionary system of Open-Book Management, in which every employee understands the company's key figures, can act on them and has a real stake in the business. In Stack's own words: 'When employees think, act and feel like

owners ... everybody wins.' As a management strategy, 'the great game of business' is so simple and effective that it's been taken up by companies from Exxon to The Body Shop and Ben & Jerry's (and possibly even Profile Books). *Lead with We* SAGE

"Updated for its 30th anniversary edition; [This book] remains as relevant as ever."—New York Times Book Review Since its original publication in 1989, *The New Organic Grower* has been one of the most important farming books available, with pioneer Eliot Coleman leading the charge in the organic movement in the United States. Now fully illustrated and updated, this 30th Anniversary Edition is a must-have for any agricultural library. Eliot Coleman's books and innovative methods have helped innumerable organic farmers build successful farms in deep accordance with nature. The wisdom in this seminal book holds true even as the modern agricultural canon has grown—in large part due to Coleman's influence as a wise elder with decades of experience. New information has been included in this edition to showcase the new tools and techniques that Eliot has been developing over the last thirty-five years. Inspired by the European intensive growers, *The New Organic Grower*, 30th Anniversary Edition, offers a very approachable and productive form of farming that has proven to work well for the earth and its stewards for centuries. Gardeners working on 2.5 acres or less will find this book especially useful, as it offers proof that small-scale market growers and serious home gardeners can live good lives close to the land and make a profit at the same time. *The New Organic Grower* is ideal for young farmers just getting started, or gardeners seeking to expand into a more productive

enterprise. New material in this edition includes: Beautiful color photographs throughout, taken by master gardener and author Barbara Damrosch (Eliot's wife and co-farmer) Updated information throughout on how Eliot's practices have changed through his experiments over the years A new section from Damrosch about incorporating flowers on the small farm More information on new tools Eliot has invented that don't appear in any of his other books "I was interested in the environment, farming, science . . . and there was Eliot's book lying on the shelf. I remember grabbing it, and I just FELL IN. . . . I remember reading it like it was the Bible."—Dan Barber, chef

Organizational Physics - The Science of Growing a Business Random House

Seven business innovators and the empires they built. The pre-eminent business historian of our time, Richard S. Tedlow, examines seven great CEOs who successfully managed cutting-edge technology and formed enduring corporate empires. With the depth and clarity of a master, Tedlow illuminates the minds, lives and strategies behind the legendary successes of our times: . George Eastman and his invention of the Kodak camera; . Thomas Watson of IBM; . Henry Ford and his automobile; . Charles Revson and his use of television advertising to drive massive sales for Revlon; . Robert N. Noyce, co-inventor of the integrated circuit and founder of Intel; . Andrew Carnegie and his steel empire; . Sam Walton and his unprecedented retail machine, Wal-Mart.

Traction Penguin

Since the industrial revolution, progress has meant an increase in labour productivity. *Factor Four* describes a new form of progress, resource productivity, a form which meets the overriding imperative for the future (sustainability).

It shows how at least four times as much wealth can be extracted from the resources we use. As the authors put it, the book is about doing more with less, but this is not the same as doing less, doing worse or doing without. In 1972, the Club of Rome published *Limits to Growth*, which sent shock waves around the world by arguing that we were rapidly running out of essential resources. This Report to the Club of Rome offers a solution. It lies in using resources more efficiently, in ways which can already be achieved, not at a cost, but at a profit. The book contains a wealth of examples of revolutionizing productivity, in the use of energy; from hypercars to low-energy beef; materials, from sub-surface drip irrigation to electronic books, transport, video conferencing to CyberTran, and demonstrating how much more could be generated from much less today. It explains how markets can be organized and taxes re-based to eliminate perverse incentives and reward efficiency, so wealth can grow while consumption does not. The benefits are enormous: profits will increase, pollution and waste will decrease and the quality of life will improve. Moreover, the benefits will be shared: progress will no longer depend on making ever fewer people more productive. Instead, more people and fewer resources can be employed. While for many developing countries the efficiency revolution may offer the only realistic chance of prosperity within a reasonable time span. The practical promise held out in this book is huge, but the authors show how it is up to each of us, as well as to businesses and governments, to make it happen.

Scale Clifford Ventures Corp.

Bestselling author Harvey Mackay reveals his techniques for the most

essential tool in business--networking, the indispensable art of building contacts. Now in paperback, *Dig Your Well Before You're Thirsty* is Harvey Mackay's last word on how to get what you want from the world through networking. For everyone from the sales rep facing a career-making deal to the entrepreneur in search of capital, *Dig Your Well* explains how meeting these needs should be no more than a few calls away. This shrewdly practical book distills Mackay's wisdom gleaned from years of "swimming with sharks," including: What kinds of networks exist How to start a network, and how to wring the most from it The smart way to downsize your list--who to keep, who to dump How to keep track of favors done and favors owed--Is it my lunch or yours? What you can do if you are not good at small talk *Dig Your Well Before You're Thirsty* is a must for anyone who wants to get ahead by reaching out.

Annotation Presenting 150 signed entries, this book provides an overview of key principles, approaches, strategies, and tools businesses have used to reduce environmental impacts and contribute to sustainability.

The Magic of Findhorn Simon and Schuster

WALL STREET JOURNAL BESTSELLER
2022 NATIONAL INDIE EXCELLENCE AWARDS FINALIST — BUSINESS: GENERAL • 2022 AXIOM BUSINESS BOOK AWARD GOLD MEDALIST — LEADERSHIP
"Critically important reading as our economy struggles to recover the pandemic's deleterious economic impact that is currently compounded by supply chain issues and the beginnings of an inflationary spiral." —The Midwest Book Review "Provides concrete steps leaders and employees can take to thrive in

today's marketplace, where taking a stand on something important to your customers can become a competitive differentiator." —Forbes Discover an urgent prescription for a new business paradigm—one that better serves humanity and the planet. The global coronavirus pandemic has thrown into stark relief how "business as usual" is no longer serving us. The economic, business, and environmental models of the past do not reflect our current realities. And for our economy—for us—to survive, we need nothing less than a seismic shift in the way we do business. Enter Simon Mainwaring, New York Times-bestselling author and founder and CEO of We First. A decade ago, he showed how business leaders and consumers could use social media to build a better world in *We First*. Now, after decades of research and field experience at the vanguard of the world's most successful brand revolutions, he provides in *Lead With We* a blueprint for doing business better in today's challenged world. By leading with "we"—putting the collective above the individual, holding the sum above the parts, and emphasizing the importance of the role that everyone plays—you can not only help solve the escalating challenges of today but also unlock extraordinary growth for your business, and abundance on our planet. Timely and compelling, this book's message is simple: The future of profit is people's purpose, aligned. *Lead With We* not only examines why we must all conduct business differently in order to grow in today's market, but provides the how—concrete steps any reader, wherever they find themselves in the business hierarchy, can take toward success.

2040: A Handbook for the

Regeneration Lulu.com

There are hidden laws at work in every aspect of your business. Understand them, and you can create extraordinary growth. Ignore them, and you run the risk of becoming another statistic. It's become almost cliché: 8 out of every 10 new ventures fail. Of the ones that succeed, how many truly thrive-for the long run? And of those that thrive, how many continually overcome their growth hurdles ... and ultimately scale, with meaning, purpose, and profitability? The answer, sadly, is not many. Author Lex Sisney is on a mission to change that picture. After more than a decade spent leading and coaching high-growth technology companies, Lex discovered that the companies that thrive do so in accordance with 6 Laws - universal principles that govern the success or failure of every individual, team, and organization.

Growing Influence Do Book Company
George Monbiot's *Heat: How to Stop the Planet from Burning* marks an important moment in our civilization's thinking about global warming. The question is no longer whether climate change is actually happening. The question is what to do about it. Monbiot offers an ambitious and far-reaching program to cut our carbon dioxide emissions to the point where the environmental scales start tipping away from catastrophe. (But not before he devotes a chapter to unmasking the vested interests that have spent fortunes funding the specious science of the climate change deniers.) It now seems certain that we need a 90% cut in our emissions by 2030 to prevent runaway climate change from taking place. For the first time, this book explains how the cut could be achieved without bringing industrial civilisation to an end. Combining his unique knowledge

of political campaigning and environmental science, Monbiot analyses the potential of energy efficiency, renewable resources, carbon burial, nuclear power and new transport and building systems to discover what works, what doesn't, what costs the least and what needs to be done to make change happen. He is not afraid to attack anyone—friend or foe—whose claims are false or whose figures have been fudged. His original, sometimes shocking programme shows that we can reconcile our demands for comfort and security with the survival of the biosphere. Rigorous, passionate and totally surprising, this book could change the world. It is possible to slow the momentum of this global crisis—if we act decisively. In this riveting, fiery book, the No Logo of the environmental movement, George Monbiot shows us how.

Green Capitalism. the God That Failed MIT Press

There are no more reepected voices in the environmental movement than these authors, true counselors on the direction of twenty-first-century business. With hundreds of thousands of books sold worldwide, they have set the agenda for rational, ecologically sound industrial development. In this inspiring book they define a superior & sustainable form of capitalism based on a system that radically raises the productivity of nature's dwindling resources. *Natural Capitalism* shows how cutting-edge businesses are increasing their earnings, boosting growth, reducing costs, enhancing competitiveness, & restoring the earth by harnessing a new design mentality. The authors offer dozens of examples of businesses that are making fourfold or even tenfold gains in efficiency, from self-heating & self-

cooling buildings to 200-miles-per-gallon cars, while ensuring that workers aren't downsized out of their jobs. This practical blueprint shows how making resources more productive will create the next industrial revolution

Cannibals with Forks Crown Currency Leadership is about influence Emily is a career-driven thirtysomething with big ambitions and a young family. She is making an impact as a leader at a tech company, but after being passed up for multiple promotions, she finds herself at a loss for how to improve. Fate answers her in the form of a kind—and surprisingly direct—older man in a coffee shop. A well-respected CEO before he retired, David has deep and rich leadership knowledge. Emily needs direction, and David is the perfect mentor. Growing Influence offers readers both practical advice on how to develop leadership skills and a relatable account of one woman's growth by applying the principles in the book. Unlike nonfiction business books or business memoirs, this story is a business fable that is both impactful and transformative.

Mid-Course Correction Revisited Anchor Canada

Thousands of business books are published every year— Here are the best of the best After years of reading, evaluating, and selling business books, Jack Covert and Todd Sattersten are among the most respected experts on the category. Now they have chosen and reviewed the one hundred best business titles of all time—the ones that deliver the biggest payoff for today's busy readers. The 100 Best Business Books of All Time puts each book in context so that readers can quickly find solutions to the problems they face, such as how best to spend The First 90 Days in a new job or how to take their company from

Good to Great. Many of the choices are surprising—you'll find reviews of Moneyball and Orbiting the Giant Hairball, but not Jack Welch's memoir. At the end of each review, Jack and Todd direct readers to other books both inside and outside The 100 Best. And sprinkled throughout are sidebars taking the reader beyond business books, suggesting movies, novels, and even children's books that offer equally relevant insights. This guide will appeal to anyone, from entry-level to CEO, who wants to cut through the clutter and discover the brilliant books that are truly worth their investment of time and money.

Explosive Growth Routledge

3D Robotics co-founder and bestselling author Chris Anderson takes you to the front lines of a new industrial revolution as today's entrepreneurs, using open source design and 3-D printing, bring manufacturing to the desktop. In an age of custom-fabricated, do-it-yourself product design and creation, the collective potential of a million garage tinkerers and enthusiasts is about to be unleashed, driving a resurgence of American manufacturing. A generation of "Makers" using the Web's innovation model will help drive the next big wave in the global economy, as the new technologies of digital design and rapid prototyping gives everyone the power to invent--creating "the long tail of things".

Lean Solutions BenBella Books

A radically new understanding of and practical approach to climate change by noted environmentalist Paul Hawken, creator of the New York Times bestseller Drawdown Regeneration offers a visionary new approach to climate change, one that weaves justice, climate, biodiversity, equity, and human dignity into a seamless tapestry of

action, policy, and transformation that can end the climate crisis in one generation. It is the first book to describe and define the burgeoning regeneration movement spreading rapidly throughout the world. Regeneration describes how an inclusive movement can engage the majority of humanity to save the world from the threat of global warming, with climate solutions that directly serve our children, the poor, and the excluded. This means we must address current human needs, not future existential threats, real as they are, with initiatives that include but go well beyond solar, electric vehicles, and tree planting to include such solutions as the fifteen-minute city, bioregions, azolla fern, food localization, fire ecology, decommodification, forests as farms, and the number one solution for the world: electrifying everything. Paul Hawken and the nonprofit Regeneration Organization are launching a series of initiatives to accompany the book, including a streaming video series, curriculum, podcasts, teaching videos, and climate action software. Regeneration is the inspiring and necessary guide to inform the rapidly spreading climate movement.

How to Prepare for Climate Change
Penguin

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects

include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

The Carbon Farming Solution New Society Publishers

How we can achieve healthy growth--more regenerative than destructive, restoring equity rather than exacerbating inequalities. In *Tomorrow's Economy*, Per Espen Stoknes reframes the hot-button issue of economic growth. Going beyond the usual dialectic of pro-growth versus anti-growth, Stoknes calls for healthy growth. Healthy economic growth is more regenerative than destructive, repairs problems rather than greenwashing them, and restores equity rather than exacerbating global inequalities. Stoknes--a psychologist, economist, climate strategy researcher, and green-tech entrepreneur--argues that we have the tools to achieve healthy growth, but our success depends on transformations in government practices and individual behavior. Stoknes provides a compass to guide us toward the mindset, mechanisms, and possibilities of healthy growth.

The New Organic Grower Harvard Business Press

With more than 45,000 sold since 1989, *The New Organic Grower* has become a modern classic. In this newly revised and expanded edition, master grower Eliot

Coleman continues to present the simplest and most sustainable ways of growing top-quality organic vegetables. Coleman updates practical information on marketing the harvest, on small-scale equipment, and on farming and gardening for the long-term health of the soil. The new book is thoroughly updated, and includes all-new chapters such as: *Farm-Generated Fertility*—how to meet your soil-fertility needs from the resources of your own land, even if manure is not available. *The Moveable Feast*—how to construct home-garden and commercial-scale greenhouses that can be easily moved to benefit plants and avoid insect and disease build-up. *The Winter Garden*—how to plant, harvest, and sell hardy salad crops all winter long from unheated or minimally heated greenhouses. *Pests*—how to find "plant-positive" rather than "pest-negative" solutions by growing healthy, naturally resistant plants. *The Information Resource*—how and where to learn what you need to know to grow delicious organic vegetables, no matter where you live. Written for the serious gardener or small market farmer, *The New Organic Grower* proves that, in terms of both efficiency and profitability, smaller can be better.
