Figurative Language
Multilingual Matters
Language is a symbolic
system of meanings
evoked by linguistic

forms. The choice of
forms in
communication is non-
arbitrary. Rather,
speakers pick those
forms whose meanings
best convey their
discourse intention.
The meaning of the
Mandarin ba-

construction, argues Jing-Schmidt, is discourse dramaticity, a concept that includes high conceptual salience and subjectivity. The ba-construction and its "syntactic variations" are never interchangeable because contrast in their meanings determines difference in their functions. Quantitative analyses based on authentic data validate the postulation of discourse dramaticity. By taking discourse pragmatics seriously, the dramaticity hypothesis enables a unitary explanation that transcends sentence grammar. The diachronic treatment reveals the syntactic change of the ba-construction as an adaptive process of

pragmatization, which raises the issue of linguistic evolution as a result of socio-cultural development. This book will be of particular value to readers interested in the interaction between grammar and pragmatics and to teachers confronting the controversy of the ba-construction in foreign language pedagogy.

 My new friends have begun to suspect I haven't told them the full story of my life.
 "Why did you leave Sierra Leone?"
 "Because there is a war." "You mean, you saw people running around with guns and shooting each other?"
 "Yes, all the time."
 "Cool." I smile a little.
 "You should tell us about it sometime."
 "Yes, sometime." This is how wars are fought now: by children, hopped-up on drugs and wielding AK-47s. Children have become soldiers of choice. In the more than fifty conflicts going on worldwide, it is estimated that there are some 300,000 child soldiers. Ishmael Beah

used to be one of them. What is war like through the eyes of a child soldier? How does one become a killer? How does one stop? Child soldiers have been profiled by journalists, and novelists have struggled to imagine their lives. But until now, there has not been a first-person account from someone who came through this hell and survived. In *A Long Way Gone*, Beah, now twenty-five years old, tells a riveting story: how at the age of twelve, he fled attacking rebels and wandered a land rendered unrecognizable by violence. By thirteen, he'd been picked up by the government army, and Beah, at heart a gentle boy, found that he was capable of truly

terrible acts. This is a rare and mesmerizing account, told with real literary force and heartbreaking honesty. [Annual Report of the President of Harvard University to the Overseers on the State of the University for the Academic Year ...](#) John Benjamins Publishing
Delving into the tangled involvement of academic institutions with the benefice system in the Early Modern Period, this book focuses on an anomaly: medieval privileges that provided academics at Louvain, the self-declared storm-troopers of Catholic and dynastic restoration in the Netherlands, with access to the Post-Tridentine clerical job market. Despite their

anachronistic flavour in a regional job market characterised by its openness for graduates, these privileges were considered vital for the survival of the university and of Catholicism. This conundrum, addressed via the analysis of the privileges and the conflicts they provoked in Louvain colleges, local church administrations, Brussels secretariats and Roman palaces during the archducal period (1588/1598-1621/1625), leads to refreshing explorations of a fabric of Academia in the making and of the multiple worlds of early modern Catholicism. This book helps you to

reexamine your “waiting room” experience. The passages will reiterate you are worthy of God’s promises. It screams, you are a winner. You are a success. Mistakes are made, however; failure is not in your DNA. You are a child of an omnipotent God. You exude victory. It will leave you feeling you can conquer the world through the word of God and through the author’s journey of infertility. The question is, “Are you ready?” I sure hope so. If you aren’t, get ready; because you are next. It’s your turn. The wait is over. Isaiah 40:31 – But they that wait upon the Lord shall renew their strength; they shall mount up with wings as eagles; they shall run, and not be

weary; and they shall walk, and not faint.

The opening volume in the New York Times bestselling *Testing* trilogy. In Cia's dystopian society, it's an honor to be chosen for *The Testing*. But it's not enough to pass the Test. Cia will have to survive it. It's graduation day for sixteen-year-old Malencia Vale, and the entire Five Lakes Colony (the former Great Lakes) is celebrating. All Cia can think about—hope for—is whether she'll be chosen for *The Testing*, a United Commonwealth program that selects the best and brightest new graduates to

become possible leaders of the slowly revitalizing post-war civilization. When Cia is chosen, her father finally tells her about his own nightmarish half-memories of *The Testing*. Armed with his dire warnings ("Cia, trust no one"), she bravely heads off to Tosu City, far away from friends and family, perhaps forever. Danger, romance—and sheer terror—await. "The *Testing* is a chilling and devious dystopian thriller that all fans of *The Hunger Games* will simply devour. Joelle Charbonneau writes with guts and nerve but also great compassion and heart. Highly recommended."—Jonathan Maberry, New York Times bestselling author of *Rot & Ruin*

and Flesh & Bone The Testing trilogy is: The Testing Independent Study Graduation Day The National Cyclopaedia of American Biography Simon and Schuster This book contributes to growing debates on transcreation, applying an appraisal framework to texts from luxury brands in Chinese and English to reveal new insights into marketing transcreation and set out transcreation as an area of study in its own right. The volume charts the origins of the term "transcreation", emerging from the interplay of established concepts of translation, creation, localisation, and adaptation and ongoing debates on what should be transcreated and how. Using these dialogues

as a point of departure, Ho outlines a way forward for transcreation research by advocating for the use of an appraisal framework, taken from work in systemic functional linguistics and employed to evaluate persuasion in language. In focusing on marketing texts from the websites of three luxury brands in English and Chinese, the book explores how this approach can surface fresh perspectives on the different ways in which the processes and practices of marketing transcreation are used to generate persuasion across languages. The volume looks ahead to the implications for other language pairs and the applications of the appraisal framework to

understand transcreation practice of other genres, such as literary texts. This book will be of interest to students and scholars in translation studies and marketing studies.

We use social media to facilitate the process of communication. But how well do we concisely communicate our messages and feelings? There are certain drawbacks to new-age technologies, especially due to the need for conciseness. The written word has always carried the meaning and essence of thoughts and feelings that we strive to convey. Similes, metaphors, and sayings from regional

areas and time periods specifically carry more meanings than the mere word itself. The 2,300 idioms or sayings in this book convey a meaning that connects generation to generation in the south of our country. Meet the family members that communicated daily and shared their stories using this unique language that is colorful and historical. My aunt, Arlie Wilder, used to say that she hated to see a woman grinning and laughing out loud with her mouth open like "Jenny eatin' saw briars." I hope you find yourself laughing like that as you read.

It is clear that a proper understanding of what academic English is and how to use it is crucial for success in college, and yet students face multiple obstacles in acquiring this new 'code', not least that their professors often cannot agree among themselves on a definition and a set of rules. Understanding Language Use in the Classroom aims to bring the latest findings in linguistics research on academic English to educators

from a range of disciplines, and to help them help their students learn and achieve. In this expanded edition of the original text, college educators will find PowerPoint presentations and instructor materials to enhance the topics covered in the text. Using these additional resources in the classroom will help educators to engage their students with this crucial, but frequently neglected, area of their college education; and to inform students about the unexamined linguistic assumptions we all hold, and that hold us back. You can find additional materials on the Resources tab of our website.

This lively introduction to figurative language explains a broad range of concepts, including metaphor, metonymy, simile, and blending, and develops new tools for analyzing them. It coherently grounds the linguistic understanding of these concepts in basic cognitive mechanisms such as categorization, frames, mental spaces, and viewpoint; and it fits them into a consistent framework which is applied to cross-linguistic data and also to figurative structures in gesture and the visual arts. Comprehensive and practical, the book includes analyses of figurative uses of both word meanings and linguistic constructions.

- Provides definitions of major concepts •

Offers in-depth analyses of examples, exploring multiple levels of complexity •

- Surveys figurative structures in different discourse genres •
- Helps students to connect figurative usage with the conceptual underpinnings of language •
- Goes beyond English to explore cross-linguistic and cross-modal data

In recent years, the news media has directed a significant amount of attention to the effect of globalization on the second most populous nation in the world: India. With the emergence of new economic opportunities and the influx of foreign popular culture and commodities, India has experienced an

enormous sea of change in the last few decades. In *Decolonizing Psychology: Globalization, Social Justice, and Indian Youth Identities*, author Sunil Bhatia focuses on the psychological tensions that these changes have brought upon Indian youth today. Drawing on dozens of interviews, Bhatia offers readers a compelling glimpse and analysis of how these youth populations are engaging with the emerging presence of globalization in their day-to-day lives. As Bhatia explains, young Indians use the term 'world class selves' as a way to identify and describe the ways in which globalization has strengthened their standing in the world.

By frequenting urban cafes and bars, watching American television and cinema, traveling abroad, and regularly consuming foreign commodities, Indian youth absorb the westernized culture and view themselves as peers to their western counterparts. At the same time, however, these young Indians proudly hold onto their homeland's traditions governing family and religious values. With remarkable clarity and nuance, Bhatia sheds an important light on the universalizing power and the colonizing dimensions of Euro-American psychology. By integrating insights from postcolonial, narrative, and cultural psychologies to explore how Euro-American

scientific psychology became the standard approach, Bhatia reminds readers of whose stories are not being told, what knowledge is not being considered, and whose lives are not included in the central understanding of psychology today.
