 In 2005 the CoastGIS symposium and exhibition was once again held in Aberdeen, Scotland, in the UK, the second time that we have had the privilege host this international event in the city of Aberdeen. This was the 6th International Symposium Computer Mapping and GIS for Coastal Zone Management, a collaboration between the International Cartographic Association's (ICA) Commission on Marine Cartography, and the International Geographical Union's (IGU) Commission on Coastal Systems. The theme for 2005 was: Designing and Building a Marine and Coastal Spatial Data Infrastructure. As a major coastal event, the CoastGIS series of conferences always attracts an international audience of coastal researchers, managers, and practitioners who use one or more of the geospatial technologies (e. g. GIS, GPS, digital mapping, remote sensing, databases, and the Internet) in their work. The CoastGIS series is fundamentally an international event which over the years has gained a strong following attracting delegates from around the globe. Hosted by the University of Aberdeen - at the Aberdeen Exhibition and Conference Centre (AECC) - once again CoastGIS 2005 provided an opportunity to communicate the results of a wide range of innovative scientific research into coastal and marine applications of the geospatial technologies, including remote sensing, Geographical Information Systems (GIS), Global Positioning Systems (GPS), databases, data models, the Internet and online mapping systems.

 Edit video like a pro! "Save it in the edit" is a common saying

among film professionals. Editing makes the difference between boring vacation movies and exciting travelogues...between the whole dull news conference and the highlights on the evening news. Whether you're a budding Spielberg, a proud parent who wants two-year-old Junior's every feat documented for posterity, or a band that wants your music video to rock, *Final Cut Pro HD For Dummies* tells you what you need to know to edit regular digital or high definition video like a pro. It covers the basics of capturing, importing, and editing digital videos, with detailed how-to for: Organizing your media Navigating the audio and video Timeline tracks and selecting clips and frames on the Timelines Getting fancier with split, roll, ripple, slip, and slide edits Working with audio, including mixing, editing out scratches and pops, and using filters to create effects Using Soundtrack to compose a musical score, even if you don't know the difference between horns and strings Apply transitions such as 3D simulation, dissolve, iris, stretch and squeeze, and more Adding text for captions, opening titles, and closing credits Color-correcting video Compositing, rendering, and outputting your final product to tape, CD, DVD, or the Web Three bonus chapters online go into more depth about rendering, customizing the interface, and managing media so you can refine your skills even further. *Final Cut Pro HD For Dummies* was written by Helmut Kobler, a Los Angeles-based filmmaker, owner of K2Films, and a frequent contributor to *Macaddict Magazine*. Having this book next to your editing equipment is the next best thing to having him sit next to you and guide you through the editing process.

 Rapid and intensive changes in the information landscape cause changes in social relationships and, consequently, in relations

between generations. Within their social role libraries should work actively to reduce age segregation and isolation, and build cohesive society through intergenerational services and programmes. The authors speak about the intergenerational dialogue in libraries - theories, research and practice - and about reading as a link between generations, thus offering to libraries strategies for establishing social cohesion.
