KELLEY DOYLE

Iron and Steel Engineer CRC Press

This book focuses on Chinese cases on the CISG decided by Chinese courts of all levels, mainly from 1990 to 2005. During this period, the number of cases grew gradually. The total number of cases remained low, the reasons of which might be the following: parties were not familiar with the CISG hence decided to opt out of it; the case collection and report systems in China at that time were not as developed as now rendering many cases inaccessible. This book deals with the cases in the early days of the development of the CISG in China. These cases reflect how People's Court of all levels started to deal with various issues arising from the CISG and will help understand whether and how the People's Courts change their approaches to the interpretation and application of the CISG in the future.

Blockchain and distributed ledger technology (DLT) have been identified as emerging technologies

that can enhance global supply chain management processes. Given the embryonic nature of the technology, use cases pertaining to how it can be adopted and deployed in supply chain contexts are scarce. This book shares blockchain supply chain use cases across a range of industries including smart cities, food imports, product traceability, decentralised finance, procurement, energy management, consensus mechanism security, and industry 4.0. Given its scope, it is primarily intended for academics, students, researchers, and practitioners who want to learn more about how blockchain can digitally transform global supply chains.

Who Owns Whom SignalComputerworldFor more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.China's Assistance Program in Xinjiang

This book builds on the analyses of Eugene and Howard Odum and introduces the concept of systems ecology. Ecological emery accounting represents a breakthrough because it allows researchers to integrate man-made capital and natural capital so that human and natural concerns

can be addressed using a consistent system of units. This book develops an emery accounting model that is suitable for describing urban systems, thereby providing a comprehensive picture of those systems. To make the theory concrete, the authors use China's Macao Special Administrative Region as a case study, and compare the results for Macao with those of other urban ecosystems around the world in the fields of ecological economy, tourism, waste treatment, gambling industry, land reclamation and resource consumption etc. Dr. Kampeng Lei is an advisory senior technician at the Environmental Protection Bureau, Government of Macao, China; Shaoqi Zhou is a professor at the College of Environment and Energy, the South China University of Technology, and the Guizhou Academy of Sciences, China; Zhishi Wang is a professor at the Faculty of Science and Technology, the University of Macau, China.

Advances in Blockchain Technology for Cyber Physical Systems Cambridge University Press
 The European Competition Law Annual 2003 is the eighth in a series of volumes following the annual workshops on EU Competition Law and Policy held at the Robert Schuman Centre of the European University in Florence. The volume reproduces the materials of the roundtable debate that took place at the eighth Workshop and is dedicated to the question What is an Abuse of a

Dominant Position?. It contains the usual mix of expert discussion and expert papers presented by the participants at this annual gathering of leading EU and international experts on competition law.

Schemes of Arrangement IGI Global

The Guidelines for the Assessment of General Damages are designed to provide a clear and logical framework for the assessment of damages in personal injury cases. The first edition of this title was regarded as a landmark in personal injury practice. Each succeeding issue has built on this reputation and the book has now firmly established itself as essential reading for all those involved in the area of personal injury litigation. This new edition has updated the award figures to take into account the rise in inflation. The book also considers a small number of decisions concerning damages for sexual abuse, including image based abuse, since the previous edition. This book is edited by a working party of the Judicial College, under the chairmanship of The Hon. Mrs Justice Lambert DBE. The members of the working party are all lawyers and personal injury specialists: Stuart McKechnie KC, barrister; Steven Snowden KC, barrister; Lisa Sullivan, Master of the Queen's Bench Division; and Richard Wilkinson, barrister.

Towards a Sustainable European Company Law Oxford University Press

This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming services and businesses in the 21st century. "What is the direction of the business innovation using new ICT?" is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

Blockchain in Supply Chain Digital Transformation IAS EXAM PORTAL

Article 38 of the Statute of the International Court of Justice defines "international law" to include not only "custom" and "convention" between States but also "the general principles of law recognized by civilized nations" within their municipal legal systems. In 1953, Bin Cheng wrote his seminal book on general principles, identifying core legal principles common to various domestic legal systems across the globe. This monograph summarizes and analyzes the general principles of law and norms of international due process, with a particular focus on developments since Cheng's writing. The aim is to collect and distill these principles and norms in a single volume as a practical resource for international law jurists, advocates, and scholars. The information contained in this book holds considerable importance given the growth of inter-state intercourse resulting in the increased use of general principles over the past 60 years. General principles can serve as rules of decision, whether in interpreting a treaty or contract, determining causation, or ascertaining unjust enrichment. They also include a core set of procedural requirements that should be followed in any adjudicative system, such as the right to impartiality and the prohibition on fraud. Although the general principles are, by definition, basic and even rudimentary, they hold vital importance for the rule of law in international relations. They are meant not to define a rule of law, but rather the rule

of law.

Agribusiness and Rural Enterprise Project Analysis Manual Oxford University Press

This book examines how face recognition technology is affecting privacy and confidentiality in an era of enhanced surveillance. Further, it offers a new approach to the complex issues of privacy and confidentiality, by drawing on Joseph K in Kafka's disturbing novel *The Trial*, and on Isaiah Berlin's notion of liberty and freedom. Taking into consideration rights and wrongs, protection from harm associated with compulsory visibility, and the need for effective data protection law, the author promotes ethical practices by reinterpreting privacy as a property right. To protect this right, the author advocates the licensing of personal identifiable images where appropriate. The book reviews American, UK and European case law concerning privacy and confidentiality, the effect each case has had on the developing jurisprudence, and the ethical issues involved. As such, it offers a valuable resource for students of ethico-legal fields, professionals specialising in image rights law, policy-makers, and liberty advocates and activists.

General Principles of Law and International Due Process Springer Nature

"This book presents a wide range of issues and challenges related to business process reengineering technologies and systems through the use of case studies"--Provided by publisher. *UPSC MAINS GENERAL STUDIES SOLVED PAPERS (2008-2022) PDF* American Bar Association Cases and Materials in Company Law is well-established as the best casebook on company law available. It covers all vital cases and combines sophisticated commentary with well-chosen notes and questions. This edition retains the original successful structure and style, whilst being fully updated to reflect changes following the Companies Act 2006.

Text, Cases and Materials on Public Law and Human Rights Bloomsbury Publishing

Schemes of arrangement are an important and flexible mechanism, which can be used to reorganise a company's capital. Schemes have undergone a renaissance over the last twenty years, particularly as a debt restructuring device in the aftermath of the 2008 financial crisis when companies and their advisors have needed to develop effective tools for dealing with financial distress. The COVID-19 pandemic has provided a further incentive for jurisdictions to ensure that they have an effective debt restructuring mechanism in place. Schemes have also become the mechanism of choice for recommended takeovers. This book performs a critical, contextual and comparative analysis of schemes and their uses, examines recent developments in this area, including the Corporate Insolvency and Governance Act 2020, and considers whether further reform is needed to ensure that schemes continue to develop as an indispensable tool for companies for the future.

Case Studies in Science Education: Design, overview, and general findings Elsevier

In *General Principles of Law in Investment Arbitration*, the authors address selected general principles of law, assessing their functions in investment arbitration. The resulting picture is that of a lively source that escapes doctrinal straitjackets and maintains its relevance.

Operational Oceanography Springer Nature

Artificial intelligence (AI) is becoming a reality for pioneering organizations while they are facing complex and multifaceted aspects of business sustainability with ambiguous and changing ethical norms and vague or nonexistent legislation. The first quarter of the 21st century was identified as the beginning of the continuous, ongoing, and accelerating wave of simultaneous general purpose technologies revolutions causing accelerated shrinkage of the half-life of knowledge. Cases on *Enhancing Business Sustainability Through Knowledge Management Systems* presents teaching case studies exploring the formulation and implementation of knowledge management systems (KMS) in organizations. Covering topics such as automation, machine learning, and socio-ecological innovation, this case book is an essential resource for business leaders and managers, IT managers, entrepreneurs, government officials, computer scientists, students and educators of higher education, librarians, researchers, and academicians.

Transfer of Technology by Multinational Corporations: A synthesis and country case study Springer

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application.

The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

China's Assistance Program in Xinjiang Springer Nature

The Cyber-Physical System (CPS) relates to many other popularized technologies such as Internet of Things (IoT, IIoT), Machine-to-Machine (M2M), Industry 4.0, which describe a vision of connected creations that deeply unite the physical and information domains. As a revolutionary technology, Blockchain (BC) provides a practical solution to enable a secure and decentralized public ledger that a huge plethora of exciting new technology applications in several areas, such as the Internet of Things (IoT), Cyber-Physical Systems, Manufacturing, Supply-Chain, etc. Blockchain technology has infiltrated all areas of our lives, from manufacturing to healthcare and beyond. In this context, this book helps discover the various potential applications that could be fruitful for cyber-physical system applications. It provides a sampling of recent advances and ideas on research progress and the practical usage of blockchain technologies in addressing cyber-physical systems challenges and issues. It provides a sampling of recent advances and views on research progress and the practical usage of blockchain technologies in addressing cyber-physical systems challenges and issues.

Annals of Cases on Information Technology provides a collection of case studies focusing on IT implementation in organizations. The cases included in Volume VI describe successful projects and offer advice on how to achieve these best practices. They also look at IT project failures and describe steps to avoid pitfalls in the path to successful IT utilization. The organizations described in this book represent small businesses, educational institutions, public and private corporations and describe many aspects of IT implementation including, e-commerce endeavors, intelligent technologies, enterprise resource planning and many other facets of emerging IT utilization.

Selected Chinese Cases on the UN Sales Convention (CISG) Vol. 1 Routledge

No one doubts any longer that sustainable development is a normative imperative. Yet there is unmistakably a great reluctance to acknowledge any legal basis upon which companies are obliged to forgo 'shareholder value' when such a policy clearly dilutes responsibility for company action in the face of continuing environmental degradation. Here is a book that boldly says: 'Shareholder primacy' is wrong. Such a narrow, short-term focus, the author shows, works against the achievement of the overarching societal goals of European law itself. The core role of EU company and securities law is to promote economic development, notably through the facilitation of market integration, while its contributory role is to further sustainable development through facilitation of the integration of economic and social development and environmental protection. There is a clear legal basis in European law to overturn the poorly substantiated theory of a 'market for corporate control' as a theoretical and ideological basis when enacting company law. With rigorous and persuasive research and analysis, this book demonstrates that: European companies should have legal obligations beyond the maximization of profit for shareholders; human and environmental interests may and should be engaged with in the realm of company law; and company law has a crucial role in furthering sustainable development. As a test case, the author offers an in-depth analysis of the Takeover Directive, showing that it neither promotes economic development nor furthers the integration of the economic, social and environmental interests that the principle of sustainable development requires. This book goes to the very core of the ongoing debate on the function and future of European company law. Surprisingly, it does not make an argument in favour of changing EU law, but shows that we can take a great leap forward from where we are. For this powerful insight - and the innumerable recognitions that support it - this book is a timely and exciting new resource for lawyers and academics in 'both camps': those on the activist side of the issue, and those with company or official policymaking responsibilities.
