Speech and language impairment can have a huge impact on cognitive development. Identifying what is going wrong - and what effective intervention looks like - can be daunting. Short of retraining you as a speech and language therapist, this thorough guide will give you everything you need to change that. An essential resource, the book contains a wide variety of online resources, including

phonological and sound awareness documents, assessment tools, and recording forms that can be downloaded straight to your device, providing excellent materials and activities to use in the classroom. Written by speech and language therapists and designed exclusively for Early Years practitioners, this book provides a complete overview of how children acquire language and what language impairments look like at this age. You will find both strategic and practical advice on how to manage and encourage the development of speech and language skills. Creating the optimum communication environment for every

child in your setting is an important part of what the book offers. Equally, practitioners are supported to be able to recognise the features of specific language difficulties such as Developmental Language Disorder (DLD) and feel confident to intervene when children are struggling.

Cambridge University Press
Teaching English to the World: History, Curriculum, and Practice is a unique collection of English language teaching (ELT) histories, curricula, and personal narratives from non-native speaker (NNS) English teachers around the world. No other book brings such a range of international ELT professionals together to describe and narrate what they know best. The book includes chapters from Brazil, China, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Japan, Lebanon, Poland, Saudi Arabia, Singapore, Sri Lanka, and Turkey. All chapters follow a

consistent pattern, describing first the history of English language teaching in a particular country, then the current ELT curriculum, followed by the biography or the autobiography of an English teacher of that country. This consistency in the structuring of chapters will enable readers to assimilate the information easily while also comparing and contrasting the context of ELT in each country. The chapter authors--all born in or residents of the countries they represent and speakers of the local language or languages as well as English--provide insider perspectives on the challenges faced by local English language teachers. There is clear evidence that the

majority of English teachers worldwide are nonnative speakers (NNS), and there is no doubt that many among them have been taught by indigenous teachers who themselves are nonnative speakers. This book brings the professional knowledge and experience of these teachers and the countries they represent to a mainstream Western audience including faculty, professionals, and graduate students in the field of ESL; to the international TESOL community; and to ELT teachers around the world.
