CoRT 5 is concerned with eliciting information and assessing it. Some of the lessons are concerned with specific tools while others are concerned with encouraging awareness of different aspects of information. Values and emotions determine the outcome of our thinking. The purpose of these lessons is to arrange the world in our minds so that we can apply values and emotions effectively.

Methods of Social Research Routledge

The Social Media Handbook explores how social media are changing disciplinary understandings of the internet and our everyday lives. In addition to person-to-person social networking services like Facebook and Twitter, this volume considers a broad range of networked information services that support in-depth

social interaction, community formation, and collaboration in the Web 2.0 era. Rather than considering social media in terms of specific technologies, the chapters in this book engage topics across a range of research, techniques, practices, culture and society, and theories. These broader topics—including community, gender, fandom, disability, and journalism—are entryways through which students and faculty can explore ways of thinking about social media and find new paradigms for analysis. Meet My Grandparents Zondervan

Astatine is - besides radon and francium - the only natural radioelement which only has short-lived isotopes, thereby excluding experiments with "weighable" amounts of the element. This implies that all available data on physics and chemistry of this element are based on experiments on the tracer scale with 10- to 10- g - and this will also not change in future because no longer-lived isotopes as yet known are to be expected. Due to the fact that the only isotope of At occurring in the natural decay series, ^{219}At , results from the 0.005% α -branching of ^{223}Fr which itself is produced by the only 1.38% α -branching of ^{227}Ac - a member of the ^{235}U series - there is no chance to recover substantial amounts of ^{219}At from natural sources for scientific research of At. All studies, therefore, are being done with the isotopes ^{209}At to ^{211}At having half-lives in the few hours region and being obtained by irradiation of bismuth with α -particles via (α, xn) reactions or by proton irradiation of heavy elements via spallation reactions. The mostly used isotope is ^{211}At with a half-life of 7.22 h. The fast separation of the obtained At isotopes is no very difficult procedure and is either being done by wet adsorption-precipitation techniques or making use of its high volatility by distilling in air.

Thinking Through Geography Rourke Publishing (FL)

Thanks to the Internet, it has never been so easy to become the person of your wildest dreams. Immersive 3D worlds such as

Second Life and THERE.com provide an escape route from the ordinary, into a virtual world where you have the power to mould your life in any way you please. Forget about walking, wheelchair users can fly. Pensioners wipe away the pains of age, discovering youthful exuberance and making young friends once more. No wonder it has become harder than ever to honestly answer the question: who am I? In *Being Virtual*, Davey Winder looks at how an increasing number of us are living part-real, part-virtual lives, and how it affects who we are. He looks at the opportunities and dangers that a virtual identity offers us, how we juggle our real and online lives, and what happens when one spills over into the other... He uses his own personal experiences to bring the issues to life, and backs them up with the real-life stories of others and testimony from the experts. Along the way, he looks at some fascinating questions such as: Are you a virtual liar? What happens when our virtual and real worlds collide? Why will you talk to anyone online, but nobody on the train to work? Why do so many middle-aged men transform into teenage girls online? Is it possible to have any secrets in such a connected world? *Being Virtual* gives a glimpse into the future of human identity, and is a must-read for anyone who uses the Internet to enhance - or escape from - their 'ordinary' life. About the author Davey Winder has been a freelance journalist for 16 years, and is Contributing Editor of the best-selling IT magazine, PC Pro. He has picked up many awards including Technology Journalist of the Year and IT Security Journalist of the Year. A founder member of the Internet Society of England and author of more than 20 books, his blog can be found at: <http://happygeeknewmedia.blogspot.com/>

Honey for a Child's Heart McGraw-Hill Education (UK)

Examines the stress in teaching multidisciplinary concept broad enough to include physiological, psychological, organisational and legal perspectives. The editors see stress in teaching as an interactionist concept - a complex and sometimes precarious balance between perceived work pressures, coping strategies and stress reactions. The early chapters in the book reflect this view and make contributions to understanding the causes and costs of stress in teaching. The authors of these chapters come, collectively, to the conclusion that there is an alarmingly low level of job satisfaction in teaching and that turnover intentions appear to be on the increase. This pessimistic view is challenged in later chapters by professionals working in the field of stress management. These contributions highlight the danger of focusing stress research and management strategies on the individual rather than the organization, and report the authors' "hands on" knowledge of teacher support teams and workshop and whole-school approaches to diminishing the causes and costs of teacher stress and improving training and career development. The concluding chapters demonstrate the editors' belief that useful insights for workers in the education service can be gained from studies of workplace stress in other occupations.

One stormy night, five stranded schoolchildren uncover the story of Richard Clayton Harwick – a boy who many years ago learned what it was like to have a truly wicked stepfather. But the children have stories of their own step-parents to tell – stories that have warmth and humour, as well as sadness, and a fair share of happy endings. 'For children who have some similar experience, this novel will be therapeutic; for those who haven't it's an absorbing read, to make them laugh and cry' Sunday Telegraph.

Improving Reading in Every Class OECD Publishing

"A straightforward, practical guide that takes an anyone-can-do-this approach" (Kirkus Reviews), *The Brainy Bunch* outlines the Harding family's well-rounded method for producing college-ready kids by age twelve. Having six out of ten kids go to college is no small feat on its own, but having six kids in college before their teens—that's nothing short of incredible. "Never judgmental and not without humor," this "fascinating read" (Library Journal) is Kip and Mona Lisa Harding's story of producing exactly those extraordinary results. Kip and Mona Lisa are parents to an engineer (who earned her BS in mathematics at seventeen), an architect (who became the youngest member of the American Institute of Architects), a Navy physician (who earned her biology degree at seventeen), an entrepreneur (who earned an MS in computer science at seventeen), a sixteen-year-old college senior studying music theory and performance, a thirteen-year-old Middle Ages scholar with the highest average in his college class, and four others who are following fast in their siblings' footsteps! No wonder the family is so used to being asked: How did you do it? In an "impressive" (Publishers Weekly), down-to-earth narrative, Kip and Mona Lisa reveal with warmth and humility the strategies behind their family's amazing educational accomplishments. Filled with daily regimens, advice for providing children with fulfilling experiences that go beyond the home, and tips for making the transition to college, theirs is an inspirational real-life success story that anyone can achieve—whether you homeschool your children or not. Featured on the Today show and FOX, *The Brainy Bunch* is uplifting and ultimately relatable proof of what any family can accomplish through dedication, love, faith, and hard work.

Helping Your Pupils to Think for Themselves Corwin Press

From Thomas Jefferson to John Rawls, justice has been at the center of America's self-image and national creed. At the same time, for many of its peoples—from African slaves and European

immigrants to women and the poor-the American experience has been defined by injustice: oppression, disenfranchisement, violence, and prejudice. In *Identity and the Failure of America*, "John Michael explores the contradictions between a mythic national identity promising justice to all and the realities of a divided, hierarchical, and frequently iniquitous history and social order. Through a series of insightful readings, Michael analyzes such cultural moments as the epic dramatization of the tension between individual ambition and communal complicity in *Moby-Dick*, "attempts to effect social change through sympathy in the novels of Lydia Marie Child and Harriet Beecher Stowe, Ralph Waldo Emerson's antislavery activism and Frederick Douglass's long fight for racial equity, and the divisive figures of John Brown and Nat Turner in American letters and memory. Focusing on exemplary instances when the nature of the United States as an essentially conflicted nation turned to force, Michael ultimately posits the development of a more cosmopolitan American identity, one that is more fully and justly imagined in response to

the nation's ethical failings at home and abroad. John Michael is professor of English and of visual and cultural studies at the University of Rochester. He is the author of *Anxious Intellectuals: Academic Professionals, Public Intellectuals, and Enlightenment Values and Emerson "and Skepticism: The Cipher of the World."* *Juvenile Courts Act, 1947 [Act 90]* Longman
 'Is it possible for beautiful things to come from a place of hurt and disappointment?' A beautiful life is not always one that goes on smoothly. A beautiful life is when the soul finds a way to make peace with the rough edges of existence. A beautiful life is interpreting the whole spectrum of human experiences, through the lens of faith. Fuelled by revealed divine verses and pressing personal reminiscences, this book coupled with vivid metaphorical watercolour artworks offers ten crafts to carry on when in the throes; to challenge what we perceive events in life to represent, how we respond to the unexpected, unfamiliar, and unpleasant, and what we choose to become in the face of everything.
