marvel of engineering and aesthetics. With such enthusiasts in mind, *Bike!* Is the first book to be produced on the history of the world's most famous racing-bike and component manufacturers. Within its pages you will discover the beautifully illustrated story of the artisans and visionary sportspeople who joined forces to create two-wheeled legends. From the cradle of

road biking on the plains of northern Italy to the birthplace of mountain biking, Marin County, California, *Bike!* unmasks the soul behind names like Colnago, Shimano and Campagnolo. Distributed throughout the book are special double-page photographic features on ten landmark bikes that were the first to introduce groundbreaking technology, from Maurice Garin's Ondiana cycle in the first

Tour de France of 1903 to the Team Sky Pinarello Dogma of 2010. Completed by sublime photography and graphic timelines, this book is the most striking tribute ever created to the craftsmanship, precision and speed of the racing bicycle. Edited by seasoned cycling veteran and bestselling author Richard Moore, *Bike!* is the perfect book for cycling fanatics and design

aficionados  
alike.

the Belly of a Laughing God examines how eight contemporary Native women poets in Canada and the United States - Joy Harjo, Louise Halfe, Kimberly Blaeser, Marilyn Dumont, Diane Glancy, Jeannette Armstrong, Wendy Rose, and Marie Annharte Baker - employ humour and irony to address the intricacies of race, gender, and nationality. While

recognizing that humour and irony are often employed as methods of resistance, this careful analysis also acknowledges the ways that they can be used to assert or restore order. Using the framework of humour and irony, five themes emerge from the words of these poets: religious transformation; generic transformation; history, memory, and the nation; photography and representation

al visibility; and land and the significance of 'home.' Through the double-voice discourse of irony and the textual surprises of humour, these poets challenge hegemonic renderings of themselves and their cultures, even as they enforce their own cultural norms.

Distribution

Law: Antitrust

Principles and

Practice, Third Edition shows you how to: Establish a sound manufacturer-distributor relationship in full compliance with federal and state antitrust law. Understand enforcement factors and the effect of antitrust regulation on distributor behavior. Handle problems arising from such areas as pricing, vertical restraints, exclusivity, tying, and refusal to deal. You will

get factual analysis of virtually every significant distribution antitrust case. You will find in-depth, practical analysis of such specific issues as: lost profits, predatory pricing, market definition, antitrust damages, and judicial latitude in discovery. service."--[Vol. 1], p. xxi.

*Framing Production* MIT Press

This intriguing book examines how material objects of the 20th century—ranging from articles of clothing to tools and weapons, communication devices, and toys and games—reflect dominant ideas and testify to the ways social change happens. • Supplies numerous examples of the ways in which American innovation depended on immigrants who invented new technologies and contributed immeasurably towards a uniquely powerful American economy • Demonstrates how American material life was created through globalization, from products imported into this country, such as Atari's video game console, to American products dependent upon imported materials, such as American cigarettes that used imported tobacco, and the coffee percolator on the kitchen table, serving up imported brewed coffee beans • Highlights how the ongoing struggle to achieve true equality and democracy is evidenced through objects such as a voting machine from 1900, the bus that Rosa Parks boarded, the buttons worn by gay rights activists, and the robe Muhammad

more radical model, the AM—his acclaim among technology and design historians owed much to Banham’s writings. The AM’s price tag (some models cost many thousands of dollars) has inspired tech-savvy cyclists to create “hot rod” compact bikes from Moulton-inspired “shopper” cycles of the 1970s—a trend also foreseen by Banham, who considered hot rod culture the “folk art of

the mechanical era.” The author traces the intertwined lives of two unusually creative men who had an extraordinary impact on each others’ careers, despite having met only a few times. *How the Bicycle Reshaped American Life* McFarland This book rediscovers the Hollywood Right, revealing how Hollywood Republicans remade America by successfully

backing candidates such as Richard Nixon. **Distribution Law: Antitrust Principles & Practice, 3rd Edition** Motorbooks International Bridges of Reform uncovers the early years of civil rights and the sophisticated ways it played out on the West Coast, a situation that radically differed from civil rights in the South and North. In this book, Shana Bernstein uses World War II and Cold War

Los Angeles as a locus of civil rights activity and explores its roots in multiracial organizing. There, activists built multiracial collaborations, bringing together the Mexican-, Jewish-, African-, and Japanese-American populations. Later national civil rights legislation and Supreme Court rulings, as well as ethnic-specific community movements, emerged in part from these interracial

efforts in Los Angeles. Detailed archival research reveals that significant domestic activism for racial equality persisted during the Cold War in the form of multiracial, anti-communist civil rights collaboration. The United States' global interests during World War II encouraged activists of diverse racial and ethnic backgrounds to join forces. The Cold War facilitated

further coalition-building and the pursuit of ongoing racial equality goals as activists sought protection and legitimacy from each other in this conservative era. From a city that incubated civil rights activism, Bernstein broadly connects West Coast activism with the domestic home front, the wars in Europe and Asia, and the onset of the Cold War, creating a unique study

of comparative race, ethnicity, and civil rights.

**Understanding the Computer Age**

HarperCollins Publishers  
 In this, the ultimate history of the bicycle, David Herlihy recounts the saga of this far-reaching invention and the passions it aroused. The pioneer racer insisted the bicycle would become "as common as umbrellas." Mark Twain was more skeptical, enjoining his

reader to "get a bicycle. You will not regret it-if you live." Herlihy shows readers why the bicycle captured the public's imagination and the myriad ways in which it reshaped the world.

New Series, Vols. 1-52

Centric Bicyclelink Blue Book

Despite local folklore, Chicago is not always a city that works. No longer the "Hog Butcher for the World," the Windy City has, in recent decades, pursued

economic growth at all costs--to the detriment of many of its citizens. This book describes the social, economic, and political costs of the growth ideology and examines the populist response that promises an alternative Chicago.

Tracing the city's uneven economic development since World War II, the authors demonstrate how unchecked growth in favor of private

enterprise has resulted in severe poverty, unemployment, crime, reduced tax revenues and property values, a decline in municipal services, and racial, ethnic, and class divisiveness. And yet proponents of Daley-style machine politics and the notion of the city as a growth machine still assert that the future of the city depends exclusively on its ability to grow. The victory of

Harold Washington is the most visible symbol of the movement toward an alternative Chicago. Naming different priorities and using more participatory tactics, this challenge to the politics of growth promotes development that is responsive to social need, not just market signals. Author note: Gregory D. Squires is Associate Professor of Sociology at

the University of Wisconsin, Milwaukee. Larry Bennett is Associate Professor and Chair of the Political Science Department at DePaul University. Kathleen McCourt is Associate Professor and Chair of the Department of Sociology and Anthropology at Loyola University of Chicago.
