Get complete instructions
for manipulating,
processing, cleaning, and
crunching datasets in
Python. Updated for

Python 3.6, the second
edition of this hands-on
guide is packed with
practical case studies that
show you how to solve a
broad set of data analysis
problems effectively.
You'll learn the latest
versions of pandas,
NumPy, IPython, and
Jupyter in the process.
Written by Wes McKinney,
the creator of the Python
pandas project, this book

is a practical, modern
introduction to data
science tools in Python.
It's ideal for analysts new
to Python and for Python
programmers new to data
science and scientific
computing. Data files and
related material are
available on GitHub. Use
the IPython shell and
Jupyter notebook for
exploratory computing
Learn basic and advanced

features in NumPy (Numerical Python) Get started with data analysis tools in the pandas library Use flexible tools to load, clean, transform, merge, and reshape data Create informative visualizations with matplotlib Apply the pandas groupby facility to slice, dice, and summarize datasets Analyze and manipulate regular and irregular time series data Learn how to solve real-world data analysis problems with thorough, detailed examples
[The Global Reach of the Fandango in Music, Song](#)

[and Dance Loft](#)
 This book is open access under a CC BY-NC 3.0 IGO license. This book comprehensively covers topics in knowledge management and competence in strategy development, management techniques, collaboration mechanisms, knowledge sharing and learning, as well as knowledge capture and storage. Presented in accessible “chunks,” it includes more than 120 topics that are essential to high-performance organizations. The

extensive use of quotes by respected experts juxtaposed with relevant research to counterpoint or lend weight to key concepts; “cheat sheets” that simplify access and reference to individual articles; as well as the grouping of many of these topics under recurrent themes make this book unique. In addition, it provides scalable tried-and-tested tools, method and approaches for improved organizational effectiveness. The research included is particularly useful to

knowledge workers engaged in executive leadership; research, analysis and advice; and corporate management and administration. It is a valuable resource for those working in the public, private and third sectors, both in industrialized and developing countries.

The fandango, emerging in the early-eighteenth century Black Atlantic as a dance and music craze across Spain and the Americas, came to comprise genres as diverse as Mexican son jarocho, the salon and concert fandangos of Mozart and Scarlatti, and the Andalusian fandangos central to flamenco. From the celebrations of humble folk to the theaters of the European elite, with boisterous

castanets, strumming strings, flirtatious sensuality, and dexterous footwork, the fandango became a conduit for the syncretism of music, dance, and people of diverse Spanish, Afro-Latin, Gitano, and even Amerindian origins. Once a symbol of Spanish Empire, it came to signify freedom of movement and of expression, given powerful new voice in the twenty-first century by Mexican immigrant communities. What is the full array of the fandango? The superb essays

gathered in this collection lay the foundational stone for further exploration.

The SPELIT POWER MATRIX is a leadership tool for untangling the organizational environment from a social, political, economic, legal, intercultural and technical view. The SPELIT

analysis method was developed for adult learners to have a framework for determining and formulating the answer to the question: What is? There is a need to analyze the environment in all organizations, whether you are entering a new organization or to benchmark the existing organization. The purpose of this text is to show how perceptive leaders can analyze environments in preparation for possible future action. We demonstrate how the

methodology aligns with previous theories regarding environmental scanning and produces a workable framework for the perceptive leader. The SPELIT POWER MATRIX is intended for practitioners doing a market analysis or diagnosis prior to implementing transitions, benchmarking in anticipation of an intervention, and can be used by undergraduate students and seasoned practitioners.

Python for Data Analysis Cambridge Scholars Publishing

The New Apartment' surveys one of the hottest trends in contemporary architecture - small apartments that make use of every last inch of space and are environmentally sound. It features full colour photographs of interiors and exteriors as well as plans of each design.

Francesc Rifé Loft Publications

This volume displays dozens of the most spectacular residential interiors created in recent years. Located all over the world, they are set apart

by their imaginative & innovative design, as well as their use of the latest technologies in construction, newly developed sophisticated materials, & furnishings from leading designers.

Francesc Rifé New Society Publisher

This book contains the papers that were accepted for presentation at the 1988 NATO Advanced Study Institute on Underwater Acoustic Data Processing, held at the Royal Military College of Canada from 18 to 29 July, 1988. Approximately

110 participants from various NATO countries were in attendance during this two week period. Their research interests range from underwater acoustics to signal processing and computer science; some are renowned scientists and some are recent Ph.D. graduates. The purpose of the ASI was to provide an authoritative summing up of the various research activities related to sonar technology. The exposition on each subject began with one or two tutorials prepared by

invited lecturers, followed by research papers which provided indications of the state of development in that specific area. I have broadly classified the papers into three sections under the titles of I. Propagation and Noise, II. Signal Processing and III. Post Processing. The reader will find in Section I papers on low frequency acoustic sources and effects of the medium on underwater acoustic propagation. Problems such as coherence loss due to boundary

interaction, wavefront distortion and multipath transmission were addressed. Besides the medium, corrupting noise sources also have a strong influence on the performance of a sonar system and several researchers described methods of modeling these sources.

Offices Springer Comics Beyond the Page in Latin America is a cutting-edge study of the expanding worlds of Latin American comics. Despite lack of funding and institutional support, not

since the mid-twentieth century have comics in the region been so dynamic, so diverse and so engaged with pressing social and cultural issues. Comics are being used as essential tools in debates about, for example, digital cultures, gender identities and political disenfranchisement.

Stone in a Landslide A. Asppan S.L.
 "California is an incubator for technological, multicultural, ecological thought, and a love for the outdoors. It should be no surprise then to see

that California architecture embodies these influences in home design. The projects presented in this book demonstrate the rich cultural synthesis found in California and that the influence of the North American continent upon American architecture continues." - Robert Nebolon. Architect AIA
The California Style is a complete compilation of the most relevant architects, landscape designers and interior designers in California. Containing the latest

projects of 24 selected Californian professionals, this work reveals the most beautiful homes, residences, retreats, sustainable houses, haciendas, chic apartments, gardens, terraces & outdoor spaces, pool houses, cottages, urban developments, cultural centers and sports facilities completed in the last years.

Paris Living Rooms Good Press

The projects in this book convey the ingenuity and skill of architects and

designers who create interesting, but smaller-sized, living environments. These spaces suggest lifestyles which, while not typical, seek to maintain basic standards of quality and comfort. The designs of these environments are the result of a search for superior functional flexibility that makes the most of every inch of space. Among the imaginative solutions in evidence are walls that contain and conceal household equipment, or furnishings that can be

moved to create different areas. Although some are based on simple items of furniture, and others are highly experimental prototypes, all the projects in this volume reveal unquestionable architectural sensitivity. *A Book for IELTS*. Springer Science & Business Media

The sixth title in the Grand Stand series presents new trends in the ever-changing world of stand design. The scenographic design of space and the creation of a stimulating atmosphere are crucial in shaping

human experience. The design of trade fair stands has become increasingly important to exhibiting organizations, and today's designers are playing an essential role in integrating brand identity into fascinating corporate presentations. This inspiring volume covers the creative processes behind 120 temporary spaces, including how to deal with challenges such as restrictions of space and limitations of lighting. The outcome is the realization of transient yet thrilling settings. Divided

into nine chapters, including mobility, apparel, and architectural products, many projects are illustrated with sketches and floor plans alongside stunning photography. Each stand is presented on two to four pages with an explanatory text about the design and technical information provided to help further explain the design process from concept to execution. This title is filled with contemporary stand designs that will inspire architects, designers,

brand managers, and any individuals interested in the building of ephemeral environments that leave an indelible impression. Anti-Jewish Riots in the Crown of Aragon and the Royal Response, 1391-1392 AK Press

This is the autobiography of Abdul Salam Zaeef, a senior former member of the Taliban. His memoirs, translated from Pashto, are more than just a personal account of his extraordinary life. My Life with the Taliban offers a counter-narrative to the standard accounts of

Afghanistan since 1979. Zaeef describes growing up in rural poverty in Kandahar province. Both of his parents died at an early age, and the Russian invasion of 1979 forced him to flee to Pakistan. He started fighting the jihad in 1983, during which time he was associated with many major figures in the anti-Soviet resistance, including the current Taliban head Mullah Mohammad Omar. After the war Zaeef returned to a quiet life in a small village in Kandahar, but

chaos soon overwhelmed Afghanistan as factional fighting erupted after the Russians pulled out. Disgusted by the lawlessness that ensued, Zaeef was one among the former mujahidin who were closely involved in the discussions that led to the emergence of the Taliban, in 1994. Zaeef then details his Taliban career as civil servant and minister who negotiated with foreign oil companies as well as with Afghanistan's own resistance leader, Ahmed Shah Massoud. Zaeef was

ambassador to Pakistan at the time of the 9/11 attacks, and his account discusses the strange "phoney war" period before the US-led intervention toppled the Taliban. In early 2002 Zaeef was handed over to American forces in Pakistan, notwithstanding his diplomatic status, and spent four and a half years in prison (including several years in Guantanamo) before being released without having been tried or charged with any offence. My Life with the Taliban

offers a personal and privileged insight into the rural Pashtun village communities that are the Taliban's bedrock. It helps to explain what drives men like Zaeef to take up arms against the foreigners who are foolish enough to invade his homeland.

An Introduction to Archaeological Chemistry Powershop

This is a self-study publication with two CD ROMs for students preparing for the Academic Module of the International English

Language Test System (IELTS) which is administered by the British Council, the University of Cambridge Local Examinations Syndicate (UCLES) and by IELTS Australia. The book covers the four sections of the IELTS exam: listening, reading, writing and speaking. Special features of the book are: the reading exercises, the detailed Keys for these exercises, the wide range of exercises to help you prepare for Writing Task 1, and the detailed Key for the Reading Tests. The

third edition incorporates additional material to cover changes made to the Speaking module of the IELTS examination. The publication may also be used as a course book, or as a supplement to a course book. Also includes changes to IELTS writing rubrics.

Cristiano Ronaldo

Carnegie Endowment

The acclaimed

investigative reporter and author of *Confronting*

Collapse examines the global forces that led to

9/11 in this provocative exposé. The attacks of

September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. *Crossing the Rubicon* examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale.

Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control.

Crossing the Rubicon is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

The Nordic Art of Life has become a model for

meaningful creative life around the globe. Scandinavian design and creativity are synonymous with cozy homes and architecture that combine style with tradition, indoors with outdoors, natural materials with rich colors, and playfulness with clarity. The Nordic countries are famous for their designers and entrepreneurs, who combine diligent craftsmanship with bold execution in all fields of contemporary creativity, like design, architecture, fashion, and food.

Northern Comfort The Nordic Art of Creative Living brings together the people, endeavors, and ideas that best embody this way of life, focusing on interior design while also venturing into the outdoors, the kitchen, and the design studio. It presents a kaleidoscope of northern talent that is both admirable and inspiring. Get comfortable and follow us on this journey up north.

This book offers a

comprehensive presentation of some of the most successful and popular domain decomposition preconditioners for finite and spectral element approximations of partial differential equations. It places strong emphasis on both algorithmic and mathematical aspects. It covers in detail important methods such as FETI and balancing Neumann-Neumann methods and algorithms for spectral element methods.
Atlas of Office Interiors
Berghahn Books

Archaeological chemistry is a subject of great importance to the study and methodology of archaeology. This comprehensive text covers the subject with a full range of case studies, materials, and research methods. With twenty years of experience teaching the subject, the authors offer straightforward coverage of archaeological chemistry, a subject that can be intimidating for many archaeologists who do not already have a background in the hard

sciences. With clear explanations and informative illustrations, the authors have created a highly approachable text, which will help readers overcome that intimidation. Topics covered included: Materials (rock, pottery, bone, charcoal, soils, metals, and others), Instruments (microscopes, NAA, spectrometers, mass spectrometers, GC/MS, XRF & XRD, Case Studies (Provenience, Sediments, Diet Reconstruction, Past Human Movement, Organic Residues). The

detailed coverage and clear language will make this useful as an introduction to the study of archaeological chemistry, as well as a useful resource for years after that introduction.

Underwater Acoustic Data Processing Hurst Photographer Dominique Nabokov has documented the living rooms of well-known Parisians--artists, writers, designers, intellectuals and the occasional celebrity. The rooms vary widely from one another in terms of formality and decor, but

they are all equalized under the gaze of Nabokov's camera. Each room is shot simply as it happened to appear on that particular day, without any people. Using discontinued Polaroid Colorgraph type 691 film (which provides a full-color transparency in four minutes), Nabokov does

not use special lighting or allow the rooms to be rearranged or touched by a stylist. The result is a series of fascinatingly deadpan photos that puts an ironic slant on the celebrity interior genre. These peeks into the living rooms of celebrated Parisians will provide

hours of voyeuristic pleasure. The book includes more than seventy living rooms of such diverse Parisians as Jean-Paul Goude, Andree Putman, Christian Liaigre, Gerard Depardieu, Jeanne Moreau, Carine Roitfeld, Loulou de la Falaise and Jacques Grange, to name a few.
