Carry On, Mr. Bowditch
Naval Inst Press
"An immense treasure trove of fact-filled and highly readable fun." -- Simon Winchester, *The New York Times Book Review* A Sunday Times (U.K.) Best Book of 2018 and Winner of the Mary Soames Award for History
An unprecedented history of the storied ship that Darwin said helped add a hemisphere to the civilized world
The Enlightenment was an age of endeavors, with Britain consumed by the impulse for grand projects undertaken at speed. Endeavour was also the name given to a collier bought by the Royal Navy in 1768. It was a commonplace coal-carrying vessel that no one could have guessed would go on to become the most significant ship in the chronicle of British exploration. The first history of its kind, Peter Moore's *Endeavour: The Ship That Changed the World* is a revealing and comprehensive account of the storied ship's role in shaping the Western world. Endeavour famously carried James

Cook on his first major voyage, charting for the first time New Zealand and the eastern coast of Australia. Yet it was a ship with many lives: During the battles for control of New York in 1776, she witnessed the bloody birth of the republic. As well as carrying botanists, a Polynesian priest, and the remains of the first kangaroo to arrive in Britain, she transported Newcastle coal and Hessian soldiers. NASA ultimately named a space shuttle in her honor. But to others she would be a toxic symbol of imperialism. Through careful research, Moore tells the story of one of history's most important sailing ships, and in turn shines new light on the ambition and consequences of the Age of Enlightenment.

How to Avoid Huge Ships HarperCollins

The legendary New York Times bestselling tale of top-down change for anyone trying to navigate today's uncertain business seas. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own

leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became "It's your ship," and Benfold was soon recognized far and wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including:

See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him "Megaphone Mike," since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test

official aboard the ship—and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.

A raison d'être of Calla Editions is to make long-forgotten masterworks available to contemporary bibliophiles, and this book fulfills that aim like few others can. *The Ship That Sailed to Mars* has a legendary reputation, and the original edition is much sought after by an ardent cult of collectors. Its author, William Timlin, was an obscure South African architect who, in a singular burst of creativity, brought forth a magical intertwining of science fiction and

fantasy, a kind of Burroughs meets Tolkien. With 48 pages of calligraphic text — in Timlin's hand — and 48 color plates, it is a work of stunning design, illustration, calligraphy, and overall conception. The Calla Edition also features a new introduction by John Howe, one of the two chief conceptual designers for Peter Jackson's *The Lord of the Rings* movie trilogy. The reappearance of this much-discussed title will be applauded by many fans of science fiction, fantasy, and book illustration.

The Last Grain Race Conway

In 1858, Mary Millburn successfully made her escape from Norfolk, Virginia, to Philadelphia aboard an express steamship. Millburn's maritime route to freedom was far from uncommon. By the mid-nineteenth century an increasing number of enslaved people had fled northward along the Atlantic seaboard. While scholarship on the Underground Railroad has focused almost exclusively on overland escape routes from the antebellum South, this groundbreaking volume

expands our understanding of how freedom was achieved by sea and what the journey looked like for many African Americans. With innovative scholarship and thorough research, *Sailing to Freedom* highlights little-known stories and describes the less-understood maritime side of the Underground Railroad, including the impact of African Americans' paid and unpaid waterfront labor. These ten essays reconsider and contextualize how escapes were managed along the East Coast, moving from the Carolinas, Virginia, and Maryland to safe harbor in northern cities such as Philadelphia, New York, New Bedford, and Boston. In addition to the volume editor, contributors include David S. Cecelski, Elysa Engelman, Kathryn Grover, Megan Jeffreys, Cheryl Janifer LaRoche, Mirelle Luecke, Cassandra Newby-Alexander, Michael D. Thompson, and Len Travers.

Sailing on the Seas of

Fate Perfection Learning

Numerous successful reprints of contemporary works on rigging and seamanship indicate the breadth of interest in the lost art of handling square-rigged ships. Modelmakers, marine painters and enthusiasts need to know not only how the ships were rigged but how much sail was set in each condition of wind and sea, how the various manoeuvres were carried out, and the intricacies of operations like reefing sails or 'catting' an anchor. Contemporary treatises such as Brady's *Kedge Anchor in the USA* or Darcy Lever's *Sheet Anchor in Britain* tell only half the story, for they

were training manuals intended to be used at sea in conjunction with practical experiences and often only cover officially-condoned practices. This book, on the other hand, is a modern, objective appraisal of the evidence, concerned with the actualities as much as the theory. The author's facility in a remarkable range of languages has allowed him to study virtually every manual published over a period of nearly four centuries. This gives the book a completely international balance and allows the author to describe for the first time the proper historical development of seamanship among the major navies of the world. One Hand for Yourself, One for the Ship Henry Holt and Company (BYR) You are the owner-captain of a luxury fifty-foot trawler motoring across the bay with your family and a few friends one balmy summer evening. Off in the distance, beyond the bridge spanning the waterway, you can make out the lights and shape of a containership moving down the channel. Have you ever wondered what action you must take to keep clear of that fast-approaching ship? This

book will tell you how to do so quickly.

Conscientious skippers are wise to read this book and discover if a ship's radar will pick up a small boat at night. It is fascinating to learn what is taking place on the bridge or down in the engine room of one of these leviathans as it heads your way. Can it be stopped before it hits you? Learn how to protect yourself and your loved ones by reading this book written for the private boat owner/captain.

The Ship that Sailed the

Time Stream Grand

"Titanic meets Tom Clancy technology" in this national-best-selling account of the SS Central America's wreckage and discovery (People). September 1875. With nearly six hundred passengers returning from the California Gold Rush, the side-wheel steamer SS Central America encountered a violent storm and sank two hundred miles off the Carolina coast. More than four hundred lives and twenty-one tons of gold were lost. It was a tragedy lost in legend for more than a century—until a brilliant young engineer named Tommy Thompson set out to find the wreck.

Driven by scientific curiosity and resentful of the term “treasure hunt,” Thompson searched the deep-ocean floor using historical accounts, cutting-edge sonar technology, and an underwater robot of his own design. Navigating greedy investors, impatient crewmembers, and a competing salvage team, Thompson finally located the wreck in 1989 and sailed into Norfolk with her recovered treasure: gold coins, bars, nuggets, and dust, plus steamer trunks filled with period clothes, newspapers, books, and journals. A great American adventure story, *Ship of Gold in the Deep Blue Sea* is also a fascinating account of the science, technology, and engineering that opened Earth’s final frontier, providing “white-knuckle reading, as exciting as anything . . . in *The Perfect Storm*” (Los Angeles Times Book Review). “A complex, bittersweet history of two centuries of American entrepreneurship, linked by the mad quest for gold.” —Entertainment Weekly “A ripping true tale of danger and discovery at sea.” —The Washington Post “What a yarn! . . . If you sign on for

the cruise, go in knowing that you’re going to miss meals and a lot of sleep.” —Newsweek

It's Your Ship University of Wisconsin Press
 This “dazzling” National Book Award finalist set aboard an ocean liner in 1931 reflects the passions and prejudices that sparked World War II (San Francisco Chronicle). August 1931. An ocean liner bound for Germany sets out from the Mexican port city of Veracruz. The ship’s first-class passengers include an

idealistic young American painter and her lover; a Spanish dance troupe with a sideline in larceny; an elderly German couple and their fat, seasick bulldog; and a boisterous band of Cuban medical students. As the Vera journeys across the Atlantic, the incidents and intrigues of several dozen passengers and crew members come into razor-sharp focus. The result is a richly drawn portrait of the human condition in all its complexity and a mesmerizing snapshot of a world drifting toward disaster. Written over a span of twenty years and based on the diary Katherine Anne Porter kept during a similar ocean voyage, *Ship of Fools* was the bestselling novel of 1962 and the inspiration for an Academy Award-winning film starring Vivien Leigh. It is a masterpiece of American literature as captivating today as when it was first published more than a half century ago. This ebook features an illustrated biography of Katherine Anne Porter, including rare photos from the University of Maryland Libraries.

 “What can the architecture of ancient

ships tell us about their capacity to carry cargo or to navigate certain trade routes? How do such insights inform our knowledge of the ancient economies that depended on maritime trade across the Mediterranean? These and similar questions lie behind *Sailing from Polis to Empire*, a fascinating insight into the practicalities of trading by boat in the ancient world. Allying modern scientific knowledge with Hellenistic sources, this interdisciplinary collection brings together experts in various fields of ship archaeology to shed new light on the role played by ships and sailing in the exchange networks of the

Mediterranean. Covering all parts of the Eastern Mediterranean, these outstanding contributions delve into a broad array of data - literary, epigraphical, papyrological, iconographic and archaeological - to understand the trade routes that connected the economies of individual cities and kingdoms. Unique in its interdisciplinary approach and focus on the Hellenistic period, this collection digs into the questions that others don't think to ask, and comes up with (sometimes surprising) answers. It will be of value to researchers in the

fields of naval architecture, Classical and Hellenistic history, social history and ancient geography, and to all those with an interest in the ancient world or the seafaring life."--
