Effective Altruism and Religion

Butterworth-

Heinemann Medical

This book is about

innovation, reflection and

inclusion. Cultural

innovation is something

real that tops up social

and technological

innovation by providing

the reflective society with

spaces of exchange in

which citizens engage in

the process of sharing

their experiences while

appropriating common

goods content. We are

talking of public spaces

such as universities,

academies, libraries,

museums, science-

centres, but also of any

place in which co-creation

activities may occur. The

argument starts with the

need for new narratives in

the history of philosophy,

which can be established

through co-creation, the

motor of cultural

innovation. The result is

redefining the history of

philosophy in terms of a

dialogical civilization by

ensuring continuous

translations, individual

processes of reflection

and collective processes

of inclusion. Readers will

grasp the effectiveness of
the history of philosophy
in societies that are
inclusive, innovative and
reflective.

Last Testament Test Prep Books

The Spirit Says offers a

stunning collection of

articles by an influential

assemblage of scholars,

all of whom lend

considerable insight to

the relationship between

inspiration and

interpretation. They

address this otherwise

intractable question with

deft and occasionally

daring readings of a

variety of texts from the

ancient world,

including—but not limited

to—the scriptures of early

Judaism and Christianity.

The thrust of this book

can be summed up not so

much in one question as

in four: o What is the role

of revelation in the

interpretation of

Scripture? o What might it

look like for an author to

be inspired? o What

motivates a claim to the

inspired interpretation of

Scripture? o Who is

inspired to interpret

Scripture? More often

than not, these questions

are submerged in this

volume under the tame

rubrics of exegesis and

hermeneutics, but they

rise in swells and surges
too to the surface, not just
occasionally but often.

Combining an assortment
of prominent voices, this

book does not merely

offer signposts along the

way. It charts a

pioneering path toward a

model of interpretation

that is at once

intellectually robust and

unmistakably inspired.

A bookstore can be a wonderful, welcoming place of both commerce and curiosity. That's the goal for Woody, an American recently transferred to England to run a branch of Texts. He wants a clean, orderly store and lots of sales to show his bosses when they arrive from the States for a pre-Christmas inspection. Not easy given the shop's location in a foggy strip mall. And things keep going wrong. No matter how often the shelves are put in order before the doors are locked at night, when the staff returns in the morning, books are lying all over the floor, many damp and damaged

beyond repair. The store's computers keep acting up-errors appear in brochures and ads and orders disappear completely. And even when the machines are turned off, they seem to glow with a spectral gray light. The hit-and-run death of an employee in the store's parking lot marks a turning point. One employee accuses another of making sexual advances and they come to blows. Between one sentence and the next, one loses his ability to read. The security monitors display half-seen things crawling between the stacks that vanish before anyone can find them. Desperate, Woody musters his staff for an overnight inventory. When the last customers reluctantly depart, leaving almost-visible trails of slime shining behind them, the doors are locked, sealing Woody and the others inside for a final orgy of shelving. The damp, grey, silent things that have been lurking in the basement and hiding in the fog may move slowly, but they are inexorable. This bookstore is no haven. It is the doorway to a hell unlike any other. At the Publisher's request, this title is being sold without

 Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/85766> “Emotion is an expression of the self,” Verena Kast writes in this ground-breaking study of the neglected emotions of joy, inspiration, and hope. “If we decide we no longer want to hide behind empty shells, then we will have to allow certain emotions more room. We will have to let ourselves laugh louder,

cry louder, and shout for joy.” Kast skillfully and engagingly makes the case that not only therapists and analysts but also individuals seeking growth in their own lives should give more attention to the elated emotions. Fear of excess (mania) and analytic preoccupation with grief, anxiety, and depression have together caused joy and hope to be shunned as a focus in individuation (the process toward wholeness). Kast convincingly demonstrates the role of joy in relationship and existential involvement. Joy answers the human need for elated feeling and meaning in our lives, a need which is often filled in modern society by secularized parodies of religious ecstasy, such as addiction and compulsiveness. Kast explores the Dionysian myth as an archetypal image of the transforming effect of ecstasy on the personality. She considers Sisyphus, the absurd hero of French existentialism, as the symbol for rejection of false hope and joy, rejection which clears the way for true hope rooted in basic trust and the positive mother archetype. She suggests simple techniques for

recapturing our joy through development of an autobiography of joy. Using this approach, we can discover what gives us joy personally, how we can best experience joy, and how and why we choke off our joy. By viewing joy, inspiration, and hope as core emotions in our being, we open ourselves to greater wholeness and fuller life.

In this monograph, Hryhoriy Lozinsky studies five feasts contained in Num 28:16-30:1. Each of them is first treated in the light of biblical calendars and other related texts. The calendar in Numbers is later than an earlier

version of Leviticus 23; yet the final form of Lev 23:1-44 is also a result of some later additions that took place after Num 28:1-30:1 had been composed. The author also focuses on the history of interpretation: he examines several pseudepigrapha, the Dead Sea Scrolls, and ancient Jewish writers from 200 BCE to 100 CE. He shows how these ancient sources reworked the biblical texts by expansions, clarifications, and omissions. In sum, the calendar in Numbers employs several previous traditions that dealt with the feasts, sacrifices, and calendars in order to compose the detailed list of the offerings for the appointed times. Moreover, it is a text that has been used by many ancient sources, especially in the matter of the sacrifices.

This volume of essays by Christopher Rowland concerns the nature of apocalypticism and its reception history. While the eschatological character predominates in modern biblical scholarship, the author argues for a focus rather on the revelatory form of apocalyptic texts. A consistent thread throughout the volume is the pervasiveness of apocalyptic and mystical elements in the New Testament and the reception of these ideas, culminating in the apocalyptic texts and images of William Blake.

Disruptive Power examines a surprising revival of faith in Catholic miracles in Germany from the 1920s to the 1960s. The book follows the dramatic stigmata of Therese Neumann of Konnersreuth and her powerful circle of followers that included theologians, Cardinals, politicians, journalists, monarchists, anti-fascists, and everyday pilgrims. *Disruptive Power* explores how this and other similar groups negotiated the

precariousness of the Weimar Republic, the repression of the Third Reich, and the dynamic early years of the Federal Republic. Analyzing a network of rebellious traditionalists, O'Sullivan illustrates the divisions that characterized the German Catholic minority as they endured the tumultuous era of the world wars. Analyzing material from archives in Germany and the United States, Michael E. O'Sullivan investigates the unsanctioned but very popular visions in several rural towns after World War II, providing micro-histories that illuminate the impact of mystical faith on religiosity, politics, and gender norms.

 All parts of the body need exercise for optimal health, and the eyes are no different. *Vision for Life* presents an approach to eye health for people with 20/20 vision who wish to maintain their perfect vision as well as people

who see poorly and would like to improve their eyesight. Clients of the Meir Schneider Self-Healing Method experience their own capacity to bring about recovery, reversing the progress of a wide range of degenerative conditions including eye disease. Based in part on the established Bates Method of eyesight improvement and in part on his own professional and personal discoveries, Meir Schneider's pioneering approach has helped thousands of people successfully treat a host of eye problems, including near- and farsightedness, astigmatism, lazy eye, double vision, glaucoma, cataracts, macular degeneration, retinal detachment, retinitis pigmentosa, and nystagmus. This revised edition includes a new chapter on children's eye health and new research and exercises for specific conditions, i.e., glaucoma and nystagmus, near- and farsightedness. Born blind to deaf parents, Schneider underwent a series of painful operations as a young child and was left with 99 percent scar tissue on the lenses of his eyes, resulting in his being declared incurably

blind. At the age of seventeen, he discovered how to improve his vision from less than 1 percent to 55 percent of normal vision with the eye exercises presented in this book. Today Schneider drives a car, reads, and enjoys the benefits of full natural vision. He and his clients prove time and time again how much vision can improve with exercise. His contributions to the field of self-healing are recognized by alternative health practitioners and medical doctors alike. In *Vision for Life*, Schneider shares forty years of discoveries made on his personal and professional journey. The book details simple but effective techniques to gain great vision such as sunning and palming. Such exercises are not only strengthening but also restorative and deeply relaxing. The reader learns how to reverse developing issues before they cause damage or to remedy existing problems, including pathologies such as glaucoma, cataracts, macular degeneration, retinal detachment, and optic nerve neuropathy. In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question

commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of

"experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.
