The Seventh annual Current Research in Egyptology Symposium (CRE 2006) was held on 6-8 April 2006, at the University of Oxford, and brought together graduate and postgraduate students of Egyptology from institutions world-wide. A total of 44 students presented their new and on-going research on a variety of topics including archaeology, art and architecture, history and society, literature and language, religion, museum studies, scientific analysis, history of Egyptology and 'egyptomania,' spanning the entire period of Egyptian history from Predynastic to Coptic times. The papers published here cover the same wide range of research areas and multi-disciplinary approaches.

The sixteenth Current Research in Egyptology (CRE) conference was held from the 15-18 April 2015 at the University of Oxford and once again provided a platform for postgraduates and early career Egyptologists, as well as independent researchers, to present their research. These proceedings for CREXVI represent the wide-range of themes that were offered by delegates during the conference. Papers focus on the theme of travel in ancient Egypt from a wide range of perspectives such as concrete or

abstract travels, travel in space and time, travel inside, to, or from Egypt, travel in literature, travel of beliefs and ideas or travel of objects.

Teaching English, particularly in second-language situations, involves teachers in wider issues within the community.

Beyond Methodology considers the relationship between language teaching and the community, and the ways in which teachers are both affected by broader social, political and economic policies and can also have an effect on these policies. It begins by exploring the three ways in which communities have a bearing on language teaching: as beneficiary, as resource, and as control. The effect of national policy is considered, and the scope is widened to include language teaching abroad. The final chapter suggests ways in which teachers might influence future developments.

The Element summarises the state of knowledge about four styles of prehistoric rock art in Europe current between the late Mesolithic period and the Iron Age. They are the Levantine, Macroschematic and Schematic traditions in the Iberian Peninsula; the Atlantic style that extended

between Portugal, Spain, Britain and Ireland; Alpine rock art; and the pecked and painted images found in Fennoscandia. They are interpreted in relation to the landscapes in which they were made. Their production is related to monument building, the decoration of portable objects, trade and long distance travel, burial rites, and warfare. A final discussion considers possible connections between these separate traditions and the changing subject matter of rock art in relation to wider developments in European prehistoric societies.
