The image of Samia Yusuf Omar running for last place at the 2008 Beijing Olympics will forever be imprinted in the minds of all who saw it: The lean Somalian, wearing knee-length leggings and a baggy T-shirt, came in seconds behind her competitors. What the cheering crowd couldn't know then was what it took to get there. An Olympic Dream follows Omar's second attempt to represent her country at the Olympics, this time in London. Reinhard Kleist pictures the athlete training in one of the most dangerous cities in the world; her passage through Sudan and into Libya; and her fateful attempt to reach Europe. By telling the story of one remarkable woman, Kleist gives voice to the thousands of migrants who risk their lives daily for a better future.

**How to Be an Explorer of the World** Viking Juvenile

Chronicle is proud to publish the exciting paintings of widely acclaimed German artist Michael Sowa. A miniature pig splashing in a bowl of soup; a duck leading a wheelbarrow down a country lane; a woman gently stroking her daughter's face with a rabbit: take a trip into Sowa's brilliant and darkly comic imagination, where a menagerie of creatures adopt strange personae and pop up in the most unexpected places. In the same realm as Chris Van Allsburg and Maurice Sendak, Sowa's paintings take on the other-worldly look of a whacked-out fairy tale—each work full of irony, a wry Brothers Grimm for grown-ups. These witty and satirical images—a cross between Magritte and *The Far Side*—are sure to attract a well-deserved and passionate following in the States.

New York Times Bestseller New York Times Notable Book of 2016 • NPR Great Read of 2016 • Named a Best Book of 2016 by The Economist, Smithsonian, NPR's Science Friday, MPR, Minnesota Star Tribune, Kirkus Reviews, Publishers Weekly, The Guardian, Times (London) From Pulitzer Prize winner Ed Yong, a groundbreaking, wondrously informative, and vastly entertaining examination of the most significant revolution in biology since Darwin—a "microbe's-eye view" of the world that reveals a marvelous, radically reconceived picture of life on earth. Every animal, whether human, squid, or wasp, is home to millions of bacteria and other microbes. Pulitzer Prize-winning author Ed Yong, whose humor is as evident as his erudition, prompts us to look at ourselves and our animal

companions in a new light—less as individuals and more as the interconnected, interdependent multitudes we assuredly are. The microbes in our bodies are part of our immune systems and protect us from disease. In the deep oceans, mysterious creatures without mouths or guts depend on microbes for all their energy. Bacteria provide squid with invisibility cloaks, help beetles to bring down forests, and allow worms to cause diseases that afflict millions of people. Many people think of microbes as germs to be eradicated, but those that live with us—the microbiome—build our bodies, protect our health, shape our identities, and grant us incredible abilities. In this astonishing book, Ed Yong takes us on a grand tour through our microbial partners, and introduces us to the scientists on the front lines of discovery. It will change both our view of nature and our sense of where we belong in it.
