 A day in the life of Carla Valentine - curator, pathology technician and 'death professional' - is not your average day. She spent ten years training and working as an Anatomical Pathology Technologist: where the mortuary slab was her desk, and that day's corpses her task list. Past Mortems tells Carla's stories of those years, as well as investigating the body alongside our attitudes towards death - shedding light on what the living can learn from dead and the toll the work can take on the living souls who carry it out. Fascinating and insightful, Past Mortems reveals the truth about what happens

when the mortuary doors swing shut or the lid of the coffin closes.

Gendered Tropes in War Photography

 In *The Rhetoric of Photography in Modern Japanese Literature*, Atsuko Sakaki closely examines photography-inspired texts by four Japanese novelists: Tanizaki Jun'ichirō (1886-1965), Abe Kōbō (1924-93), Horie Toshiyuki (b. 1964) and Kanai Mieko (b. 1947). As connoisseurs, practitioners or critics of this visual medium, these authors look beyond photographs' status as images that document and verify empirical incidents and existences, articulating instead the physical process of photographic production and photographs' material presence in human lives. This book offers insight into the engagement with photography in Japanese literary texts as a means of bringing forgotten subject-

object dynamics to light. It calls for a fundamental reconfiguration of the parameters of modern print culture and its presumption of the transparency of agents of representation.

Image and Myth

W. W. Norton & Company
 Along with the rapid expansion of the market economy and industrial production methods, such innovations as photography, lithography, and steam printing created a pictorial revolution in nineteenth-century society. The proliferation of visual prints, ephemera, spectacles, and technologies transformed public values and perceptions, and its legacy was as significant as the print revolution that preceded it. *Consuming Identities* explores the significance of the pictorial revolution in one of its vanguard cities: San Francisco, the revolving door of

the gold rush. In their correspondence, diaries, portraits, and reminiscences, thousands of migrants to the city by the Bay demonstrated that visual media constituted a central means by which people navigated the bewildering host of changes taking hold around them in the second half of the nineteenth century, from the spread of capitalism and class formation to immigration and urbanization. Images themselves were inextricably associated with these world-changing forces; they were commodities, but as representations of people, they also possessed special cultural qualities that gave them new meaning and significance. Visual media transcended traditional boundaries of language and culture that divided diverse groups within the same urban space. From the 1848 conquest of California and the gold discovery to the disastrous earthquake and fire of 1906, San Francisco anticipated broader cultural transformations in the commodification, implementation, and popularity of images. For the city's inhabitants and sojourners, an array of imagery came to mediate, intersect with, and even constitute social interaction in a world where virtual reality was becoming normative.

This work contains 41 engaging essays on players of the silent screen, from superstars like Rudolph Valentino and Clara Bow to fascinating figures like Clarine Seymour and Arthur Johnson. These stories range from the tragic (early deaths, drug problems, talkie-related career failures) to the triumphant (a surprising number of silent stars enjoyed long, happy lives). Many of these personalities have never before been covered in depth, and their careers highlight the entire silent era, from its beginnings in the 1890s to its demise in the late 1920s. These essays, earlier versions of which were published in *Classic Images*, have been completely reedited and rewritten, reflecting information later made available to the author.

Photographic stills of women, appearing in both press coverage and relief campaigns, have long been central to the documentation of war and civil conflict. Images of non-Western women, in particular, regularly function as symbols of the misery and hopelessness of the oppressed. Featured on the front pages of newspapers and in NGO reports, they inform public understandings of war and peace, victims and perpetrators, but within a discourse that often obscures social and political subjectivities. Uniquely, this book deconstructs - in a systematic, gender-sensitive way - the repetitive circulation of certain images of war, conflict and state violence, in order to scrutinize the role of photographic tropes in the globalized visual sphere. Zarzycka builds on feminist theories of representations of war to explore how the concepts of femininity and war secure each other's intelligibility in photographic practices. This book examines the complex connections between photographic tropes and the individuals and communities they represent, in order to rethink the medium of photography as a discursive and political practice. This book interrogates both the structure and transmission of contemporary encounters with war, violence, and conflict. It will appeal to advanced students and scholars of gender studies, visual studies, media studies, photography theory, cultural anthropology, cultural studies, and trauma and memory studies.

Forensic Pathology is a comprehensive reference that uses a case-oriented format to address, explain and guide the reader through the varied topics encountered by forensic pathologists. Developed in response to a severe void in the literature, the book addresses topics ranging from medicolegal investigation of death to death scene investigation, forensic autopsy, and artifacts of resuscitation as well as complications of medical therapy, forensic osteology, forensic odontology, forensic photography, and death certification. The book includes various types of cases, including sudden natural death, asphyxia, motor vehicle collisions, death in custody, child abuse and elder abuse, acute psychiatric and emotional deaths, and pregnancy. Mani's Pictures Demiurge Underground

"The group of artists known as the "Pictures Generation" are usually thought to have rebelled against abstract and minimalist art by bringing back figural techniques and borrowing liberally from the aesthetics of mass media and advertising. Challenging conventional interpretations of this group, Alexander Bigman argues that these artists—especially Robert Longo, Jack Goldstein, Sarah Charlesworth, Gretchen Bender, and Troy Brauntuch—deployed totalitarian and fascist iconography to pose new, politically loaded questions about what it means to perceive the world historically in a society saturated by images. Throughout, he also situates their work in the context of other developments taking place in New York City at the time, including music, fashion,

cinema, and literature. This is a book about art, popular culture, and memory, and especially about how the specter of fascism loomed for these artists in the 1970s and 1980s, and the ways it still looms for us today"--

The Lure of Images University of Toronto Press

On museum visits, we pass by beautiful, well-preserved vases from ancient Greece—but how often do we understand what the images on them depict? In *Image and Myth*, Luca Giuliani tells the stories behind the pictures, exploring how artists of antiquity had to determine which motifs or historical and mythic events to use to tell an underlying story while also keeping in mind the tastes and expectations of paying clients. Covering the range of Greek style and its growth between the early Archaic and Hellenistic periods, Giuliani describes the intellectual, social, and artistic contexts in which the images were created. He reveals that developments in Greek vase painting were driven as much by the times as they were by tradition—the better-known the story, the less leeway the artists had in interpreting it. As literary culture transformed from an oral tradition, in which stories were always in flux, to the stability of written texts, the images produced by artists eventually became nothing more than illustrations of canonical works. At once a work of cultural and art history, *Image and Myth* builds a new way of understanding the visual culture of ancient Greece.

The founder of Manichaeism, Mani (216-274/277 CE), not only wrote down his teachings to prevent their adulteration, but also created a set of paintings—the *Book of Pictures*—to be used in the context of oral instruction. That pictorial handscroll and its later editions became canonical art for Mani's followers for a millennium afterwards. This richly illustrated study systematically explores the artistic culture of religious instruction of the Manichaeans based on textual and artistic evidence. It discusses the doctrinal themes (soteriology, prophetology, theology, and cosmology) depicted in Mani's canonical pictures. Moreover, it identifies 10th-century fragments of canonical picture books, as well as select didactic images adapted to other, non-canonical art objects (murals, hanging scrolls, mortuary banners, and illuminated

liturgical manuscripts) in Uyghur Central Asia and Tang-Ming China.

This is the history of the relationship between mass produced visual media and religion in the United States. It is a journey from the 1780s to the present - from early evangelical tracts to teenage witches and televangelists, and from illustrated books to contemporary cinema. David Morgan explores the cultural marketplace of public representation, showing how American religionists have made special use of visual media to instruct the public, to practice devotion and ritual, and to form children and converts. Examples include: studying Jesus as an American idol Jewish kitchens and Christian Parlors Billy Sunday and Buffy the Vampire Slayer Uncle Tom's Cabin and the anti-slavery movement. This unique perspective reveals the importance of visual media to the construction and practice of sectarian and national community in a nation of immigrants old and new, and the tensions between the assimilation and the preservation of ethnic and racial identities. As well as the contribution of visual media to the religious life of Christians and Jews, Morgan shows how images have informed the perceptions and practices of other religions in America, including New Age, Buddhist and Hindu spirituality, and Mormonism, Native American Religions and the Occult.

Making Muslim Women European

Central European University Press

This book uses the conceptual tools of philosophy to shed light on digital media and on the way in which they bear upon our existence. At the turn of the century, the rise of digital media significantly changed our world. The digitizing of traditional media has extraordinarily increased the circulation of texts, sound, and images. Digital media have also

widened our horizons and altered our relationship with others and with ourselves. Information production and communication are still undoubtedly significant aspects of digital media and life. Recently, however, recording, registration and keeping track have taken the upper hand in both online practices and the imaginaries related to them. The essays in this book therefore focus primarily on the idea that digital media involve a significant overlapping between communication and recording.
