Indigenous Symbols and Practices in the Catholic Church presents views, concepts and perspectives on the relationships among Indigenous Peoples and the Catholic Church, as well as stories, images and art as metaphors for survival in a contemporary world. Few studies present such interdisciplinary interpretations from contributors in multiple disciplines regarding appropriation, spiritual and religious tradition, educational issues in the teaching of art and art history, the effects of government sanctions on traditional practice, or the artistic interpretation of symbols from Indigenous perspectives. Through photographs and visual materials, interviews and data analysis, personal narratives and stories, these chapters explore the experiences of Indigenous Peoples whose lives have been impacted by multiple forces – Christian missionaries,

governmental policies, immigration and colonization, education, assimilation and acculturation.

Contributors investigate current contexts and complex areas of conflict regarding missionization, appropriation and colonizing practices through asking questions such as, 'What does the use of images mean for resistance, transformation and cultural destruction?' And, 'What new interpretations and perspectives are necessary for Indigenous traditions to survive and flourish in the future?'

Rock art has long been considered an archaeological artifact reflecting activities from the past, yet it is also a phenomenon with present-day meaning and relevance to both Indigenous and non-Indigenous communities. Relating to Rock Art in the Contemporary World challenges traditional ways of thinking about this highly recognizable form of visual heritage and provides insight into its contemporary significance. One of the most visually striking forms of material culture embedded in landscapes, rock art is ascribed different meanings by diverse groups of people including Indigenous peoples, governments, tourism offices, and the general public, all of whom relate to images and sites in unique ways. In this volume, leading scholars from around the globe shift the discourse from a primarily archaeological basis to one that examines the myriad ways that symbolism, meaning, and significance in rock art are being renegotiated in various geographical and cultural settings, from Australia to the British Isles. They also consider how people manage the complex meanings, emotions, and cultural and political practices tied to rock art sites and how these factors impact processes relating to identity construction and reaffirmation today. Richly illustrated and geographically diverse, Relating to Rock Art in the Contemporary World connects archaeology, anthropology, and heritage studies. The book will appeal to students and scholars of archaeology, anthropology, heritage, heritage management, identity studies, art history, Indigenous studies, and visual theory, as well as professionals and amateurs who have vested or avocational interests in rock art.
