Who is seeking to destroy all esoteric religious movements, starting with The Process Church of the Final Judgement? The Process was the most fascinating innovative cult of the 1960s, then vanished for four decades before being virtually reborn by the use of information technology. Revival seems to be fiction, yet it's based on fact and explores the implications of the internet, and the disintegration of conventional faiths. As reported in the author's anthropological study, *Satan's Power*, the Process was polytheistic, asserting the union of Jehovah with Lucifer, and the unity of Christ with Satan. Each Process member was a fragment of a god, with a corresponding personality trait: Jehovah = Discipline, Lucifer = Liberation, Christ = Unification, Satan = Separation. Before the first page of this book, the computer magician who resurrected the Process Church was murdered. Was this man Christ? Christianity may be the opposite of what it seems, a Satanic plot that subconsciously preaches, "Release the fiend that lies dormant within you, for he is strong

and ruthless, and his power is far beyond the bounds of human frailty. Come forth in your savage might, rampant with the lust of battle, tense and quivering with the urge to strike, to smash, to split asunder all that seek to detain you." Can the surviving Processeans achieve the hopes expressed in their blessing: "May the life-giving water of the Lord Christ and the purifying fire of the Lord Satan bring the presence of love and unity into this assembly"?

Meet Florence Merriam Bailey, a pioneering birder and activist who changed the way we study birds forever, as told through the evocative collage style of artist Andrea D'Aquino. As a young girl, Florence Merriam Bailey fell in love with the outdoors, especially birds whose songs and flight captivated her. She listened, waited, and watched to better understand her feathered friends, and wrote many books, including one of the first field guides to American birds. Her work ultimately led to better protection for birds and to the scientific study of birds in nature instead of in a lab. *She Heard the Birds*, the latest book from *A Life Made by Hand: The Story of Ruth Asawa* author Andrea D'Aquino, brings to life the story of a woman ahead of her time. D'Aquino's striking full-page collages make each page a delight to read.

Emblus fingby's life was changed forever with the unexpected arrival of the osbick bird. The two became inseparable companions, enjoying card games, musical interludes, and sunset strolls. They took tea together, passed the time making arts and crafts, and perhaps only occasionally had disagreements. Their curious relationship came to an end only with the utmost display of loyalty. Find meaning where you will among the twinkling rhymes and crosshatched lines: Is this tender tale a primer on friendship, or possibly an examination of an artist and his muse? "Dragonworld goes far beyond the flashy pyrotechnics of contemporary fantasy and fantasy illustration. Joe Zucker is a superlative and original illustrator, and he reveals a rare and astonishing gift for infusing a richness of character into his pictures, which do justice to Byron Preiss's and Michael Reaves's compelling story." —Maurice Sendak "Until now, there have been only two real grandmasters of modern epic fantasy—J.R.R. Tolkien and Ann McCaffrey. With the team of Preiss and Reaves, there are three, and may they write and write and write." —United Press International Somewhere beyond the northern mists lies a land where dreams live and dragons are real. This is the tale of the twilight of the dragons, of two nations plunged into war by a tragic misunderstanding, of a shy dreamer's incredible voyage of peace to a long-forgotten land where nightmares are born. A magnificent creation, a sweeping epic of high fantasy set in a richly imagined world, vividly brought to life with over eighty pages of stunning illustrations by Joseph Zucker.

This book is a tribute to Etienne E. Kerre on the occasion of his retirement on October 1st, 2010, after being active for 35 years in the field of fuzzy set theory. It gathers contributions from researchers that have been close to him in one way or another during his long and fruitful career. Besides a foreword by Lotfi A. Zadeh, it contains 13 chapters on both theoretical and applied topics in fuzzy set theory, divided in three parts: 1) logics and connectives, 2) data analysis, and 3) media applications. The first part deals with fuzzy logics and with operators on (extensions of) fuzzy sets. Part 2 deals with fuzzy methods in rough set theory,

formal concept analysis, decision making and classification. The last part discusses the use of fuzzy methods for representing and manipulating media objects, such as images and text documents.

The diversity of the topics that are covered reflect the diversity of Etienne's research interests, and indeed, the diversity of current research in the area of fuzzy set theory.
