The problem MX records are: 234.60.7.31.in-addr.arpa -> no reverse (PTR) detected 233.60.7.31.in-addr.arpa -> no reverse (PTR) detected You should contact your ISP and ask him to add a PTR record for your ips. thanks in advancedomain name system - how solve ERROR: No reverse DNS (PTR ...Start by identifying the four switch wires and terminals, then disconnect them. Move the gear lever to the drive position. Slacken the locknut and unscrew the switch from the gearbox a few turns. Using a circuit tester with its own power supply (not a test lamp), connect it across the two reversing light terminals.

[Fixing a reversing light | How a](#)

Car WorksI just fixed my Kenmore 385 that had quit sewing in reverse. The mechanism just froze up from lack of use. Take the bottom off the machine to expose the mechanism, push the reverse button several times while studying the workings. If you do not use the machine much, it is likely just froze up. Sewing Machine Won't Sew in Reverse? | ThriftyFun Step 1. Run the engine for several minutes before attempting to put the car in reverse again. With both automatic and manual transmissions, transmission fluid may need time to heat up before it flows properly. This is especially true in the winter and for drivers located in cold regions. How to Fix a Transmission That Won't Back Up | It Still Runs I hooked a pressure gauge to the test port on the

driver's side of the case and at idle the pressure is low in reverse and in L1 (30psi). It is highest in L2 (about 130psi) and in Park, Drive and Neutral all the same (90psi).
