La censura de libros y de actividades culturales en los regímenes totalitarios, sobre todo los del siglo XX, ha sido estudiada desde diversos aspectos ofrece una amplia bibliografía. Sin embargo no se ha prestado suficiente atención ni a la censura de libros para el público infantil y juvenil ni a las exclusiones de ciertas lecturas literarias en el ámbito escolar, quizá por considerar que tenían menos trascendencia. Tras dos capítulos introductorios ("Literatura y poder" y "El concepto de censura. Las censuras en la LIJ"), el libro se estructura en dos partes: la primera dedicada a "Censura y LIJ en la España franquista" (con atención no solo a la historia de los libros infantiles censurados, sino también a las censuras soterradas, a las que afectaron a los exiliados tras la Guerra Civil, a las traducciones y a la LIJ escrita en otras lenguas del Estado; y con dos apartados científicos para

la censura de los tebeos e historias y del teatro infantil). En la segunda parte se ha dedicado un capítulo a la LIJ censurada en cada uno de los siete países que se han estudiado.

LEV Ediciones de la Universidad de Castilla La Mancha

La muestra esta construida alrededor de Ismos, el libro que Ramón escribiera en 1931.

*The Soils of Cuba* John Benjamins Publishing  
A Comparative History of Literatures in the Iberian Peninsula is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested. Written by an international team of

researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda. A Comparative History of Literatures in the Iberian Peninsula undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.

*Ramón en cuatro entregas* University of Michigan Press

For at least six hundred million years, life has been a fascinating laboratory of crystallization, referred to as biomineralization. During this huge lapse of time, many organisms from diverse phyla have developed the capability to precipitate various types of minerals,

exploring distinctive pathways for building sophisticated structural architectures for different purposes. The Darwinian exploration was performed by trial and error, but the success in terms of complexity and efficiency is evident. Understanding the strategies that those organisms employ for regulating the nucleation, growth, and assembly of nanocrystals to build these sophisticated devices is an intellectual challenge and a source of inspiration in fields as diverse as materials science, nanotechnology, and biomedicine. However, "Biological Crystallization" is a broader topic that includes biomineralization, but also the laboratory crystallization of biological compounds such as macromolecules, carbohydrates, or lipids, and the synthesis and fabrication of biomimetic materials by different routes. This Special Issue collects 15 contributions ranging from biological and biomimetic crystallization of calcium carbonate, calcium phosphate, and silica-carbonate self-assembled materials to the crystallization of biological

macromolecules. Special attention has been paid to the fundamental phenomena of crystallization (nucleation and growth), and the applications of the crystals in biomedicine, environment, and materials science.

GastronomicasCuentos de Calleja: Kakatukán y otros cuentos

An important collection of around 500 aphorisms (greguerías), which are a landmark of innovative literary technique akin to that of Futurism. Ramón Gómez de la Serna introduced Spain to European avant-garde literature with this new genre, presented here in a stunningly thorough representation of an influential form and including an in-depth analysis by the translator.

The book also includes a list of other works by Gómez de la Serna in English translation, two brief bibliographies, and a keyword index.

#### Bibliotheca Hispana: Revista de Información y Orientación Bibliográficas. Sección 1

An exploration of the role of the book, the map, and the European concept of literacy in the conquest of the New World

### **La sagrada cripta de Pombo ...**

Kakatukán y otros relatos reúne una selección encantadora de los célebres relatos de Calleja, con ilustraciones cautivadoras para lectores de todas las edades. En esta antología, que forma parte de la colección Cuentos de Calleja, encontramos historias de aventuras, magia y valores eternos que han fascinado a generaciones. Desde criaturas fabulosas hasta héroes ingeniosos, cada cuento invita a explorar mundos imaginativos y reflexionar sobre la bondad, la valentía y la amistad. Esta edición especial celebra el legado de Calleja y ofrece una experiencia visual y literaria única, perfecta para compartir y disfrutar en familia.

### **Nuevas letras**

By introducing the

superspace formalism, the methods of structure analysis of incommensurate structures have achieved in the past few years a full maturity. The superspace description is also becoming in the field of quasicrystals the main tool to approach a systematic method of structure determination of these materials. According to the program of the Workshop, these proceedings are an introduction to the formalism and practice of structure determination of modulated structures

(incommensurate and commensurate) and quasiperiodic systems, mainly under the unifying framework of the superspace description. Accordingly, a large set of tutorial introductory chapters written by well-known specialists are included. The main refinement programs available for incommensurate structures are presented by their authors. The book also contains the most recent contributions from more than thirty of the participants in the Workshop, focusing on the problem of the structure

analysis of these typical materials by means of diffraction methods.
