An introduction to the Large-Eddy-Simulation (LES) method, geared primarily toward hydraulic and environmental engineers, the book covers special features of flows in water bodies and summarizes the experience

gained with LES for calculating such flows. It can also be a valuable entry to the subject of LES for researchers and students in all fields of fluids engineering, and the applications part will be useful to researchers interested in the physics of flows governed by the dynamics of coherent structures. This book is firstly a testament to those of many nationalities who found themselves imprisoned at Stalag Luft VII, Bankau (Luft 7 for short) in Upper Silesia, the Luftwaffe's last prisoner of war camp. Having survived the trauma of action against, and capture by, the enemy, some as far back as 1940, they came from France, the Low Countries, Germany, Norway, Denmark, Poland, the Balkans, Italy, Hungary, the

Mediterranean and other seas, and from North Africa. Many of their experiences and adventures have never been documented before. It is also the complete history of their prisoner of war (POW) camp, Luft 7, told in full detail for the first time, a camp that existed for barely thirty-two weeks from its opening in early June 1944 to its closure in mid January 1945.

Gavin Mortimer reveals the 12 legendary Special Forces commanders of World War II. Prior to the war, the concept of 'special forces' simply didn't exist, but thanks to visionary leaders like David Stirling and Charles Hunter, our very concept of how wars can be fought and won has totally changed. These 12 men not only reshaped military policy, but they led from the front, accompanying their troops into battle, from the sands of North Africa to jumping on D-Day and infiltrating behind enemy lines. Mortimer also offers a skilful analysis of their qualities as military commanders and the true impact that their own personal

actions, as well as those of their units, had on the eventual outcome of the war.

Systematic, authoritative, and timely, this is an outstanding reference and text for anyone working with or studying adolescents. More than 50 leading experts comprehensively review current knowledge on adolescent externalizing

disorders, internalizing disorders, developmental disorders, personality and health-related disorders, gender identity and sexual disorders, and maltreatment and trauma. Chapters identify the core features of each disorder; explore its etiology, course, and outcome; address diagnostic issues specific to adolescents; and describe effective assessment and treatment approaches. The book also provides an integrative conceptual framework for understanding both healthy and maladaptive adolescent development.

**Behavioral and Emotional Disorders in Adolescents** Lloyd's Register

Focusing on his evocative and profound references to children and their stories, Children's Stories and 'Child-Time in the Works of Joseph Cornell and the

Transatlantic Avant-Garde studies the relationship between the artist's work on childhood and his search for a transfigured concept of time. As it changes the focus from Cornell's boxes to his multimedia works, this study also situates Cornell and his art in the broader context of the transatlantic avant-garde of the 1930s and 40s.

The Hundred Days that saw the British response to General Galtiere of Argentina's invasion of the Falklands are for many British people the most remarkable of their lives. It describes the dark days of early April, the feverish response and forming of the Task Force, the anxieties and uncertainties, the naval and air battles that preceded the

landings by 3 Commando Brigade and 5th Infantry Brigade. The extraordinary battles such as Goose Green, Mount Tumbledown, Wireless Ridge etc are narrated fully but succinctly. This is a very balanced overview of a never-to-be-repeated but triumphant chapter in British military history.
