Intended for physical therapy students & clinicians, this title addresses the physical therapist examination, including history, systems review, & specific tests & measures for various cases, as well as evaluation, diagnosis, & evidence-based interventions.

2020 7th International Conference on Energy Efficiency and Agricultural Engineering (EE&AE) Elsevier Health Sciences

Novel Algorithms and Techniques in Telecommunications and Networking includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Industrial Electronics, Technology and Automation, Telecommunications and Networking. Novel Algorithms and Techniques in Telecommunications and Networking includes selected papers from the conference proceedings of the International Conference on Telecommunications and Networking (TeNe 08) which was part of the International Joint Conferences on Computer, Information and Systems Sciences and Engineering (CISSE 2008).

"Code of Massachusetts regulations, 2010" Springer Nature

Elsevier and the American Medical Association have partnered to co-publish this HCPCS Level II reference by Carol J. Buck! For quick, accurate, and efficient coding, choose 2014 HCPCS Level II, Standard Edition! In an easy-to-use format, this practical reference presents the latest HCPCS codes to help you comply with coding regulations, confidently locate specific codes, manage supply reimbursement, report patient data, and more. - At-a-glance code listings highlight all new, revised, reinstated, and deleted codes for 2014. - Color-coded Table of Drugs makes it easy to find specific drug information. - Drug code annotations identify brand-name drugs as well as drugs that appear on the National Drug Class (NDC) directory and other FDA approved drugs. - Special coverage information provides alerts when codes have specific coverage instructions, are not covered or valid by Medicare, or may be paid at the carrier's discretion. - Jurisdiction information shows the appropriate contractor to be billed for suppliers submitting claims to Medicare contractors, Part B carriers, and Medicare Administrative Contractors submitting for DMEPOS services provided. - Codingupdates.com companion website includes HCPCS updates and corrections, and provides the opportunity to sign up for automatic e-mail notifications. - UPDATED codes help you maintain compliance with current Healthcare Common Procedure Coding System (HCPCS) standards.

13th International Conference on Biomedical Engineering Elsevier Health Sciences

For quick, accurate, and efficient coding, pick the market-leading HCPCS reference! From coding expert Carol J. Buck, 2016 HCPCS Level II, Standard Edition provides an easy-to-use guide to the latest Healthcare Common Procedure Coding System codes. It helps you locate specific codes, comply with coding regulations, optimize reimbursement, report patient data, code Medicare cases, and more. With this standard edition, you can focus on the basics of HCPCS coding — so you save money! - At-a-glance code listings and distinctive symbols identify all new, revised, and deleted codes for 2016. - Drug code annotations identify brand-name drugs as well as drugs that appear on the National Drug Class (NDC) directory and other Food and Drug Administration (FDA) approved drugs. - Information on coverage provides alerts when codes have special instructions, are not valid or covered by Medicare, or may be paid at the carrier's discretion. - Jurisdiction symbols show the appropriate contractor to be billed for suppliers submitting claims to Medicare contractors, Part B carriers, and Medicare administrative contractors submitting for DMEPOS services provided. - Color-coded Table of Drugs makes it easier to find specific drug information. - Codingupdates.com website includes quarterly updates to HCPCS codes and content, and the opportunity to sign up for e-mail notifications of the newest updates. - UPDATED 2016 official code set ensures compliance with current HCPCS standards, for fast and accurate coding.

2013 HCPCS Level II Standard Edition - E-Book Springer Nature

This book consists of 18 chapters divided in four sections: Robots for Educational Purposes, Health-Care and Medical Robots, Hardware - State of the Art, and Localization and Navigation. In the first section, there are four chapters covering autonomous mobile robot Emmy III, KCLBOT - mobile nonholonomic robot, and general overview of educational mobile robots. In the second section, the following themes are covered: walking support robots, control system for wheelchairs, leg-wheel mechanism as a mobile platform, micro mobile robot for abdominal use, and the influence of the robot size in the psychological treatment. In the third section, there are chapters about I2C bus system, vertical displacement service robots, quadruped robots - kinematics and dynamics model and Epi.q (hybrid) robots. Finally, in the last section, the following topics are covered: skid-steered vehicles, robotic exploration (new place recognition), omnidirectional mobile robots, ball-wheel mobile robots, and planetary wheeled mobile robots.

Journal of Rehabilitation Research & Development Saunders

On behalf of the organizing committee of the 13 International Conference on Biomedical Engineering, I extend our warmest welcome to you. This series of conference began in 1983 and is jointly organized by the YLL School of Medicine and Faculty of Engineering of the National University of Singapore and the Biomedical Engineering Society (Singapore). First of all, I want to thank Mr Lim Chuan Poh, Chairman A*STAR who kindly agreed to be our Guest of Honour to give the Opening Address amidst his busy schedule. I am delighted to report that the 13 ICBME has more than 600 participants from 40 countries. We have received very high quality papers and inevitably we had to turn down some papers. We have invited very prominent speakers and each one is an authority in their field of expertise. I am grateful to each one of them for setting aside their valuable time to participate in this conference. For the first time, the Biomedical Engineering Society (USA) will be sponsoring two symposia, ie "Drug Delivery Systems" and "Systems Biology and Computational Bioengineering". I am thankful to Prof Tom Skalak for his leadership in this initiative. I would also like to acknowledge the contribution of Prof Takami Yamaguchi for organizing the NUS-Tohoku's Global COE workshop within this conference. Thanks also to Prof Fritz Bodem for organizing the symposium, "Space Flight Bioengineering". This year's conference proceedings will be published by Springer as an IFMBE Proceedings Series.

Handbook of Electronic Assistive Technology Elsevier Health Sciences

The 4th European Congress of the International Federation for Medical and Biological Federation was held in Antwerp, November 2008. The scientific discussion on the conference and in this conference

proceedings include the following issues: Signal & Image Processing ICT Clinical Engineering and Applications Biomechanics and Fluid Biomechanics Biomaterials and Tissue Repair Innovations and Nanotechnology Modeling and Simulation Education and Professional

- Books on Demand

Electronic Assistive Technology (EAT) is a subset of a wider range of products and services known as Assistive Technology (AT). AT is designed to support and enable people with disabilities, either acquired or congenital, to participate in activities with greater independence and safety. With a global aging population, it has an important role to play in enabling and supporting those with disability and their carers. Handbook of Electronic Assistive Technology discusses a range of commonly available or emerging electronic assistive technologies. It provides historical background, advice when assessing for these devices and references different models of provision. It includes both medical and engineering aspects of provision. It is anticipated that the book will support students, trainees, and newly qualified Assistive Technology Practitioners to develop their understanding of the field, by considering the variables that could potentially influence the decision-making process when assessing for and providing this equipment. It also provides a reference point for those already practicing in this field and offers coverage of a broader range of technologies than clinicians may be exposed to, in their daily work This is the first reference book to focus on a comprehensive set of electronic assistive technologies and discuss their clinical application. -

Provides comprehensive coverage of electronic assistive devices - Gives an overview of physical and cognitive pathologies and approaches for utilizing electronic assistive devices for individuals affected by these pathologies - Covers essentials for assistive technology practitioners, human factors and technologies

Novel Algorithms and Techniques in Telecommunications and Networking Springer Science & Business Media

The discipline of rehabilitation engineering draws on a wide range of specialist knowledge, from the biomedical sciences to materials technology. Rehabilitation Engineering Applied to Mobility and Manipulation provides broad background and motivational material to ease readers' introduction to the subject. The book begins with a wide-ranging yet concise introduction to the legislative, technological, testing, and design basis of rehabilitation engineering, followed by the fundamentals of design and materials and a full account of the biomechanics of rehabilitation. Major sections of the book are devoted to various aspects of mobility, including detailed discussion of wheelchair design. Valuable additional material deals with seating, prosthetic devices, robotics, and the often-neglected subject of recreational devices and vehicles. More than a thousand references to the research and review literature put readers in touch with the leading edge of a rapidly growing field.

2018 HCPCS Level II Professional Edition - E-Book Que Publishing

This book presents various computational and cognitive modeling approaches in the areas of health, education, finance, environment, engineering, commerce, and industry. It is a collection of selected conference papers presented at the International Conference on Trends in Computational and Cognitive Engineering (TCCE 2020). It shares cutting-edge insights and ideas from mathematicians, engineers, scientists, and researchers and discusses fresh perspectives on problem solving in a

range of research areas.

Intelligent Sustainable Systems Academic Press

This Conference proceeding presents high-quality peer-reviewed papers from the International Conference on Electronics, Biomedical Engineering, and Health Informatics (ICEBEHI) 2020 held at Surabaya, Indonesia. The contents are broadly divided into three parts: (i) Electronics, (ii) Biomedical Engineering, and (iii) Health Informatics. The major focus is on emerging technologies and their applications in the domain of biomedical engineering. It includes papers based on original theoretical, practical, and experimental simulations, development, applications, measurements, and testing. Featuring the latest advances in the field of biomedical engineering applications, this book serves as a definitive reference resource for researchers, professors, and practitioners interested in exploring advanced techniques in the field of electronics, biomedical engineering, and health informatics. The applications and solutions discussed here provide excellent reference material for future product development.

Mobile Robots Elsevier Health Sciences

Presents instructions for creating and enhancing a variety of projects, including a sandwich-making robot, a Twitter-monitoring Christmas tree, and a bronze-melting blast furnace.

Artificial Intelligence in Real-Time Control 1994 Springer Nature

Human factors and ergonomics have made considerable contributions to the research, design, development, operation and analysis of transportation systems and their complementary infrastructure. This volume focuses on the causations of road accidents, the function and design of roads and signs, the design of automobiles, and the training of the driver. It covers accident analyses, air traffic control, control rooms, intelligent transportation systems, and new systems and technologies.

Proceedings of the ... Annual Conference Elsevier Health Sciences

An advanced look at smart technology to promote the independence of the elderly and disabled Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons. The Engineering Handbook of Smart Technology for Aging, Disability, and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled, including a breakdown of demographics, government spending, growth rate, and much more. Each chapter is written by an expert in his or her respective field, and gives readers unparalleled insight into the research and developments in a multitude of important areas, including: User-need analyses, classifications, and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human-machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices, tools, and environments This book is an indispensable resource for researchers and professionals in computer science, rehabilitation science, and clinical engineering. It also serves as a valuable textbook for graduate students in the aforementioned fields.
