Ever since its founding in the 1950s and its subsequent, stellar rise to global prominence, collectors have been fascinated with the singular modeling and attention to detail in Lladro Spanish porcelain figurines. Eventually, collectors discovered that Lladro wasn't just one brand but several. At the same time, other companies began to sprout up all over Spain, particularly around

Lladro's own region in Valencia, working "in the Lladro style" and hoping to catch a ride on the tailwinds of its popularity. This book is written to acquaint readers with retired figurines in all the Lladro and Lladro-affiliated brands and to help distinguish them from the work of other Spanish companies. The book features substantive chapters on the Lladro(r) "core brand," NAO by Lladro, Zaphir, Golden Memories, Rosal, and Hispania, complete with representative photos.

Still run by the Lladro family, the collection continues to grow with Collectors, including Lladro Elite Collection, Lladro Privilege, Inspiration Gaudí Collection, and Gustav Klimt Collection. Nowadays, Lladro porcelains appeal to all kinds of people who appreciate art irrespective of their country of origin, their race or culture. Lladro is active on all five continents through an extensive network of stores chosen for their quality and locations. ILLUSTRATIONS 60 colour and b/w photos

Although Fenton Art Glass was founded in 1905, well after the Victorian era, this family-owned business took much of its artistic inspiration from Victorian forms. Fenton often experimented, throughout its history, with more modernistic forms it thought would appeal to consumer tastes, but it is Fenton's Victorian shapes to which buyers have turned again and again, right up to the 21st century. This book explores one of those forms: the diminutive fairy lamp, used to light dark hallways in big houses before the advent of gaslight and electricity. The book's chapters contain many color photos with full caption descriptions as well as a production table at the end of the book. Readers will learn about the origin and history of the fairy lamp form in Victorian times; Fenton's late 20th century entry into fairy light production; and the many shapes, glass treatments, and glass decorations Fenton used to produce these popular and graceful candle lamps that it called "fairy lights."

Kovel's Guide to Selling, Buying, and Fixing Your Antiques and Collectibles MIT Press

Until it suspended major glass production in 2011, Fenton Art Glass was the oldest extant American glass company, having reached its centennial year in 2005. For more than a century, this family-owned business produced glass in an astonishing array of shapes and colors, including the figurines of various animals, birds, and butterflies featured in this book. Glass figurines have achieved iconic status in American culture, but the Fenton animals are not the delicate spun-glass creations of the famous Tennessee Williams play. They are a different kind of glass

menagerie altogether! Heavy enough to use as paperweights, they serve as a canvas for colors and decoration ranging from the sublime to the whimsical. This book takes the reader on a tour of that amazing world of glass honoring the beasts, birds, and bugs that are so essential a part of our natural world and our human lives.

The Spanish designer and artist Jaime Hayon is a rising star in the international creative scene. It's safe to say that he will be one of the most influential designers in the years to come. Hayon embodies a new type of creative Renaissance man, who thanks to his interdisciplinary approach and extraordinary talent can realize his unique stylistic language across various areas and media. Whether he is creating interior design, furniture, illustration, tableware or decorative vases and ceramics, Hayon's signature style always shines through. Seemingly without effort, his designs coherently bring together diametrical opposites such as opulence

and practicality, sensuality and precision as well as finesse and restraint. This first monograph about Jaime Hayon presents the full spectrum of his work. The book features projects such as his extensive ceramic installation for Bisazza in Milan and the interior design for La Terraza del Casino, an exclusive restaurant in central Madrid, as well as designer toys and furniture, including his award winning bathroom collection, AQHayon. Ranging from clear and harmonious to playfully extravagant, all of the examples attest to his inimitable grasp of form, style and colour. In addition to his impressive body of work, which also includes his collaborations with international clients such as Camper, Swarovski and Lladro³, the book contains new personal projects, sketches, illustrations and productions. Documented by the photographer Nienke Klunder, these previously unpublished works have been exclusively created for Jaime Hayon Works and show facets of Hayon's talent that are revealed here for the first time.

How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In *Speculative Everything*, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.
