 In this benchmark five-volume study,

originally published between 1922 and 1955, Surendranath Dasgupta examines the principal schools of thought that define Indian philosophy. A unifying force greater than art, literature, religion, or science, Professor Dasgupta describes philosophy as the most important achievement of Indian thought, arguing that an understanding of its history is necessary to appreciate the significance and potentialities of India's complex culture. Volume II continues the examination of the Sankara school of Vedanta begun in Volume I, and also addresses the philosophy of the Yoga-Vasistha, speculations in the medical schools, and the philosophy of the Bhagavad-Gita.

This title was first published in 2003. Seven years after Habitat II culminated with the Istanbul agreement on Sustainable Urban Development, this book brings together many of the world's leading experts from the fields of architecture, urban planning, economics, sociology, politics, environment and geography to assess the successes and failures in fulfilling the objectives decided upon at this historic meeting. Illustrated with a wide range of case studies, this volume is divided into three main sections; firstly examining the challenges, secondly, the approaches, and finally, the practices. The book represents a critical appraisal not only of the issues related to urban development but also of the modalities to face these issues from real examples, these in return can be used as starting points to construct new 'real utopias' or at least, to future 'best practices'.

Throughout the European Union, national income tax systems support charitable activities by way of preferential treatment. However, a number of Member States operate relief regimes which appear to trigger the question of compatibility with Union law with respect to the fundamental freedoms. In this first study to examine charity and donor taxation regimes across a wide range of Member States, the author focuses on compatibility with EU non-discrimination law. She examines twenty national regimes, both comparatively and from the perspective of overarching EU law. The countries covered are Austria, Belgium, Bulgaria, Cyprus, Estonia, Finland, Germany, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, The Netherlands,

Poland, Portugal, Slovakia, Spain, Sweden, and the United Kingdom. Although charity and donor taxation falls within the competence of the Member States, they must nonetheless observe primary Union law and grant non-discriminatory treatment where a fact pattern falls within the ambit of the fundamental freedoms. In the course of defining this framework, the study addresses such issues as the following: types of relief schemes maintained for charities and donors; administrative requirements; international aspects (both inbound and outbound); privileged donations and capital gains treatment of in-kind donations; eligible donees; whether and to what extent charitable entities and donors can actually rely on the fundamental freedoms; specific applicability of each of the relevant fundamental freedoms; the issue of comparability; justifications for restrictive measures in Member State practice; and the issue of proportionality.

Vaastu -Shastra is a Vast and ancient science of living. The word Vaastu is derived from the root Vas which means to reside. It is not an equivalent of the word architecture. Vaastu is architecture and much more. While architecture is the science, art or profession of designing and constructing buildings etc., the definition of Vaastu extend into the realm of occultism. Vaastu Shastra, the edifice science of Bhawan Sthapatya Kala, being the applied aspects of ATHARVAVEDA, is an ancient science and one of the eminent features of our heritage. Vaastu means dwelling of Humans and Gods in the original Sanskrit literature. Many factors

govern the life of a human being ; his fate, Karma and surroundings. BUT VAASTU CAN MAKE SWEET THINGS SWEETER AND BITTER LESS BITTER.

Mythologies and Philosophies of Salvation in the Theistic Traditions of India Diamond Pocket Books (P) Ltd.

The first volume of the 15th-century spiritual classic that condenses Buddhist teachings into one easy-to-follow meditation manual *The Great Treatise on the Stages of the Path to Enlightenment* (Tib. Lam rim chen mo) is one of the brightest jewels in the world's treasury of sacred literature. The author, Tsong-kha-pa, completed it in 1402, and it soon became one of the most renowned works of spiritual practice and philosophy in the world of Tibetan Buddhism. Because it condenses all the exoteric sūtra scriptures into a meditation manual that is easy to understand, scholars and practitioners rely on its authoritative presentation as a gateway that leads to a full understanding of the Buddha's teachings. Tsong-kha-pa took great pains to base his insights on classical Indian Buddhist literature, illustrating his points with classical citations as well as with sayings of the masters of the earlier Kadampa tradition. In this way the text demonstrates clearly how Tibetan Buddhism carefully preserved and developed the Indian Buddhist traditions. This first of three volumes covers all the practices that are prerequisite for developing the spirit of enlightenment (bodhicitta).

The title Lankavatara might mean entering Lanka (Perhaps referring to the temporary Mahayana period of Ceylon), suggesting that the doctrine of this scripture are possibly consistent with earlier Buddhism preserved in the Pali language. Suzuki has greatly helped the reader of the basic scripture by discussing the main ideas. He tells how to study this scripture, compares it with the popular Zen Buddhism discusses such typical and important doctrines as Mind-only the Triple body of the Buddha and many minor topics. Suzuki is both an exacting scholar and an understanding exponent of these difficult concepts. He adds a Sanskrit-Chinese-English Glossary, and also an Index. This work is essential for grasping the main ideas of the scripture.

This book provides a comprehensive, critical overview of the developments in architecture from 1960 to 2010. The first section provides a presentation of major movements in architecture after 1960, and the second, a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors, but also charts a middle course between the 'aesthetic' histories that examine architecture solely in terms of its formal aspects, and the more 'ideological' histories that subject it to a critique that

often skirts the discussion of its formal aspects.

A History of Indian Logic (ancient, Mediæval and Modern Schools.)

Vaastu Shaastra is the art and science of living a happy and contented long life. In the modern-day world of high-speed technology, many diseases are arising out of faulty lifestyles. Classical principles of Vaastu Shaastra describe the ancient way of living which need modifications in the present-day context. This book is an intelligent amalgamation of the ancient practice of Vaastu living and modern technologies of house building and architecture. It offers an introduction to Vaastu Shaastra, systematising and standardising its techniques and methodologies. The book has been divided into three sections. The first section has been devoted to the understanding of the key concepts, principles and forces of Vaastu that exert an influence on any given space. The second section of the book reveals how to create heaven on earth; right in your home. It shows how we can achieve internal peace by first achieving external peace in the house. The third section is related to the day-to-day use of Vaastu. One chapter has been devoted to Vaastu of workplace which, in many aspects, is different from residential Vaastu. This book has been written according to the established principles of Vedic Astrology; an inevitable part of Vaastu Shaastra. The effect of the nine planets is considered in Astrology while mainly the effect of planet earth is taken in Vaastu. Astrology depends on dashas (Planetary Periods) while Vaastu depends on dishas (Directions), Jyotish assumes the existence of Kaal Purush (Time Personified) while Vaastu assumes the existence of Vaastu Purush (Space Personified). The book incorporates current knowledge of building science to explain the ancient wisdom of Vaastu Shaastra only to bridge the gap between ancient traditions and modern way of thinking. No attempt has been made to transgress into the other parallel systems known as Feng Shui and Pyramidology, which require totally separate study. The work is meant primarily for those who want to learn Vaastu from the very beginning and pursue it seriously in a scientific manner. The book will also serve as a stepping-stone for those who intend to indulge in hitherto unexplored areas of Vaastu Shaastra like suitability of certain directions for certain activities, hidden meanings of Vaastu Purush; forty-five demi gods; ten dikpalas; three energies and Panchmahabhootas, predicting the

fate of a house and its inhabitants through Vaastu kala, etc.

Religious icons have been a contested terrain across the world. Their implications and understanding travel further than the artistic or the aesthetic and inform contemporary preoccupations. This book traces the lives of religious sculptures beyond the moment of their creation. It lays bare their purpose and evolution by contextualising them in their original architectural or ritual setting while also following their displacement. The work examines how these images may have moved during different spates of temple renovation and acquired new identities by being relocated either within sacred precincts or in private collections and museums, art markets or even desecrated and lost. The book highlights contentious issues in Indian archaeology such as renegotiating identities of religious images, reuse and sharing of sacred space by adherents of different faiths, rebuilding of temples and consequent reinvention of these sites. The author also engages with postcolonial debates surrounding history writing and knowledge creation in British India and how colonial archaeology,

archival practices, official surveys and institutionalisation of museums has influenced the current understanding of religion, sacred space and religious icons. In doing so it bridges the historiographical divide between the ancient and the modern as well as socio-religious practices and their institutional memory and preservation. Drawn from a wide-ranging and interdisciplinary study of religious sculptures, classical texts, colonial archival records, British travelogues, official correspondences and fieldwork, the book will interest scholars and researchers of history, archaeology, religion, art history, museums studies, South Asian studies and Buddhist studies.

Based on exhaustive reference to primary source material, this volume explores the relationships between religious mythologies and religious philosophical system within the theistic traditions in India. Not content merely to explore these relationships, the author further examines the relevance of mythology and philosophy in a discussion of salvation—salvation understood in its sociological, eschatological, and philosophical senses. The treatment of myth and philosophy is comprehensive in scope, pulling together a great variety of sources and commentary, and illuminating them for the Western reader. This study will be of interest both to students of Indian religions and to students of comparative religion interested in creating a context for the discussion of Eastern and Western religions.
