"Entrepreneurial Small Business (ESB) " provides students with a clear vision of small business as it really is today: Katz focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth. Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com or the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

The Entrepreneurial Brain CHANGDER OUTLINE

How can public administration (P.A.) nudge government to govern fundamentally better in terms of policy? How critical is P.A. contemplation and nudges - prods, shoves or hammer blows - to government-in-context? In this book, David John Farmer argues that government-in-context refers to government-in-totality, to what governs even if not called government and to what constrains government action. Constricting contextual features are infiltration, exfiltration and post-truth, raising questions relating to democracy. Infiltration into government is the action of gaining access that benefits big corporations, their owners and billionaires; findings are that it also mal-nudges government action through such elements as big money, lobbying, tax breaks and embrace of the free market. Reacting to factors like growing income inequality, what is explained as exfiltration occurs for middle- and lower-income people. Post-truth is noted as the Oxford Dictionary's word of the year for 2016, describing people concerned less with truths than with opinions. The book analyzes three practical "hammer blow" and 18 "shove" nudges to contradict the mal-nudges. Beyond Public Administration will be of interest to P.A. scholars and graduate students, more

specifically those interested in critical, normative, or interpretive scholarship focused on various aspects of P.A. theory, governance, and practical management.

Business in Black and White provides a panoramic discussion of various initiatives that American presidents have supported to promote black business development in the United States. Many assume that U.S. government interest in promoting black entrepreneurship began with Richard Nixon's establishment of the Office of Minority Business Enterprise (OMBE) in 1969. Drawn from a variety of sources, Robert E. Weems, Jr.'s comprehensive work extends the chronology back to the Coolidge Administration with a compelling discussion of the Commerce Department's "Division of Negro Affairs." Weems deftly illustrates how every administration since Coolidge has addressed the subject of black business development, from campaign promises to initiatives to downright roadblocks. Although the government's influence on black business dwindled during the Eisenhower Administration, Weems points out that the subject was reinvigorated during the Kennedy and Johnson Administrations and, in fact, during the early-to-mid 1960s, when "civil rights" included the right to own and operate commercial enterprises. After Nixon's resignation, support for black business development remained intact, though it met resistance and continues to do so even today. As a historical text with contemporary significance, Business in Black and White is an original contribution to the realms of African American history, the American presidency, and American business history.
