LIN MUHAMMAD

Drug Abuse Curriculum for Employee Assistance Program Professionals Princeton University Press

"This book offers a compelling message of hope and resolve. The authors' three-year journey in a multiplicity of diverse, underperforming, high-poverty schools across the nation has resulted in a treasure chest of knowledge and experiences about how to professionally develop data coaches in ways that benefit some of our most underserved students. This book provides powerful resources to those who have the belief, passion, and desire for implementing collaborative data inquiries in schools and districts." —From the Foreword by Ruth S. Johnson Use data as an effective tool for school change and improvement! How can data coaches create a collaborative culture in which data is used continuously and effectively to improve teaching and learning? The Data Coach's Guide to Improving Learning for All Students provides detailed guidance for helping schools move away from unproductive data practices and toward examining data as a catalyst for systematic and continuous improvement in instruction and student learning. To help both current and aspiring data coaches facilitate school-based data teams and lead teachers in collaborative inquiry, the authors demonstrate a data model that has been field-tested and proven to be effective in: Narrowing achievement gaps between students in all content areas and grade levels Achieving strong, steady gains in local and state assessments in mathematics, science, and reading Using data as a springboard for powerful

conversations about race/ethnicity, class, educational status, gender, and language differences Developing shared values and a vision for creating a high-performing, data-informed school culture This culturally responsive resource benefits staff developers, teachers, and administrators interested in creating change through effective data practices, and includes a CD-ROM keyed to the book, with templates, handouts, PowerPoint slides, resources, and sample goals and agendas.

Designed for students preparing for university, this integrated skills course develops the language and real academic skills essential for successful university studies across disciplines. With authentic lectures and seminars, the course guarantees that the English and the study skills students learn are up to date and relevant to them.

The Gilded Age UNESCO

Widely regarded as a turning point in American independent cinema, Steven Soderbergh's *sex, lies, and videotape* (1989) launched the career of its twenty-six-year-old director, whose debut film was nominated for an Academy Award and went on to win the Cannes Film Festival's top award, the Palme d'Or. The Philosophy of Steven Soderbergh breaks new ground by investigating salient philosophical themes through the unique story lines and innovative approaches to filmmaking that distinguish this celebrated artist. Editors R. Barton Palmer and Steven M. Sanders have brought together leading scholars in philosophy and film studies for the first systematic analysis of Soderbergh's entire body of work, offering the first in-depth

exploration of the philosophical ideas that form the basis of the work of one of the most commercially successful and consistently inventive filmmakers of our time.

The Pocket Instructor: Writing Amnesty International

Fifty easy-to-deploy active learning exercises for teaching academic writing in any field The Pocket Instructor: Writing offers fifty practical exercises for teaching students the core elements of successful academic writing. The exercises—created by faculty from a broad range of disciplines and institutions—are organized along the arc of a writing project, from brainstorming and asking analytical questions to drafting, revising, and sharing work with audiences outside traditional academia. They present students with engaging intellectual challenges to work through together, arriving at generalizable lessons that transfer well across the humanities, social sciences, and natural sciences. Students will learn to articulate a thoughtful question, develop a persuasive thesis, analyze complex evidence, and engage responsibly with sources. The Pocket Instructor: Writing offers teachers concrete ideas about how to cultivate habits of radical revision and create a classroom community with an ethos of trust where students learn to give meaningful feedback. Written for both novice and veteran instructors, this essential guide will benefit faculty in any field who hope to improve student writing in their courses. Key features:

- Exercises by experienced faculty from a wide range of disciplines and institutions
- Step-by-step instructions with instructor insights for each exercise
- A “Writing Lexicon” for terms such as motive, thesis, analysis, evidence, and method
- Guidance for avoiding plagiarism
- Index and cross-references to aid in course planning

Climate Change in the Classroom: Secondary Teacher Education Course on Climate Change Education for Sustainable Development Cambridge University Press

This book offers a comprehensive treatment approach for Rumination Syndrome, for use with children, adolescents, and adults. With evidence backing its use, Cognitive-Behavioral Therapy for RS (CBT-RS), is designed for clinicians (behavioral health or medical) to use with patients in their own clinical settings.

Student Handouts Corwin

In a world plagued by religious conflict, how can the various religious and secular traditions coexist peacefully on the planet? And, what role does sociology play in helping us understand the state of religious life in a globalizing world? In the Fourth Edition of *Gods in the Global Village*, author Lester Kurtz continues to address these questions. This text is an engaging, thought-provoking examination of the relationships among the major faith traditions that inform the thinking and ethical standards of most people in the emerging global social order. Thoroughly updated to reflect recent events, the book discusses the role of religion in our daily lives and global politics, and the ways in which religion is both an agent of, and barrier to, social change.

Helping Families Manage Childhood OCD University Press of Kentucky

Me ‘n’ Mine Pullout Worksheets English is a complete practice material for students in the form of worksheets through which they can revise concepts and identify the areas of improvement. Assessment of all the topics can be comprehensively done through these sets. The series also comprises solved and unsolved practice papers as per latest CBSE syllabus and guidelines. Along with the basic exercises the series also comprises various elements of the formative assessment like puzzles, crosswords, projects, etc.

Cuban Refugee Problem Social Studies

"Involving students in real historical problems that convey powerful lessons about U.S. history, these thought-provoking activities combine core content with valuable practice in decision making, critical thinking, and understanding multiple perspectives. O'Reilly - an experienced, award winning teacher - has students tackle fascinating historical questions that put students in the shoes of a range of people from the past, from the rich and famous to ordinary citizens. Each lesson can be done either as an in-depth activity or as a "quick motivator." Detailed teacher pages give step-by-step instructions, list key vocabulary terms, offer troubleshooting tips, present ideas for post-activity discussions, and furnish lists of related sources. Reproducible student handouts clearly lay out the decision-making scenarios, provide "outcomes," and present related primary source readings and/or images with analysis questions"--Page 4 of cover

Gender Issues in Jewish Day Schools Saraswati House Pvt Ltd

Identifies the critical issues and information needs of the field and to develop a training program which was responsive to the identified needs.

Designed to assist employee assistance program (EAP) professionals in understanding and addressing employee drug abuse problems.

Behavioral Therapy for Rural Substance Abusers Springer

This collection of qualitative case studies demonstrates how social groups create opposing symbolic meanings of Nature during conflict over wildlife issues. It highlights the untapped utility of constructionist approaches for understanding how different meanings can ultimately affect wildlife and people.

The original title for this work was “Mathematical Literacy, What Is It and Why You Need it”. The current title reflects that there can be no real learning in any subject, unless questions of who, what, when, where, why and how are raised in the minds of the learners. The book is not a mathematical text, and there are no assigned exercises or exams. It is written for reasonably intelligent and curious individuals, both those who value mathematics, aware of its many important applications and others who have been inappropriately exposed to mathematics, leading to indifference to the subject, fear and even loathing. These feelings are all consequences of meaningless presentations, drill, rote learning and being lost as the purpose of what is being studied. Mathematics education needs a radical reform. There is more than one way to accomplish this. Here the author presents his approach of wrapping mathematical ideas in a story. To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them. What is necessary to be mathematically literate? It’s not about solving algebraic equations or even making a geometric proof. These are valuable skills but not evidence of literacy. We often seek answers but learning to ask pertinent questions is the road to mathematical literacy. Here is the good news: new mathematical ideas have a way of finding applications. This is known as “the unreasonable effectiveness of mathematics.”

Cambridge Academic English B1+ Intermediate Teacher's Book Bookboon

What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Decision-making and Problem Solving SAGE Publications

Helping Families Manage Childhood OCD provides clinicians with a comprehensive set of strategies for identifying and intervening with family dynamics that are likely to interfere with successful treatment of pediatric OCD.

Mad about Wildlife Jones & Bartlett Learning

This curriculum is intended to further thoughtful examination and responsible action among high school students about lesbian, gay, bisexual, and transgender (LGBT) issues. Unlike other curricula this discussion is not in the context of civil or political rights but in the broader context of human rights. These rights, as defined in the Universal Declaration of Human Rights, include, among others, the right to education, identity, security, assembly, expression, employment, health, and family--all relevant to the current discussion of LGBT rights. The activities in the curriculum promote appropriate action in addition to reflection and discussion. Students are asked to take responsibility for the homophobia that causes human rights abuses. The curriculum aims to prepare students for responding in meaningful ways to such abuses. It is divided into the following parts: "Part 1: Introduction"; "Part 2: Activities" contains: (1) "Words Really Matter: Examining Language at School"; (2) "Are Gay Rights Special? What Does the Universal Declaration of Human Rights Say?"; (3) "What If Things Were Different: Charting the Effects of Change"; (4) "Is It a Crime To Be Gay? Debating Tolerance in a New Democracy"; (5) "What Must Be Done To Achieve Equality? Evaluating Different Approaches"; (6) "I Now Pronounce You...Same-Sex Marriage Legislation"; (7) "Youth Dealing with Homophobia: Stories from Real Life"; (8) "Rights Abuses around the World: What Can We Do?"; and (9) "Taking the Human Rights Temperatures of Your School"; and "Part 3: Appendices" contains: "The Universal Declaration of Human Rights" and "Resources." (Contains a resource list of 30 books, 12 videos, and 11 Web sites.) (BT)
