As Information Management put it, "On the strength of its currency and coverage alone, Franks' book is poised to take over as the recommended go-to reference for both students and RIM professionals for many years to come." The new second edition cements this work's status as an up-to-date classic, its content updated and expanded to address emerging technologies, most notably blockchain, and evolving standards and practices. Inside, Franks presents complete coverage of the records and information lifecycle model, encompassing paper, electronic (databases, office suites, email), and new media records (blogs, chat messages, and software as a service). Informed by an advisory board of experts in the field and with contributions by noted authorities, the text addresses such key topics as the origins and development of records and information; the discipline of information governance and developing a strategic records management plan; creation/capture and classification; retention strategies, inactive records management, archives, and long-term preservation; access, storage, and retrieval; electronic records and electronic records management systems; the latest on rapidly evolving technologies such as web records, social media, and mobile devices; vital records, disaster preparedness and recovery, and business continuity; monitoring, auditing, and risk management; and education and training. This book's authoritative blend of theory and practice makes it a matchless resource for everyone in the archives and records management field. Instructor/trainer extras include a set of ready-to-go, customizable PowerPoint slides to accompany the text. Examination copies are available for instructors who are interested in adopting this title for course use.

This book offers both marketing and sales professionals a rare combined insight into both worlds to continuously capture customer intelligence and create value, by blending detailed research with academic rigor and commercial experience of the authors in both Europe and North America. It has never been easier to produce great marketing content and sales collateral. And yet, 90% of the content that marketing produces is NEVER used by sales. Why not? Because it's not relevant to the audience or the prospect doesn't even know the content exists. Furthermore 58% of deals end up in "no decision" because Sales has not presented value effectively. Companies are creating lots of noise but failing to resonate with the customers. So what? The danger, aside from marketing wasting tens of millions of dollars on ineffective content and tools, is that customers will disengage.

94% of prospects say they have completely disengaged with vendors because of irrelevant content. In order to grow fast, the authors argue, Sales and Marketing teams need to slow down. They need to work together to truly understand their customers' needs, wants, motivations and pain points so that they can offer customized "value". The book sets out how to establish a formal program to continuously capture customer intelligence and insights - the shiny gems of understanding that help prospects to connect the dots - so that value can be consistently articulated in marketing and sales conversations. By integrating the best ideas and practice from commercial experience and academic research the authors show how to create value across the entire marketing and sales value chain - not only get a new customer, but to continue to create value for future purchases by creating "post-sales" value.

In this important, entertaining book, one of the world's most celebrated psychologists, Martin Seligman, asserts that happiness can be learned and cultivated, and that everyone has the power to inject real joy into their lives. In *Authentic Happiness*, he describes the 24 strengths and virtues unique to the human psyche. Each of us, it seems, has at least five of these attributes, and can build on them to identify and develop to our maximum potential. By incorporating these strengths - which include kindness, originality, humour, optimism, curiosity, enthusiasm and generosity -- into our everyday lives, he tells us, we can reach new levels of optimism, happiness and productivity. *Authentic Happiness* provides a variety of tests and unique assessment tools to enable readers to discover and deploy those strengths at work, in love and in raising children. By accessing the very best in ourselves, we can improve the world around us and achieve new and lasting levels of authentic contentment and joy.

"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--

however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter,

with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life. *Report of the Executive Council of Iowa of Expenses and Disposition of Fees and Moneys Collected by State Officers and Departments for the Period from ...*
