Of all the photographs in *Country Life's* archives, none are more poignant or intriguing than the images of houses that have been lost. This text puts the lost country houses of England in historical context and explains why so many were destroyed.

Lost Country Houses of Norfolk Boydell & Brewer

This engaging and beautifully illustrated book takes us back to the domestic world of the landed gentry in seventeenth-century England. Relating countless stories and case histories drawn from a wide range of primary sources, the book describes the physical environment, staffing, and functioning of gentry households, the inhabitants and their activities, and the role of these houses in the social and economic life of their

localities. J. T. Cliffe begins by exploring the exterior and interior of houses and the outbuildings, parks, and gardens that surrounded them. He then investigates the people who lived in the country houses and the relationships between them. He provides colourful details about the responsibilities of the squire and his wife; the duties, remuneration, food, clothing, accommodation, and treatment of servants; and the special duties of estate stewards, coachmen, chaplains, and tutors. Cliffe explains various aspects of housekeeping, such as the tradition of hospitality and the factors militating against it. He also discusses other kinds of activity: religious practices; outdoor sports and indoor pastimes, including music and billiards; and such intellectual pursuits as antiquarian research, poetry, and scientific experiments. He concludes with a fascinating survey of scandal in the world of the gentry, telling of domestic strife, financial disaster, lunacy, and other disasters that marred this idyllic existence.

History, Gazetteer, and Directory of Norfolk, and the City and County of the City of Norwich Yale University Press

A stunning visual record of England's most spectacular and scenic country estates that were broken up for sale and lost for ever. A sweeping country estate, with grand house and spectacular gardens and park, would not be the first impression of a visitor to modern suburban Watford. But well into the twentieth century that was exactly what was there - the magnificence of the Cassiobury estate, of which only a modest municipal park survives.

Underneath the expanse of Rutland Water lies the once splendid Normanton estate, while Deepdene in Surrey is now memorialised only by an ugly office block.

Fortunately, at least photographs live on to remind us of how the landscape looked before death duties, mining subsidence and sometimes the plain impecuniousness of the black sheep in the family took their toll and forced the break-up of all too many historic landed estates. In this elegiac book, a successor to Aurum's *Lost Victorian Britain*, John Robinson surveys 20 of the most egregious losses, from Costessy in East Anglia to Lathom in Lancashire, and shows how the deer park, the home farm, the parterre and the cottage garden gave way to the power station, the motorway and the caravan park.

Britain's stately homes and grand houses are among its greatest treasures, and *The Most Amazing Stately Homes*

in Britain brings you the grandest, most magnificent, eccentric and unusual of them all. This wonderfully illustrated regional touring guide describes each house and tells its story, following the ebb and flow of fortune and fame. Every house has something that sets it apart from the rest: the magnificent four-storey Tudor tower (set in world famous gardens) of Sissinghurst in Kent; sumptuous painted cloth wall hangings of romantic Owlpen Manor in Gloucestershire; superb topiary at Levens Hall in Cumbria; sinister myths of Blickling Hall in Norfolk and the enchanting Great Garden of Edzell Castle in Scotland, created in 1604 to stimulate the mind and the senses. Discover ancient deer parks; exquisite collections of furniture, national treasures and breathtaking views, to enjoy season-by-season and year-round. The cover features Chatsworth in Derbyshire, one of Britain's most famous historic houses and the fastest-growing paid-for visitor attraction in 2010* with more than 716,000 visitors. In May 2012 Chatsworth featured in a popular three-part BBC1 documentary covering a year behind the scenes of the house and estate.

Holkham Hall is a masterpiece of eighteenth-century Palladian architecture set in a large walled park bordered by the marshes and dunes of the North Norfolk coast. Built, owned and occupied by the Coke family since 1612, it is at the centre of a major agricultural estate; a treasure house whose paintings, classical sculpture, books, manuscripts and furniture are of international importance. Using the extensive documents kept by generations of staff and family, recording the daily life of the Hall and estate, Christine Hiskey has traced Holkham's history through four hundred years, adding considerably to existing knowledge. Surviving vicissitudes and accumulating property, the Coke family were able to establish themselves at Holkham in the seventeenth century. The vision of Thomas Coke, later 1st Earl of Leicester, inspired by his exceptionally fruitful Grand Tour, resulted in his spending twenty-five years in the mid-eighteenth century, building and furnishing the Hall, and Christine Hiskey records the work of the staff and craftsmen who brought his ideas to reality: the sourcing of materials, his application

of advanced domestic technology, and, after his death, the dedication of his widow to completing his life's work. During the next 250 years, the Hall adapted to changing fashions, aspirations and economic circumstances in its domestic, social and public life.

Life in the English Country House Clarkson Potter

Accessibly written, and with over 300 watercolour illustrations, *Building Norfolk* is an illustrated history of Norfolk's buildings, up to the present day. In the middle ages, Norfolk was one of England's most powerful regions, with Norwich the second biggest city in the British Isles. But by the time of the industrial revolution Norfolk was something of a backwater, and the transformations of this period passed it by. As a result, there is a higher density of old buildings left in Norfolk than anywhere else in Britain, and *Building Norfolk* does full justice to this extraordinary heritage of barns, farms, manor houses, villages, market towns, stone walls, churches and the great houses of *Holkham* and *Houghton*. But the book is not only about the past. Matthew Rice passionately believes in the value of

earlier, local, solutions in addressing the challenges of future development. In its final quarter, his book becomes a plea for a well-mannered, intelligent modern interpretation of vernacular architecture, and concludes with a proposal for *Worsted*, a new town to built following the lessons of generations of Norfolk builders. Rice's support of Prince Charles' new town of *Poundbury* and his criticism of the current state of planning in Norfolk are sure to attract attention and controversy. The Story of the Country House Studies in Imperialism

Building or rebuilding their houses was one of the main concerns of the English nobility and gentry, some might say their greatest achievement. This is the first book to look at the building of country houses as a whole. *Creating Paradise* shows why owners embarked on building programmes, often following the Grand Tour or excursions around other houses in England; where they looked for architectural inspiration and assistance; and how the building was actually done. It deals not only with great houses, including *Holkham* and *Castle Howard*, but also the diversity of smaller ones such as *Felbrigg*

and *Dyrham*, and shows the cost not only of building but of decorating and furnishing houses and of making their gardens. *Creating Paradise* is an important and original contribution to its subject and a highly readable account of the attitude of the English ruling class to its most important

The fascinating story of the evolution of the country house in Britain, from its Roman precursors to the present *The Story of the Country House* is an authoritative and vivid account of the British country house, exploring how they have evolved with the changing political and economic landscape. Clive Aslet reveals the captivating stories behind individual houses, their architects, and occupants, and paints a vivid picture of the wider context in which the country house in Britain flourished and subsequently fell into decline before enjoying a renaissance in the twenty-first century. The genesis, style, and purpose of architectural masterpieces such as *Hardwick Hall*, *Hatfield House*, and *Chatsworth* are explored, alongside the

numerous country houses lost to war and economic decline. We also meet a cavalcade of characters, owners with all their dynastic obsessions and diverse sources of wealth, and architects such as Inigo Jones, Sir John Vanbrugh, Robert Adam, Sir John Soane and A.W.N. Pugin, who dazzled or in some cases outraged their contemporaries. *The Story of the Country House* takes a fresh look at this enduringly popular building type, exploring why it continues to hold such fascination for us today.

The story of how the country house, historically a site of violent disruption, came to symbolize English stability during the eighteenth century. Country houses are quintessentially English, not only architecturally but also in that they embody national values of continuity and insularity. The English country house, however, has more often been the site of violent disruption than continuous peace. So how is it that the country how came to represent an uncomplicated, nostalgic vision of English history? This book explores the evolution of the country

house, beginning with the Reformation and Civil War, and shows how the political events of the eighteenth century, which culminated in the reaction against the French Revolution, led to country houses being recast as symbols of England's political stability.

Beginning with new evidence that cites the presence of books in Roman villas and concluding with present day vicissitudes of collecting, this generously illustrated book presents a complete survey of British and Irish country house libraries. Replete with engaging anecdotes about owners and librarians, the book features fascinating

information on acquisition bordering on obsession, the process of designing library architecture, and the care (and neglect) of collections. The author also disputes the notion that these libraries were merely for show, arguing that many of them were profoundly scholarly, assembled with meticulous care, and frequently used for intellectual pursuits. For those who love

books and the libraries in which they are collected and stored, The Country House Library is an essential volume to own.
