Implementing SAP HANA SAP PRESS

In modern architectures, business rules are modeled and maintained in central engines. But how can you modify existing rules or develop your own? How can these rules be integrated into the applications? BRFplus is the tool of choice for developing business rules in ABAP. This book introduces BRFplus in all its aspects. It explains the tool's architecture and how its rules are structured. You will learn how to modify and develop rules, how to incorporate them into your own landscape, and how to extend BRFplus. Including extensive examples and tutorials, this book is a one-stop resource for developers as well as business analysts. 1. BRFplus Walk-Through and Tutorial Get started with a complete tour through all Workbench tools, follow the development cycle, and learn how to create applications in the Workbench or via the API. 2. Objects Learn how to define, use, and link objects to each other, and benefit from a comprehensive reference for all object types, such as expressions, actions, and more. 3. Tools, Deployment, and Administration The book covers the entire development cycle: Imports and exports, transports, administration, as well as remote and local scenarios, are all dealt with in detail. 4. Advanced Topics Once your applications are deployed, you'll want to tune them: Find out how to enhance performance, trace processing, extend BRFplus' functionality, and integrate it into custom user interfaces. Highlights: Business rules and business rules management (BRM) Object management Objects: functions, data objects, rules and rulesets, expression and action types Tools and administration Advanced topics: performance, tracing, extending BRFplus, UI integration Deployment and methodology

SAP BW: Administration and Performance Optimization SAP PRESS

The definitive reference for building actionable business intelligence—completely revised for SAP BusinessObjects BI 4.0. Unleash the full potential of business intelligence with fact-based decisions, aligned to business goals, using reports and dashboards that lead from insight to action. SAP

BusinessObjects BI 4.0: The Complete Reference offers completely updated coverage of the latest BI platform. Find out how to work with the new Information Design Tool to create universes that access multiple data sources and SAP BW. See how to translate complex business questions into highly efficient Web Intelligence queries and publish your results to the BI Launchpad. Learn how to create dashboards from data sourced through a universe or spreadsheet. The most important concepts for universe designers, report and dashboard authors, and business analysts are fully explained and illustrated by screenshots, diagrams, and step-by-step instructions. Establish and evolve BI goals Maximize your BI investments by offering the right module to the right user Create robust universes with the Information Design Tool, leveraging multiple data sources, derived tables, aggregate awareness, and parameters Develop a security plan that is scalable and flexible Design Web Intelligence reports from basic to advanced Create sophisticated calculations and advanced formatting to highlight critical business trends Build powerful dashboards to embed in PowerPoint or the BI Launchpad Use Explorer to visually navigate large data sets and uncover patterns

Efficient SAP NetWeaver BI Implementation and Project Management SAP Press

Manage your data landscape with SAP Data Intelligence! Begin by understanding its architecture and capabilities and then see how to set up and install SAP Data Intelligence with step-by-step instructions. Walk through SAP Data Intelligence applications and learn how to use them for data governance, orchestration, and machine learning. Integrate with ABAP-based systems, SAP Vora, SAP Analytics Cloud, and more. Manage, secure, and operate SAP Data Intelligence with this all-in-one guide! In this book, you'll learn about: a. Configuration Build your SAP Data Intelligence landscape! Use SAP Cloud Appliance Library for cloud deployment, including provisioning, sizing, and accessing the launchpad. Perform on-premise installations using tools like the maintenance planner. b. Capabilities Put the core capabilities of SAP Data Intelligence to work! Manage and govern your data with the metadata explorer, use the modeler application to create data processing pipelines, create apps with the Jupyter Notebook, and more. c. Integration and Administration Integrate, manage, and operate SAP Data Intelligence! Get step-by-step instructions for integration with SAP and non-SAP systems. Learn about key administration tasks and make sure your landscape is secure and running smoothly. Highlights include: 1) Configuration and installation 2) Data governance 3) Data processing pipelines 4) Docker images 5) ML Scenario Manager 6) Jupyter Notebook 7) Python SDK 8) Integration 9) Administration 10) Security 11) Application lifecycle management 12) Use cases

Implementing SAP Business Planning and Consolidation McGraw Hill Professional

This book helps you navigate past a wide range of potential pitfalls to ensure a largely problem-free BW implementation. Using a lessons-learned approach, the author highlights critical BW project-related issues from the start of an implementation to the end. Readers discover how to eliminate problems before they occur, by preparing for them from the outset. Learn about common BW mistakes, find out how to avoid them and understand how successful BW projects can be executed. Readers of this comprehensive reference get unparalleled advice to run your BW project efficiently, while circumventing major delays and common stumbling blocks. In addition, you'll benefit from the experience of others via sample documents such as review checklists, communications documents, and landscape and architecture documents. This book is highly valuable for those implementing BI NetWeaver 2004s (7.0) as well as 3.x.

SAP Business One: Business User Guide SAP PRESS

Are you the master of your UNX universes? Written for design novices and experts alike, this comprehensive resource spans universe creation to universe publication. You'll learn to build single- and multisource data foundations and business layers and to convert UNV to UNX using the new Information Design Tool (as well as explore its important features and functionalities). Up to date for SAP BusinessObjects Business Intelligence 4.1, this book offers the step-by-step instructions and guiding screenshots you need to design universes for the world.

BRFplus SAP PRESS

Become an expert on SAP BusinessObjects Advanced Analysis for Microsoft Office (formerly known as Pioneer) and be the go-to person when it comes to installing, deploying, and using this software. Explore how Advanced Analysis greatly reduces the need for specialized design work, but allows

users to make simple design and UI changes with ease, elegant visualization control, and personalization features. Additionally, this book provides targeted guidance on installation, deployment, and data connectivity. The author helps you familiarize yourself with both basic and advanced usage scenarios as you learn to customize the software to benefit your business the most. This unique book also delivers a side-by-side comparison of Advanced Analysis Office with SAP BEx Analyzer, which will prove to be invaluable as Advanced Analysis is positioned to replace the BEx tools. An additional section outlines the main topics in the SAP BI roadmap for the Advanced Analysis Office version and the Web version, and also touches upon migration. Whether you are a consultant, IT manager, business analyst, or a key user, you will find this book to be an indispensable companion in your daily work with the software.
