Nonfiction. "This is not just the biography of a talented jazz musician, but a fascinating chronicle of the trials, tribulations, and triumphs of a few committed individuals who tried to create beauty in a land of hostility and segregation. Chris McGregor understood that music is more than an organization of sound, it is a measure of human relationships, and can be used to inspire and exhilarate as well as heal. Maxine McGregor's vivid descriptions of their world, and the many passages in Chris's own words, give us insight into the mind of a man for whom music was as natural and necessary as the air we breathe"--Art Lange (co-editor of *Moment's Notice: Jazz in Poetry and Prose*).

Robert Lehman (1891-1969), one of the foremost art collectors of his generation, embraced the work of both traditional and modern masters. This volume catalogues 130 nineteenth- and twentieth-century paintings that are now part of the Robert Lehman Collection at The Metropolitan Museum of Art. The majority of the works are by artists based in France, but there are also examples from the United States, Latin America, and India, reflecting Lehman's global interests. The catalogue opens with outstanding paintings by Ingres, Théodore Rousseau, and Corot, among other early nineteenth-century artists. They are joined by an exemplary selection of Impressionist and Post-Impressionist works by Degas, Renoir, Sisley, Pissarro, Seurat, Signac, Van Gogh, Cézanne, and Gauguin. Twentieth-century masters represented here include Bonnard, Matisse, Rouault, Dalí, and Balthus. There are also newly researched modern works by Vicente do Rego Monteiro, Kees van Dongen, Dietz Edzard, and D.G. Kulkarni (dizi). Robert Lehman's cultivated taste for nineteenth-century French academic practitioners and his intuitive eye for emerging young artists of his own time are documented and discussed. Three hundred comparative illustrations supplement the catalogue entries, as do extensively researched provenance information, exhibition histories, and references. The volume also includes a bibliography and indexes.

**The Adventures of Captain Mago** Springer Science & Business Media

This edited volume brings together the latest research on fictive interaction, that is the use of the frame of ordinary conversation as a means to structure cognition (talking to oneself), discourse (monologues organized as dialogues), and grammar ("why me? attitude"). This follows prior work on the subject by Esther Pascual and other authors, most of whom are also contributors to this volume. The 17 chapters in the volume explore fictive interaction as a fundamental cognitive phenomenon, as a ubiquitous discourse-structuring device, as a possibly universal linguistic construction, and as an effective communicative strategy in persuasion and language pathology. The data discussed involve a wide variety of unrelated languages (spoken and signed) and modes of communication (oral, written, visual), across cultural contexts and historical time. The research presented combines linguistics and cognitive science, while bridging the gap between core grammatical studies and modern conversation and discourse analysis. The volume further reaches across what may be the most basic divide in linguistics: that between descriptive,

theoretical, and applied linguistics.

Late Capitalism is the first major synthesis to have been produced by the contemporary revival of Marxist economics. It represents, in fact, the only systematic attempt so far ever made to combine the general theory of the "laws of motion" of the capitalist mode of production developed by Marx, with the concrete history of capitalism in the twentieth century. Mandel's book starts with a challenging discussion of the appropriate methods for studying the capitalist economies. He seeks to show why the classical approaches of Luxemburg, Bukharin, Bauer and Grossman failed to accomplish the further development of Marxist theory whose urgency became evident after Marx's death. He then sketches the

structure of the world market and the variant types of surplus-profit that have characterized its successive stages. On these foundations Late Capitalism proceeds to advance an extremely bold schema of the "long waves" of expansion and contraction in the history of capitalism, from the Napoleonic Wars to the present. Mandel criticizes and refines Kondratieff's famous use of the notion. Mandel's book surveys in turn the main economic characteristics of late capitalism as it has emerged in the contemporary period. The last expansionary long wave, it argues, started with the victory of fascism on the European continent and the advent of the war economies in the US and UK during the 1940s, and produced the record world boom of 1947-72. Mandel discusses the reasons why the dynamic upswing of growth in this period was bound to reach its limits at the turn of the 1970s, and why a long wave of economic stagnation and intensified class struggle has set in today. Late Capitalism is a landmark in Marxist economic literature. Specifically designed to explain the international recession of the 1970s, it is a central guide to understanding the nature of the world economic crisis today.

"The Accumulation of Capital" is a seminal work by Rosa Luxemburg, a Marxist revolutionary and theorist, originally published in 1913. This book is a significant contribution to Marxist economic theory and political economy, particularly in the context of imperialism and the dynamics of capitalist expansion. Luxemburg's work is notable for its critical engagement with the ideas of other prominent Marxist thinkers of her time, such as Karl Marx and Vladimir Lenin. Key themes and concepts explored in "The Accumulation of Capital" include: The Reproduction of Capitalism: Luxemburg delves into the question of how capitalism continuously reproduces itself. She argues that capitalism needs to expand into non-capitalist markets to avoid stagnation and crises. According to her, the capitalist system cannot exist in isolation; it relies on external markets for its continued growth. Imperialism: Luxemburg's work connects imperialism to the expansion of capitalism. She argues that imperialist powers, such as European colonial empires, played a crucial role in absorbing surplus capital and commodities produced by the advanced capitalist nations. This expansion, she contends, was a way to counter the inherent contradictions of capitalism. Trade and Dependency: Luxemburg emphasizes the role of international trade and the dependence of capitalist economies on non-capitalist regions. She argues that capitalist countries exploit non-capitalist regions economically and politically, perpetuating a global system of inequality. Crisis Theory: Luxemburg's analysis of capitalist reproduction leads her to a crisis theory. She suggests that periodic economic crises are inherent to capitalism because, eventually, it runs out of external markets to exploit. These crises, in her view, would ultimately lead to the system's downfall. Political Implications: Luxemburg's work has significant political implications. She believed that it was necessary for the working class to engage in revolutionary struggle and overthrow capitalism, as reforms within the system could not resolve its fundamental contradictions. This aligns with her revolutionary Marxist stance. While Luxemburg's book is highly regarded for its innovative insights into the dynamics of capitalism and imperialism, her ideas have been subject to criticism and debate within the Marxist tradition. Her work remains influential in discussions surrounding political economy, imperialism, and the global capitalist system. Despite its age, "The Accumulation of Capital" remains a cornerstone of Marxist theory and a valuable resource for those interested in understanding the complexities of capitalism and imperialism.
