This book is a collection of ideas, activities and approaches for science learning, to support kids with learning differences aged 9+ to grow in confidence, recall and understanding. The multi-sensory and fun ideas and activities can be adapted to suit individual students' needs and skills, and curriculum stage. Written by an experienced science teacher, the book includes mnemonics, art, drama and poetry activities, board games, card games, and more. All of these strategies will aid neurodiverse students' science learning and memory through boosting their creative thinking, encouraging a play-based and exploratory approach to science. Whether you want to get creative, play a game or try out a fun experiment, you can dip in and out of the activities to suit your student's unique learning style. The activities in the book will help creative thinkers who learn differently to take alternative approaches to tricky topics, grasping a fundamental understanding of key scientific concepts, whilst gaining confidence as the scientists of tomorrow.

The Short and Tragic Life of Robert

Peace Taylor & Francis

Contemporary Fairy-Tale Magic, edited by Lydia Brugué and Auba Llompart, studies the impact of fairy tales on contemporary cultures from an interdisciplinary perspective, with special emphasis on how literature and film are retelling classic fairy tales for modern audiences. We are currently witnessing a resurgence of fairy tales and fairy-tale characters and motifs in art and popular culture, as well as an increasing and renewed interest in reinventing and subverting these narratives to adapt them to the expectations and needs of the contemporary public. The collected essays also observe how the influence of academic disciplines like Gender Studies and current literary and cinematic trends play an important part in the revision of fairy-tale plots, characters and themes. *Hollywood on Hollywood* Jessica Kingsley Publishers

A biography of a young African-American man who escaped the slums of Newark for Yale University only to succumb to the dangers of the streets when he returned home.

The Oxford Handbook of Dance and the Popular Screen PediaPress

This book explores Andy Warhol's creative engagement with social class. During the 1960s, as neoliberalism perpetuated the idea that fixed classes were a mirage and status an individual achievement, Warhol's work appropriated images, techniques, and technologies that have long been described as generically "American" or "middle class." Drawing on archival and theoretical research into Warhol's contemporary cultural milieu, Grudin demonstrates that these features of Warhol's work were in fact closely associated with the American working

class. The emergent technologies Warhol conspicuously employed to make his work—home projectors, tape recorders, film and still cameras—were advertised directly to the working class as new opportunities for cultural participation. What's more, some of Warhol's most iconic subjects—Campbell's soup, Brillo pads, Coca-Cola—were similarly targeted, since working-class Americans, under threat from a variety of directions, were thought to desire the security and confidence offered by national brands. Having propelled himself from an impoverished childhood in Pittsburgh to the heights of Madison Avenue, Warhol knew both sides of this equation: the intense appeal that popular culture held for working-class audiences and the ways in which the advertising industry hoped to harness this appeal in the face of growing middle-class skepticism regarding manipulative marketing. Warhol was fascinated by these promises of egalitarian individualism and mobility, which could be profound and deceptive, generative and paralyzing, charged with strange forms of desire. By tracing its intersections with various forms of popular culture, including film, music, and television, Grudin shows us how Warhol's work disseminated these promises, while also providing a record of their intricate tensions and transformations.

In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Warhol's Working Class American Library

Association

Drawing on the idea of powerful knowledge, this book interrogates the epistemic quality of education in schools, in terms of what students are expected to know, make sense of and be able to do through the curriculum. In doing so the authors acknowledge the significance of transformation processes through which specialized knowledge, developed in subject disciplines, is reshaped and re-presented in educational environments. Moving beyond the narrow knowledge vs skills debate of the 20th century, the authors look at how we might democratise and open up access to 'knowledge of the powerful' for all through the school curriculum. Arising from the work of the Knowledge and Quality across School Subjects and Teacher Education network (KOSS), funded by the Swedish Research Council (2019-22), this book draws on studies conducted in a range of national contexts, including from Finland, France, Germany, Norway, Sweden and the UK, and considers the implications for curriculum innovation at policy, programmatic and classroom level.

While international negotiations to reduce greenhouse gas (GHG) emissions have been less than satisfactory, there is a presumption that a significant level of multi-lateral commitment will be realized at some point. International air and marine travel have been left to one side in past talks because the pursuit of agreement proceeds on the basis of commitment by sovereign nations and the effects of these specific commercial activities are, by their nature, difficult to corral and assign to specific national jurisdictions. However, air travel is increasing and, unless something is done, emissions from this segment of

our world economy will form a progressively larger percentage of the total, especially as emissions fall in other activities. This book focuses on fuel. The aim is to provide background in technical and policy terms, from the broadest reliable sources of information available, for the necessary discourse on society's reaction to the evolving aviation emissions profile. It considers what policy has been, why and how commercial air travel is committed to its current liquid fuel, how that fuel can be made without using fossil-source materials, and the barriers to change. It also advances some elements of policy remedies that make sense in providing an environmentally and economically sound way forward in a context that comprehends a more complete vision of sustainability than 'renewable fuels' traditionally have. The goal of *Will Sustainability Fly?* is to broaden and contextualize the knowledge resource available to academics, policy makers, air industry leaders and stakeholders, and interested members of the public.

My Body Belongs to Me CRC Press
This two volume textbook is a practical guide to echocardiography for trainees. Divided into seven sections, the book begins with an introduction to the history and basics of echocardiography. The second section explains how to perform different types of echocardiograph. Each of the following sections examines echocardiography and its interpretation for various groups of heart diseases, whilst the final section describes the use of the technique for more general non-invasive procedures, including in systemic diseases, in life threatening conditions and for geriatric patients. Edited by internationally-recognised Dr Navin Nanda from the University of Alabama at Birmingham, US, this

comprehensive manual includes more than 1150 echocardiographic images and illustrations. Key points

The Oxford Handbook of Dance and the Popular Screen sets the agenda for the study of dance in popular moving images - films, television shows, commercials, music videos, and YouTube - and offers new ways to understand the multi-layered meanings of the dancing body by engaging with methodologies from critical dance studies, performance studies, and film/media analysis. Through thorough engagement with these approaches, the chapters demonstrate how dance on the popular screen might be read and considered through bodies and choreographies in moving media. Questions the contributors consider include: How do dance and choreography function within the filmic apparatus? What types of

bodies are associated with specific dances and how does this affect how dance(s) is/are perceived in the everyday? How do the dancing bodies on screen negotiate power, access, and agency? How are multiple choreographies of identity (e.g., race, class, gender, sexuality, and nation) set in motion through the narrative, dancing bodies, and/or dance style? What types of corporeal labors (dance training, choreographic skill, rehearsal, the constructed notion of "natural talent") are represented or ignored? What role does a specific film have in the genealogy of Hollywood dance film? How does the Hollywood dance film inform how dance operates in making cultural meanings? Whether looking at Bill "Bojangles" Robinson's tap steps in *Stormy Weather*, or Baby's leap into Johnny Castle's arms in *Dirty Dancing*, or even Neo's backwards bend in *The Matrix*, the book's arguments offer powerful new scholarship on dance in the popular screen.

killing for culture Simon and Schuster Producing for TV and Video is a must-read for anyone interested in a career in TV production. This comprehensive book explains the role of the TV producer in detail, including in-depth descriptions of a producer's day-to-day duties and tasks and a big picture overview of the production process in general and how the producer fits in. Complete with interviews and insights from production professionals in all areas of television, such as reality television and children's programming, *Producing for TV and Video* will provide you with an understanding of the TV production process and the role of the TV producer from beginning to end. The accompanying CD contains forms that you will inevitably need during your

production.

"...a very sweet dog story" -- Outside The story of a dog, his human, and the friendship that saved both of their lives. When Ben Moon moved from the Midwest to Oregon, he hadn't planned on getting a dog. But when he first met the soulful gaze of a rescue pup in a shelter, Ben instantly felt a connection, and his friendship with Denali was born. The two of them set out on the road together, on an adventure that would take them across the American west and through some of the best years of their lives. But when Ben was diagnosed with colorectal cancer at age 29, he faced a difficult battle with the disease, and Denali never once left his side until they were back out surfing and climbing crags. It was only a short time later that Denali was struck by the same disease, and Ben had the chance to return the favor. Denali is the story of this powerful friendship that shaped Ben and Denali's lives, showing the strength and love that we give and receive when we have our friends by our side.

International Perspectives on Knowledge

and Curriculum Bloomsbury Publishing

Skilful lighting involves a subtle blend of systematic mechanics and a sensitive visual imagination. It requires anticipation, perceptiveness, patience and know-how. But learning through practice alone can take a great deal of time. This book is a distillation of many years' experience, with advice and guidance that will bring successful results right from the start. Whether you are a student studying lighting techniques in the television, video and film media, or a professional lighting for the camera, this book will be an invaluable aid. Other members of the production team, including camera crews, designers and directors, will also

find the information here interesting and useful. The book concentrates primarily on the fundamental principles of lighting in studios, on location and display, as well as single-camera, small unit production, improvised and economy lighting, and working with limited facilities. Emphasis is also placed on the safety aspects of working with lighting equipment. Lighting for Television and Film reflects the author's considerable experience of lighting techniques in BBC studios, his teaching and consultancy work. Gerald Millerson's analytical writings spring from a lifetime's personal experience in the medium, and from his teaching and engineering background. During his career with the BBC, he was primarily associated with studio operations in the Television Service. His lecturing background included courses in TV production at a number of American universities. His other books for Focal Press are Television Production, TV Scenic Design, Video Production Handbook and, in the Media Manuals series, Effective TV Production, Lighting for Video and Video Camera Techniques. *Official Gazette of the United States Patent and Trademark Office* Penguin "This tale is a sturdy one that is made even more emphatic by Davies's terse writing style. The text is heightened in every way by Carlin's outstanding mixed-media artwork." — Booklist (starred review) On a mean street in a mean, broken city, a young girl tries to snatch an old woman's bag. But the frail old woman says the thief can't have it without giving something in return: the promise. It is the beginning of a journey that will change the girl's life — and a chance to change the world, for good. **Kenya National Assembly Official Record (Hansard)** Psychology Press This issue of Library Technology Reports

will help you recommend high-quality video resources for faculty and researchers.

Billboard Metuchen, N.J. : Scarecrow Press

Unlike images of sex, which were clandestine and screened only in private, images of death were made public from the onset of cinema. The father of the modern age, Thomas Edison, fed the appetite for this material with staged executions on film. Little over a century later the executions are real and the world is aghast at brutalities freely available online at the click of a button. Some of these films are created by lone individuals using shaky camera phones: Luka Magnotta, for instance, and the teenagers known as the Dnipropetrovsk maniacs. Others are shot on high definition equipment and professionally edited by organized groups, such as the militant extremists ISIS. KILLING FOR CULTURE explores these images of death and violence, and the human obsession with looking — and not looking — at them. Beginning with the mythology of the so-called ‘snuff’ film and its evolution through popular culture, this book traces death and the artifice of death in the ‘mondo’ documentaries that emerged in the 1960s, and later the faux snuff pornography that found an audience through Necrobabes and similar websites. However, it is when videos depicting the murders of Daniel Pearl and Nick Berg surfaced in the 2000s that an era of genuine atrocity commenced, one that has irrevocably changed the way in which we function as a society. Plastic-Free Oxford University Press
Based on the proceedings of the twelfth

biennial conference on life-span developmental psychology, most of the contributions in this volume deal with the mechanisms of everyday cognition. However, a broad spectrum of additional concerns is addressed within the domain of everyday cognition: its metatheoretical underpinnings, theory and theoretical issues, methods of investigation, empirical considerations, and social issues and applications. Addressing everyday cognition in infancy, childhood, adolescence, young and middle adulthood, and old age, this book is consistent with the chronological life-span theme of this series. The contributors collectively discuss some of the traditional concerns of life-span psychology: the dialectical nature of everyday cognition, individual differences, and contextual influences. Leading and concluding chapters provide overview, integration, and summary. In bringing together a wide array of age periods and points of view within the domain of everyday cognition, the editors hope that students and researchers in developmental psychology and cognitive science will find a useful cross-fertilization of ideas. A huge variety of theoretical perspectives is presented ranging from the position that everyday cognition and academic (laboratory) cognition are different manifestations of the same underlying processes to the position that the underlying processes are completely separate. Also of importance, a large assortment of research methods is illustrated including interviews, laboratory simulations, real-life observations and psychometric methods.
