—BookPage A little girl and her friend Bear learn the true meaning of selfless kindness in this sweet, stunningly illustrated debut picture book. Bear is sad. All the other animals think he’s mean because he’s so big. But his human friend, Coco, offers to help him. Coco shares her grandmother’s advice: “When life gets dark as winter’s night, share some kindness, bring some

light.” They decide to bake cookies to “share some kindness” and make lanterns to “bring some light.” But when the cookies and lanterns don’t work, they must look for another way to win over the other animals. And while they’re at it, Coco and Bear just might discover that kindness is a gift that only comes from the heart.

Paper Lanterns Tuttle Publishing

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in

time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.”

—Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been

no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the

Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries

to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise

cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Upcycling goes upscale in this beautiful, elegant, and global collection that showcases what today's designers are creating out of yesterday's materials. Upcycling is the process of transforming seemingly low value items into something new. Today's upcyclists are creating stunning furniture, lighting, and art objects that combine values of

superb craftsmanship and design with ideas of how "waste" can be both inspiring and informing. While the environmental and financial benefits of upcycling are readily acknowledged in *Upcyclist: Reclaimed and Remade Furniture, Lighting and Interiors*, the designers and makers profiled show how the practice can result in pieces that are as

aesthetically exciting as anything created using only raw materials. Based on the author's popular website, this book features hundreds of creations from an international collection of today's most exciting designers. It is organized by material, with chapters dedicated to wood, metal, glass and ceramics, textiles, plastic, paper, and mixed media.

Reclaimed tree branches and barn doors are transformed into exquisite pieces of furniture; bicycle chains into chandeliers; t-shirts into rugs; saris into upholstery. Filled with an enormous range of materials and objects, this unique book will inspire any designer or design-conscious consumer to incorporate upcycling into their creative practice or interior design projects.
