Language, Gender and Parenthood Online explores the digital interactions of parents on the UK-based internet discussion forum Mumsnet Talk, a space dominated by users sharing a common identification as women, parents and mothers. Using a qualitative approach grounded in feminist poststructuralist theory, Jai Mackenzie uncovers 'common-sense' assumptions about gender and parenthood, explores the construction of gender and parenthood in digital contexts and how discourses of gendered parenthood are negotiated, resisted and subverted. This is key

reading for students, scholars and researchers in the field of language and gender, as well as language and digital communication.

A Grammar of Piedmontese Academic Conferences and publishing limited

When archaeologist Howard Carter saw gold gleaming in a dark chamber he excavated in Egypt in 1922, he knew he had found the pharaoh Tutankhamun's tomb. People around the world eagerly read newspaper accounts of the discovery. Yet the story had a dark side. Numerous deaths connected to the find prompted rumors of a curse. Throughout the pages of this captivating tale, readers will play the roles of Egyptologist, historian, and detective as they examine the facts of the curious events surrounding the excavation of King Tut's tomb.

Whoppers Reaktion Books

This expanded and revised version of the best-selling *Universal Methods of Design* is a comprehensive reference that provides a thorough and critical presentation of 125 research methods, synthesis/analysis techniques, and research deliverables for human-centered design. The text and accompanying photos and graphics of this classic resource are delivered in a concise and accessible format perfect for designers, educators, and students. Information can be easily referenced and utilized by cross-disciplinary teams in nearly any design project. This new, expanded edition includes a comprehensive index for referencing. Earlier chapters have been updated to include new information on digital design and software for A/B testing, content analysis, and territory maps. The addition of 25 chapters brings fresh relevance to the text with new and innovative design methods, such as subtraction and position maps, that have emerged since the first edition. *Universal Methods of Design* distills each method down to its essence, in a format that helps design teams select and implement the most credible research methods suited to their design culture.

Pervasive Computing Technologies for Healthcare John Wiley & Sons

Visual artists, craftspeople, musicians, and performers have been supported by the development community for at least twenty years, yet there has been little grounded and critical research into the practices and politics of that support. This new Routledge book remedies that omission and brings together varied perspectives from artists, policy-makers, and researchers working in the Pacific, Africa, Latin America, and Europe to explore the

challenges and opportunities of supporting the arts in the development context. The book offers a series of grounded analyses which cover: strategies for the sustainability of arts enterprises; innovative evaluation methods; theoretical engagements with questions of art, agency, and social change; artists' entanglements with legal and structural frameworks; processes of cultural mapping; and the artist/donor interface. The creative economy is increasingly recognized as a driver of development and this book also investigates the contribution made by the arts to the processes of international development, and considers how those processes can best be supported by development agencies. *Contemporary Perspectives on Art and International Development* gives scholars of Development Studies, Social and Cultural Geography, Anthropology, Cultural Policy, Cultural Studies, and Global Studies a contextually and thematically diverse range of insights into this emerging research field.

[The Curse of King Tut's Tomb](#) IGI Global

In the year 2025, time travel has become the latest rage. Nathan and his family are looking forward to visiting ancient Alexandria, but something goes terribly wrong during the transfer back in time. After Nathan lands alone near the palace of Tutankhamun, he soon realizes that unless he can convince the captain of the guards that he is not a tomb robber, a painful death awaits him. Eventually Nathan is introduced to the young king and becomes a high-ranking member of Tuts court, where he learns about the life and politics of the ancient Egyptian monarch. Assigned to watch for anything that might harm the king, Nathan is devastated when he witnesses a horrifying accident that

endangers the life of the boy-king. Meanwhile, as his family tries to rescue Nathan and bring him back to the present, the threat of a major time paradox emerges. Nathan, accompanied by his sister, Lindsey, must return once more to the tomb of King Tuta dark world filled with coffins and the threat of curses and magic spells in a last-ditch effort to prevent the destruction of their timeline. But have they arrived in time?

Handbook of Sport Psychology Oxbow Books

This book helps readers understand how universities position themselves in the innovation landscape and the implications for national policies. It provides a scholarly discussion and best practice-based insights to help answer questions like: To what extent do funding and governance policies support activities within the knowledge triangle? How should policies for universities be designed in countries with different industrial and higher education structures? Are there ways to effectively link universities with regional enterprises and social actors? And finally, what are the new institutional models and best practices for overcoming obstacles to interaction, collaboration, and co-creation?

Engineering Synthetic Metabolons: From Metabolic Modelling to Rational Design of Biosynthetic Devices

Routledge

Deanship in the Global South: Bridging Troubled Waters is about the lived reality of deans, their leadership role in the performance of the Faculty and its alignment to the institutional objectives. It proffers a strategic approach to successful leadership development.

Quantitative analysis of neuroanatomy Springer Nature

This book comprises refereed papers from the 10th World Congress on Engineering Asset Management (WCEAM 2015), held in Tampere, Finland in September 2015. These proceedings include a compilation of state-of-the-art papers covering a comprehensive range of subjects equally relevant to business managers and engineering professionals alike. With a focus on various aspects of engineering asset management ranging from strategic level issues to detail-level machine health issues, these papers address both industry and public sector concerns and issues, as well as advanced academic research. Proceedings of the WCEAM 2015 is an excellent reference and resource for asset management practitioners, researchers and academics, as well as undergraduate and postgraduate students at tertiary institutions or in the industry.

Universal Methods of Design Expanded, and Revised

Gareth Stevens Publishing LLLP

For years Mr. Howard has come to the valley near my village where the great pharaohs, the kings of Egypt, are buried in underground tombs. And for months I've pleaded with Baba, my father, to let me work with Mr. Howard, as he searches for a certain king's tomb—King Tut's tomb. Young Hassan wants nothing more than to help with the search. But Hassan's father is concerned. Their family is descended from 'tomb robbers'. Despite being honest farmers now, they're not fully trusted. Hassan could get into serious trouble. But Hassan is determined. Soon, he is working long, hard days filling baskets with sand, and baring the brunt of others who are suspicious of him. Just when Hassan is most discouraged, he spots something glittering where he's been working. And no one else has seen it yet. What should

he do? The Tomb Robber and King Tut is an exciting imagining of the actual discovery of the boy king's tomb in the 1920s.

Gorgeously illustrated by Allen Garns, this book is for anyone intrigued by Egyptian history and the beginnings of King Tut's incredible fame.

Contemporary Perspectives on Art and International Development
BRILL

This book contains best selected research papers presented at ICTCS 2021: Sixth International Conference on Information and Communication Technology for Competitive Strategies. The conference will be held at Jaipur, Rajasthan, India, during December 17-18, 2021. The book covers state-of-the-art as well as emerging topics pertaining to ICT and effective strategies for its implementation for engineering and managerial applications. This book contains papers mainly focused on ICT for computation, algorithms and data analytics, and IT security. The book is presented in two volumes.

Proceedings of the 10th World Congress on Engineering Asset Management (WCEAM 2015) Frontiers Media SA

The true revolution in the age of digital neuroanatomy is the ability to extensively quantify anatomical structures and thus investigate structure-function relationships in great detail. Large-scale projects were recently launched with the aim of providing infrastructure for brain simulations. These projects will increase the need for a precise understanding of brain structure, e.g., through statistical analysis and models. From articles in this Research Topic, we identify three main themes that clearly illustrate how new quantitative approaches are helping advance our understanding of neural structure and function. First, new

approaches to reconstruct neurons and circuits from empirical data are aiding neuroanatomical mapping. Second, methods are introduced to improve understanding of the underlying principles of organization. Third, by combining existing knowledge from lower levels of organization, models can be used to make testable predictions about a higher-level organization where knowledge is absent or poor. This latter approach is useful for examining statistical properties of specific network connectivity when current experimental methods have not yet been able to fully reconstruct whole circuits of more than a few hundred neurons.

Social Media for Knowledge Management Applications in Modern Organizations Rockport Publishers

Mobile phones have become an integral part of society, as their convenience has helped democratize and revolutionize communication and the marketplace of ideas. Because of their ubiquity in higher education, undergraduate classrooms have begun to utilize smartphones and tablets as tools for learning. The Handbook of Research on Mobile Devices and Applications in Higher Education Settings explores and fosters new perspectives on the use of mobile applications in a classroom context. This timely publication will demonstrate the challenges that universities face when introducing new technologies to students and instructors, as well as the rewards of doing so in a thoughtful manner. This book is meant to present the latest research and become a source of inspiration for educators, administrators, researchers, app developers, and students of education and technology.

Software Defined Networks Springer

The papers collected in this volume are selected as a sample of the progress in Natural Language Processing (NLP) performed within the Italian NLP community and especially attested by the PARLI project. PARLI (Portale per l'Accesso alle Risorse in Lingua Italiana) is a project partially funded by the Ministero Italiano per l'Università e la Ricerca (PRIN 2008) from 2008 to 2012 for monitoring and fostering the harmonic growth and coordination of the activities of Italian NLP. It was proposed by various teams of researchers working in Italian universities and research institutions. According to the spirit of the PARLI project, most of the resources and tools created within the project and here described are freely distributed and they did not terminate their life at the end of the project itself, hoping they could be a key factor in future development of computational linguistics.

Intelligent Technologies and Applications Frontiers Media SA
Over a century after his discovery, this comprehensive biography of Tutankhamun explores a wealth of evidence, including archaeological and ancient textual sources, DNA analysis and CT scanning, bringing to life a pharaoh who has remained elusive apart from his grandiose tomb treasures. For the first time, this volume identifies the names of Tutankhamun's biological parents, tracing the footsteps of his short life that was marked by genetic defects and physical deterioration. Between his early days and his untimely death, Tutankhamun (previously Tutankhaten) appears as a child of his time; he was torn between the cult of the Aten and the restoration of the cult of Amun, a campaign in which he personally played a leading role. Equipped with a thorough education, gifted with a brilliant mind and living mostly in solitude, readers will follow in detail how Tutankhamun secured

the survival of the 18th Dynasty. This book traces Tutankhamun's involvement in processes which can still be felt in Egypt today. His complex personality is reconstructed based on archaeological evidence—some of which has never been discussed previously—and conclusions drawn from both scientific research and a deep understanding of the context in which he lived. By also considering the lives of those who were close to the teenage king, this book delivers a comprehensive source-based biography of an ancient Egyptian pharaoh. Complete with intensive references to international scholarship, visual sources and maps, and excluding the tomb treasures created after his physical death, this book is a fresh and original approach to understanding the life—not afterlife—of the most popular pharaoh of modern times. *Tutankhamun: A Biography* is suitable for students, scholars and non-specialist readers interested in the life of Tutankhamun, as well as those working on ancient Egyptian history and religion more broadly, particularly that of New Kingdom Egypt.

Artificial Intelligence for a More Sustainable Oil and Gas Industry and the Energy Transition OECD Publishing

History of full of liars. Not just little-white-telling liars, but big-honkin', whopper-telling liars—people who can convince us that even the most improbable, outrageous, nonsensical stories are true. And the worst part is that we'll believe it. *Whoppers* tells the story of history's greatest liars and the lies they told, providing a mix of narrative profiles of super-famous liars, lies, and/or hoaxes, as well as more obscure episodes. Famous liars include people you might have learned about in school, like P. T. Barnum, who basically made a living lying to people for money; liars you

might never have heard of before, like Victor Lustig, who managed to "sell" the Eiffel Tower twice in the 1920s; and hoaxes like the Loch Ness Monster Photo Hoax. The book will also include illustrations, sidebars, and infographics.

Tutankhamun and Carter IGI Global

Cerea, madamin, andoma bin? Less than a century ago, this was one of the most frequent greetings heard in Piedmont, a region in northwest Italy. Today, however, Piedmontese is severely endangered. This volume presents the first widely accessible and comprehensive grammatical description of the contemporary koine, covering its phonetics, phonology, morphology, syntax, pragmatics and typology, and drawing examples from both oral and written sources. Data on the history of the language and the local dialects and notes on revitalization efforts are also included.

The Tomb Robber and King Tut Taylor & Francis

These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss

conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 Phd Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Cov-entry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org).

Information and Communication Technology for Competitive Strategies (ICTCS 2021) Penguin

In most countries, only very limited time resources are available for statistics education within mathematics education. Thus, statistics education research needs to develop teaching-learning arrangements that are compact and applicable to classrooms. Christian Büscher designs and investigates a compact teaching-learning arrangement which aims at mathematical and reflective knowledge about statistics. Central results include the specification of the learning content of statistical measures, an empirical reconstruction of students' learning processes towards

statistical measures, and the identification of students' situated reflections about mathematics within their learning processes. *ECEL2015-14th European Conference on e-Learning*, Routledge

Estonian agriculture has undergone significant growth and structural change since the 1990s in a policy and regulatory environment that has been mostly supportive of investment. The implementation of the Common Agricultural Policy has contributed to the modernisation of the country's agriculture.

Tutankhamun Springer Nature

This edited volume presents chapters on the dynamics of global climate change and global warming in the Middle East. In this region, it should be noted that even slightly warmer weather can

result in an increased demand of energy along with its lower supply, as well as lower labor productivity. This text focuses on modeling, simulation, system dynamics, and agent-based modeling in dealing with these issues. The latest decision making tools, techniques, and innovative solutions used to overcome these challenges are presented. Many distinguished researchers contribute their work herein. The audience for this volume includes policy makers, researchers, and students unified by the common goal of making better decisions in the sustainable production and consumption of energy. The practical orientation of the chapters within each part is intended to suit the practitioners: managers and decision makers in the energy sector of the Middle East region.
