 The complete history of the tractor that changed farming forever. Award-winning author and photographer Randy Leffingwell and renowned tractor historian Robert N. Pripps tell the story of the Farmall tractor, one of the most significant and popular farm tractors ever made. International Harvester's Farmall ushered in innovations in engineering, manufacturing, and design that changed the world of tractors. Along the way, the Farmall became an icon in agriculture. In *Farmall: The Red Tractor That Revolutionized Farming*, the history of the Farmall is traced from the first Farmall, developed in the early 1920s, through its evolution to the new Farmall models. The book combines a broad cultural history of

Farmall with photos of restored machines, as well as color and black and white archival photography. Trace all of the tractor models, variations, improvements, engine and hydraulic advances, and accompanying implements through every Farmall generation. This new, up-to-date history of Farmall includes the latest models and implements, bringing you all of the information you want about these unique tractors.

This account of the Khobar Towers bombing tells the story of the horrific attack and the magnificent response of airmen doing their duty under nearly impossible circumstances. None of them view their actions as heroic, yet the reader will marvel at their calm professionalism. All of them say it was just their job, but the reader will wonder how they could be so well trained to act almost instinctively to do the right thing at the right time. None of them would see their actions as selfless, yet countless numbers refused medical

attention until the more seriously injured got treatment. Throughout this book, the themes of duty, commitment, and devotion to comrades resoundingly underscore the notion that America's brightest, bravest, and best wear her uniforms in service to the nation. This book is more than heroic actions, though, for there is also controversy. Were commanders responsible for not adequately protecting their people? What should one make of the several conflicting investigations following the attack? Dr. Jamieson has not shied away from these difficult questions, and others, but has discussed them and other controversial judgments in a straightforward and dispassionate way that will bring them into focus for everyone. It is clear from this book that there is a larger issue than just the response to the bombing. It is the issue of the example set by America's airmen. Future airmen who read this book will be stronger and will stand on the shoulders of those who suffered and those who made the ultimate sacrifice.
