InfoWorld Cambridge University Press

American MORE! is a four-level course from a highly respected author team that's bursting with features for lower secondary students. The Teacher's Resource Pack contains unit tests, review tests, and term tests, as well as entry-level tests and end-of-year tests. There are extra grammar practice and communication activities for each unit of the course. The free Testbuilder CD-ROM/Audio CD allows teachers to create their own tests. It previews each exercise before inclusion, and can create 'A' and 'B' versions of each test so that students sitting next to each other don't share answers. Exam skills (KET-, PET- and Trinity-style) questions are also available.

Is something bugging you? Bestselling award-winner David Shannon shows the funny side of waging war against -- oh no! -- head lice. This book is guaranteed to make you laugh -- and itch! From the opening picture of a happy, oversized louse appearing with his suitcases, you know these bugs are determined to stay, and Mom is about to go nuts! Nobody talks about them, but they are everywhere. (Some estimate 20 million children a year host them.) Oh the shame and humiliation of having bugs in your hair! But if you go to school, or have play dates, chances are good you might meet them someday. Maybe you already have! Lucky for you, the unwelcome bugs in this story are so funny you will be laughing aloud -- even when Mom attacks them with battle-tested anti-lice weapons. Shannon peppers his hilarious scenes with fun, "nitpicking" facts about these "lousy" critters and pokes fun at

common denial: "It's probably ash from that volcano in Pogo Pogo." Soon the party's over -- Bye bye, Little Nasties! Once again Shannon has created a fresh, highly entertaining read-aloud classic that begs to be read again and again.

Bugs in My Hair!

In the last few years there has been an explosion of philosophical interest in perception; after decades of neglect, it is now one of the most fertile areas for new work. Perceptual Experience presents new work by fifteen of the world's leading philosophers. All papers are written specially for this volume, and they cover a broad range of topics to do with sensation and representation, consciousness and awareness, and the connections between perception and knowledge and between perception and action. This will be the book on the philosophy of perception, a fascinating resource for philosophers and psychologists.
