A fluent and accurate new translation of the dialogue that, of all Plato's works, has seemed to speak most directly to the interests of contemporary and analytical philosophers. White's extensive introduction explores the dialogue's central themes, its connection with related discussions in other dialogues, and its implication for the interpretation of Plato's metaphysics.

Faust, the First Part Palala Press

The Allied agreement after the Second World War did not only partition Germany, it divided the nation along the fault-lines of a new bipolar world order. This inner border made Germany a unique place to experience the Cold War, and the "German question" in this post-1945 variant remained inextricably entwined with the vicissitudes of the Cold War until its end. This volume explores how social and cultural practices in both German states between 1949 and 1989 were shaped by the existence of this inner border, putting them on opposing sides of the ideological divide between the Western and Eastern blocs, as well as stabilizing relations between them. This volume's interdisciplinary approach addresses important intersections between history, politics, and culture, offering an important new appraisal of the German experiences of the Cold War.

It was not until the seventies that the Berlin Wall started looking like the white concrete swath that has been burned into collective memory. Before that, it consisted of brick walls, dog patrol

areas, and barbed wire fences. Around 1965/66, soldiers from the East German border patrol took pictures of the inner-city wall over a length of about forty kilometers, producing more than one thousand views of West Berlin.

Photographer Arwed Messmer (*1964 in Schopfheim) digitally reconstructed these images to create about three hundred panoramas, and author Annett Gröschner (*1964 in Magdeburg) supplied them with captions.

Supplementing these captioned photos are portraits of soldiers, snapshots, and reports of escape attempts, which together recall everyday occurrences along the border. Contributions on the architecture and metamorphosis of the Wall over time, its literary treatment, as well as on the importance of the project for the history of photography throw light on the fascinating worlds of associations of a structure that symbolizes the perversions of the twentieth century like no other. The project is supported by the Federal Archives, the German Federal Cultural Foundation, and the Federal Foundation for the Reappraisal of the SED Dictatorship.

Exhibition schedule: Unter den Linden 40, Berlin, August 5-October 3, 2011 The book *Aus Anderer Sicht/The Other View* is bound in a special "open softcover" technique which allows the opened book to lie flat. To this purpose its end leaf has only been partially glued to the cover. This is no binding mistake!

What does Jesus have to do with ethics?
There are two brief answers given by
believers: "everything" and "not much."
While evangelical or fundamentalist
Christians would find authoritative
guidance in the words and commands of
Jesus as recorded in the New Testament,
many mainstream Christian ethicists
would say that Jesus is too concrete or
narrowly particular to have any direct
import for ethics. In this book, Williams
Spohn takes a middle way, showing how
Jesus is the "concrete universal" of
Christian ethics. By forming a bridge
from the lives of contemporary
Christians to the words and deeds of
Jesus, Jesus' story as a whole exemplifies
moral perception, motivation and
Christian identity. In addition, Spohn
shows how the practices of Christian
spirituality--specifically prayer, service,
and community--train the imagination
and reorient emotions to produce a
character and a way of life consonant
with Christian New Testament moral
teaching.

This is the first collection of essays to
take a pan-European perspective in the
study of hip-hop. How has it traveled to
Europe? How has it developed in the
various cultural contexts? How does it
reference the American cultures of
origin? The book's 21 authors and artists
provide a comprehensive overview of
hip-hop cultures in Europe, from the
fringes to the centers. They address hip-
hop in a variety of contexts, such as
class, ethnicity, gender, history,
pedagogy, performance, and (post-)
communism. (Series: Transnational and

Robert C. Holub critically investigates
the histories of reception theory,
poststructuralism, and deconstruction in
postwar Germany and the United States.
He looks at how imported theories
assume a place in the political discourse
of a country, and how indigenous
intellectual traditions and prejudices
affect, modify, or even distort foreign
theories. Holub addresses many timely
questions: Why did reception theory, so
prominent in Germany in the 1960s and
1970s, fail to have an impact on
American academics until the 1980s?
Why did poststructuralism, and specifically
the writings of Michel Foucault, fail to
find a home in German academia while
becoming an important theoretical voice
in the United States? How did
deconstruction, originally considered by
American scholars as merely a
sophisticated tool for analysis, get taken
up by leftists who argued for an affinity
between the critique of language and
the critique of capitalism? And finally,
how have American intellectuals
responded to revelations of fascism in
the pasts of Paul de Man and Martin
Heidegger? *Crossing Borders* effectively
demonstrates the extent to which
theoretical work needs to be understood
in cultural, intellectual, and institutional
contexts. Holub argues that the praxis of
theories is determined not only by their
content and style, but also by the
environment in which they must
function. The success of a transplanted
theory, he contends, is due less to its
inherent merits than to the hospitability
of the environment on to which it is
grafted. -- Publisher's website.

Appearing for the first time in a complete English translation, *The Closed Commercial State* represents the most sustained attempt of J. G. Fichte, the famed author of *The Doctrine of Science*, to apply idealistic philosophy to political economy. In the accompanying interpretive essay, Anthony Curtis Adler challenges the conventional scholarly view of *The Closed Commercial State* as a curious footnote to Fichte's thought. *The Closed Commercial State*, which Fichte himself regarded as his "best, most thought-through work," not only attests to a life-long interest in economics, but is of critical importance to his entire philosophical project.

Carefully unpacking the philosophical nuances of Fichte's argument and its complex relationship to other texts in his oeuvre, Adler argues that *The Closed Commercial State* presents an understanding of the nature of history, and the relation of history to politics, that differs significantly from the teleological notions of history advanced by Schelling and later Hegel. This critical scholarly edition includes a German-English glossary, annotations, and page references to both major German editions.

Identität ist in jüngster Zeit mehr und mehr von einem individual- und sozialpsychologischen Konzept zu einem politischen Kampfbegriff geworden, mit dem um Verhältnisbestimmungen von Diversität und Integration in der Gesellschaft gerungen wird. Die damit verbundenen Probleme und Kontroversen haben inzwischen auch die Fachdidaktiken und die Bildungspraxis erreicht. Das Heft fragt nach der grundsätzlichen Relevanz dieses Themas für die gesellschaftswissenschaftlichen Fächer, insbesondere mit Blick auf demokratische Identität und auf Antisemitismus, und stellt identitätsbezogene Forschungen zu Schulbüchern sowie zu einem Jugendbildungsprojekt vor.

This is the first comprehensive, multi-author survey of German history that features cutting-edge syntheses of major topics by an international team of leading scholars. Emphasizing demographic, economic, and political history, this Handbook places German history in a denser transnational context than any other general history of Germany. It underscores the centrality of

war to the unfolding of German history, and shows how it dramatically affected the development of German nationalism and the structure of German politics. It also reaches out to scholars and students beyond the field of history with detailed and cutting-edge chapters on religious history and on literary history, as well as to contemporary observers, with reflections on Germany and the European Union, and on 'multi-cultural Germany'. Covering the period from around 1760 to the present, this Handbook represents a remarkable achievement of synthesis based on current scholarship. It constitutes the starting point for anyone trying to understand the complexities of German history as well as the state of scholarly reflection on Germany's dramatic, often destructive, integration into the community of modern nations. As it brings this story to the present, it also places the current post-unification Federal Republic of Germany into a multifaceted historical context. It will be an indispensable resource for scholars, students, and anyone interested in modern Germany.

Diversity - social, cultural, linguistic and ethnic - poses a challenge to all educational systems. Some authorities, schools and teachers look upon it as a problem, an obstacle to the achievement of national educational goals, while for others it offers new opportunities. Successive PISA reports have laid bare the relative lack of success in addressing the needs of diverse school populations and helping children develop the competences they need to succeed in society. The book is divided into three parts that deal in turn with policy and its implications, pedagogical practice, and

responses to the challenge of diversity that go beyond the language of schooling. This volume features the latest research from eight different countries, and will appeal to anyone involved in the educational integration of immigrant children and adolescents.

A talking body part, a character that is simultaneously alive and dead, a shape-changing setting, or time travel: although impossible in the real world, such narrative elements do appear in the storyworlds of novels, short stories, and plays. Impossibilities of narrator, character, time, and space are not only common in today's world of postmodernist literature but can also be found throughout the history of literature. Examples include the beast fable, the heroic epic, the romance, the eighteenth-century circulation novel, the Gothic novel, the ghost play, the fantasy narrative, and the science-fiction novel, among others. *Unnatural Narrative* looks at the startling and persistent presence of the impossible or "the unnatural" throughout British and American literary history. Layering the lenses of cognitive narratology, frame theory, and possible-worlds theory, *Unnatural Narrative* offers a rigorous and engaging new characterization of the unnatural and what it yields for individual readers as well as literary culture. Jan Alber demonstrates compelling interpretations of the unnatural in literature and shows the ways in which such unnatural phenomena become conventional in readers' minds, altogether expanding our sense of the imaginable and informing new structures and genres of narrative engagement.

How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

By the time ninth grade begins, Ishmael Leseur knows it won't be long before Barry Bagsley, the class bully, says, "Ishmael? What kind of wussy-crap name is that?" Ishmael's perfected the art of making himself virtually invisible. But all that changes when James Scobie joins the class. Unlike Ishmael, James has no sense of fear - he claims it was removed during an operation. Now nothing will stop James and Ishmael from taking on bullies, bugs and Moby Dick, in the toughest, weirdest, most embarrassingly awful - and the best - year of their lives.

Semyon Ludvigovich Frank (1877-1950) wrote major works on epistemology, ontology, philosophy of religion, and social philosophy. As a youthful Marxist, he was arrested and banned from major

Russian cities for his radical activities. Becoming dissatisfied with Marxism, he soon turned to idealism and then to religious philosophy. Professor of Philosophy at Moscow University until 1922, when he was expelled to the West, Frank worked in exile until his death in London in 1950. *The Spiritual Foundations of Society* is Frank's attempt to examine society as a type of spiritual being, to develop an ontology of society. Two ideas are central to his vision of future social thought. The first of these, *sobornost'* (from the Russian *sobirat'*: to gather), is the living, inner, organic unity of all human societies. Its primary form is the family unit. Opposed to *sobornost'* is *obshchestvinnost'* (*obshchyi*: general or common), the mechanical aspect of society in which the separate parts act to mutually limit and constrain one another. The second idea is the principle of service as the most general expression of the ontological essence of man and therefore the highest normative principle of social life. According to Frank, all human rights are grounded in one inalienable right -- the right to fulfill obligations, the opportunity to serve. Thus, Frank reconciles the principles of solidarity and individual freedom through common subordination to the principle of service. Though writing in the late twenties, Frank addresses fundamental concepts of the ground of social life applicable to all periods of history. His introduction of concepts from the Russian tradition enables us to see problems in a new light, and his approach -- focused on concepts of community and service -- challenges the now dominant materialistic and naturalistic theories of the nature of social life.

 Wie hängen sprachliche und mathematische Entwicklung zusammen? Dieser Frage wird derzeit mit großem Interesse aus unterschiedlichen Perspektiven nachgegangen. Dieser Sammelband vereint Erkenntnisse aus Psychologie, Neurowissenschaften, Mathematikdidaktik, (Psycho-)Linguistik und Mehrsprachigkeitsforschung. Der interdisziplinäre Ansatz bietet einen umfassenden Blick auf den aktuellen Forschungsstand, dargestellt von national und international renommierten Forschenden. Das Buch gliedert sich in drei Teile. Der erste Teil „Modelle und Theorien“ fasst theoretische Überlegungen zusammen und stellt Strukturen für Forschung und Praxis bereit. Dieser Teil dient dazu, den Grundstein für die anderen Teile sowie für zukünftige Forschung zu legen. Der zweite Teil „Kindergartenalter“ sowie der dritte Teil „Grundschulalter“ decken empirische Befunde über die Korrelation zwischen Sprache und mathematischem Lernen in der jeweiligen Altersgruppe ab. Ein besonderer Fokus liegt hierbei auf dem Aspekt der Mehrsprachigkeit. Damit bietet dieser Sammelband eine große Bandbreite fachspezifischen Wissens für Bildungswissenschaftler*innen, Lehramtsstudierende, Psycholog*innen und Forschende zur Mehrsprachigkeit.

 Are children fundamentally different kinds of thinkers than adults? Or are the cognitive differences between young children and adults merely a matter of accumulation of knowledge? In this book, Susan Carey develops an alternative to these two ways of thinking about childhood cognition, putting forth the idea of conceptual change and its relation to the development of

knowledge systems. Conceptual Change in Childhood is a case study of children's acquisition of biological knowledge between ages 4-10. Drawing on evidence from a variety of sources, Carey analyzes the ways that knowledge is restructured during this development,

comparing them to the ways that knowledge is restructured by an adult learner, and to the ways that conceptual frameworks have shifted in the history of science. Susan Carey is Professor of Psychology at MIT.
