Frutto di un'esperienza ventennale di proposta del Vangelo come catechesi narrativa, questo lavoro è guidato da due criteri interpretativi. Il primo è che i Vangeli, più che scritti per esegeti, sono ricordi raccontati per celebrare la propria fede e proporla ad altri. Il secondo è che dicono con sufficiente chiarezza ciò che vogliono comunicare. È un commento di tipo nuovo, secondo il metodo antico della lectio divina. Si tratta di una lettura piana e piena, che nella Parola cerca Colui che parla, per entrare in dialogo con lui, e così conoscerlo, amarlo e seguirlo sempre di più.

*La mente di San Paolo* Walter de Gruyter

For most mathematicians and many mathematical physicists the name Erich Kähler is strongly tied to important geometric notions such as Kähler metrics, Kähler manifolds and Kähler groups. They all go back to a paper of 14 pages written in 1932. This, however, is just a small part of Kähler's many outstanding achievements which cover an unusually wide area: From celestial mechanics he got into complex function theory, differential equations, analytic and complex geometry with differential forms, and then into his main topic, i.e. arithmetic geometry where he constructed a system of notions which is a precursor

and, in large parts, equivalent to the now used system of Grothendieck and Dieudonné. His principal interest was in finding the unity in the variety of mathematical themes and establishing thus mathematics as a universal language. In this volume Kähler's mathematical papers are collected following a "Tribute to Herrn Erich Kähler" by S. S. Chern, an overview of Kähler's life data by A. Bohm and R. Berndt, and a Survey of his Mathematical Work by the editors. There are also comments and reports on the developments of the main topics of Kähler's work, starting by W. Neumann's paper on the topology of hypersurface singularities, J.-P. Bourguignon's report on Kähler geometry and, among others by Berndt, Bost, Deitmar, Ekeland, Kunz and Krieg, up to A. Nicolai's essay "Supersymmetry, Kähler geometry and Beyond". As Kähler's interest went beyond the realm of mathematics and mathematical physics, any picture of his work would be incomplete without touching his work reaching into other regions. So a short appendix reproduces three of his articles concerning his vision of mathematics as a universal Theme together with an essay by K. Maurin giving an "Approach to the philosophy of Erich Kähler".

**Discorsi di monsignore Pio Alberto Del Corona dell'Ordine de' predicatori Adamo, il secondo Adamo, il nuovo Adamo** Studies in the New Testament In this first detailed study of seventeenth-century sepulchral—sacred operas written for court performance on Holy Thursday and Good Friday—Robert L. Kendrick delves into the political and artistic world of Habsburg Vienna, in which music and ritual combined on the stage to produce a

thoroughly original art form based on devotion to Christ's Tomb. Through the use of allegorical characters, the musical dramas ranged from the devotionally intense, to the theologically complex, to the ugly anti-Jewish, but played a unique role in making Passion piety relevant to wider cultural concerns. Fruits of the Cross suggests that understanding the sepulchral has implications for the theatricalization of devotion, the power of allegory, the role of queenship in court ideology, the interplay between visuality and music, and not least the intellectual centrality of music theater to court self-understanding.

The Oratorio in the classical Era is the third volume of Howard Smither's monumental History of the Oratorio, continuing his synthesis and critical appraisal of the oratorio. His comprehensive study surpasses in scope and treatment all previous works on the subject. A fourth and final volume, on the oratorio in the nineteenth and twentieth centuries, is forthcoming. In this volume Smither discusses the Italian oratorio from the 1720s to the early nineteenth century and oratorios from other parts of Europe from the 1750s to the nineteenth century. Drawing on works that represent various types, languages, and geographical areas, Smither treats the general characteristics of oratorio libretto and music and analyzes twenty-two oratorios from Italy, England, Germany, France, and Russia. He synthesizes the results of specialized studies and contributes new material based on firsthand study of eighteenth-century music manuscripts and printed librettos. Emphasizing the large number of social contexts within which oratorios were heard, Smither discussed examples in Italy such as the Congregation of the Oratory, lay confraternities, and educational institutions. He examines oratorio performances in German courts, London theaters and English provincial festivals, and the Parisian Concert spirituel. Though the volume concentrates primarily on eighteenth-century oratorio from the early to the late Classical styles, Smither includes such transitional works as the

oratorios of Jean-François Le Sueur in Paris and Stepan Anikievich Degtiarev in Moscow. A History of the Oratorio is the first full-length history of the genre since Arnold Schering's 1911 study. In addition to synthesizing current thought about the oratorio, this volume contributes new information on relationships between oratorio librettos and contemporary literary and religious thought, and on the musical differences among oratorios from different geographical-cultural regions.
