When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? World Development Report 2017: Governance and the Law addresses these fundamental questions, which are at the heart of</p>	<p>development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions</p>

take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development

outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective

policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen

engagement, as well as by international actors supporting rules that strengthen coalitions for reform. Project to Product Packt Publishing Ltd Originally published in 1995, this monograph examines a developmenta l approach to urban transport planning, with reference to Indonesia. It provides a profile of the country, outlining Indonesia's geography and population,

historical and political background, economic profile and constraints on development. Recent trends in Indonesian development are outlined. Indonesian urban transport demand and supply are analysed, and policy and planning frameworks for urban transport set out, including national policy and financial and institutional issues. Factors affecting urban transport are considered

such as settlement characteristics and matching of transport systems with settlement hierarchy. The applicability of a developmenta l approach to urban transport planning for Indonesia is analysed with reference to experience in industrialized nations and the Third World. A Developmenta l Approach to Urban Transport Planning Asian Development Bank As tech giants

and startups disrupt every market, those who master large-scale software delivery will define the economic landscape of the 21st century, just as the masters of mass production defined the landscape in the 20th. Unfortunately, business and technology leaders are woefully ill-equipped to solve the problems posed by digital transformation . At the current rate of

disruption, half of S&P 500 companies will be replaced in the next ten years. A new approach is needed. In *Project to Product, Value Stream Network* pioneer and technology business leader Dr. Mik Kersten introduces the Flow Framework—a new way of seeing, measuring, and managing software delivery. The Flow Framework will enable your company's

evolution from project-oriented dinosaur to product-centric innovator that thrives in the Age of Software. If you're driving your organization's transformation at any level, this is the book for you. *Report of a Planning Workshop on Irrigation Water Management* Springer Nature This book explores the history, structure and current operations of the World

Bank, which despite being the largest development organisation and the largest development research body in the world with tremendous direct and indirect influence on developing economies, has rarely received the critical attention its importance merits. The book's unique contribution is twofold: it provides an original analysis of the interaction between economic

theory, political practice and the Bank's development praxis as well as two detailed, grounded studies of the Bank's lending practices. The book starts with a detailed examination of the development theory and practice of the World Bank from its Keynesian origins to the current shift through the Washington Consensus to the so-called post-Washington Consensus. The second

part is a detailed analysis of the Bank's lending practices in two countries, Vietnam and Indonesia. The case studies extensively utilise World Bank sources —analysing the Project Appraisal Documents for some 113 loans. They also draw on the secondary literature and on interviews with World Bank staff, government officials, academics and NGOs in both countries. The case studies enable the

development of empirically-based conclusions regarding the impact of Bank policies on the economic and social development of two important Southeast Asian nations making possible an assessment of the extent to which the rhetoric of the post-Washington Consensus has been incorporated into the Bank's lending practices. This book will be of interest to both

advanced undergraduate and graduate students as well as specialist audiences in the fields of international political economy, development, international organizations and Southeast Asian Studies. *Real-World Software Development* IWMI In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most

comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of

more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and

the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex Database has become a mainstay of global efforts to promote

financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire,

the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

The book deals with the present state and problems of integrated pest management (IPM) as relating to stakeholder acceptance of IPM and how IPM can become a sustainable practice. The book covers the implementation of

integrated pest management in USA, Canada, Denmark, Germany, Italy, Sweden, Netherlands, China, India, Indonesia, Australia, Africa, and its impact in reducing pesticide use in agriculture. The book also deals with the impact of transgenic crops on pesticide use. The Report: Emerging Indonesia 2007 World Bank Publications "This book focuses on human,

The 2017

DEfR tracks recent development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where ADB's performance needs to be strengthened. **Report** IGI Global Explore the latest Java-based software development techniques and methodologies through the project-based approach in this practical guide. Unlike books that use

abstract examples and lots of theory, Real-World Software Development shows you how to develop several relevant projects while learning best practices along the way. With this engaging approach, junior developers capable of writing basic Java code will learn about state-of-the-art software development practices for building modern, robust and maintainable

Java software. You'll work with many different software development topics that are often excluded from software development how-to references. It's no wonder that project managers spend so much time focusing their attention on risk identification. Important projects tend to be time constrained, pose huge technical challenges, and suffer from a lack of adequate resources. Identifying and Managing Project Risk, now updated and consistent with the very latest Project Management Body of Knowledge

(PMBOK)[®] Guide, takes readers through every phase of a project, showing them how to consider the possible risks involved at every point in the process. Drawing on real-world situations and hundreds of examples, the book outlines proven methods, demonstrating key ideas for project risk planning and showing how to use high-level risk assessment tools. Analyzing aspects such

as available resources, project scope, and scheduling, this new edition also explores the growing area of Enterprise Risk Management. Comprehensive and completely up-to-date, this book helps readers determine risk factors thoroughly and decisively...before a project gets derailed.  In 2018 the Indonesian economy recorded a growth rate of 5.2%, the highest in five years. This was in spite of a slump in the rupiah and a trade imbalance, and took place against a backdrop of rising US interest rates and deteriorating trade relations between the

world's two biggest economies. The country's emphasis on industrialisation and infrastructure development is laying the foundations for continued economic growth. Moreover, the archipelago's growing middle class population, geographical position and human capital development agenda, alongside progress in free-trade agreements, make it a strong contender on the global

economic stage. The country holds considerable potential for developing entrepreneurial and creative prowess, already being home to four unicorn startups. Investors have continued to look beyond traditional destinations, with emerging cities like Surabaya and Palembang showing strong possibilities for economic growth. Although the outcome of the April 2019 national

election will determine the course of further infrastructure development and tax reforms, the future looks promising, with predictions of continued growth accompanied by stable inflation.

IWMI On the cusp of 2014 national elections and the 2015 integration of the ASEAN Economic Community, Indonesia is poised to continue its rapid economic expansion. While the country's natural

resources are still plentiful, by channelling foreign direct investment into the right areas, the government is ensuring that true potential, in terms of value and manufacturing , is achieved. By inviting targeted investment and adapting existing regulatory frameworks, the government has taken significant steps to facilitate foreign investment and the development of value-

added industries. Indonesia is a country renowned for its abundance of natural resources, which include oil, gas, coal, nickel, tin, copper, gold and silver. While slightly down on the previous year, the country's total oil production for 2012 stood at 861,000 barrels per day, accounting for approximately 1.2% of the world's oil production. Indonesia remains the

world's largest exporter of thermal coal, exporting a total of 304m tonnes in 2012 to countries such as Japan, South Korea, China and India. The country continues to be the dominant nation in South-east Asia politically and economically, and its participation within ASEAN in particular will likely determine the shape of regional integration,

with the introduction of the ASEAN Economic Community (AEC) in 2015 looming as the bloc's next major milestone. **Indonesia, Staff Report for the ... Article IV Consultation and ...
