Michael Cronin looks at how translation has played a crucial role in shaping debates about identity, language and cultural survival

in the past and in the present. He explores how everything from the impact of migration on the curricula for national literature courses, to the way in which nations wage war in the modern era is bound up with urgent questions of translation and identity. Examining translation practices and experiences across continents to show how translation is an integral part of how cultures are evolving, the volume presents new perspectives on how translation can be a powerful tool in enhancing difference and promoting intercultural dialogue. Drawing on a wide range of materials from official government reports to Shakespearean drama and Hollywood films, Cronin demonstrates how translation is central to any proper understanding of how cultural identity

has emerged in human history, and suggests an innovative and positive vision of how translation can be used to deal with one of the most salient issues in an increasingly borderless world.

The creation of new lexical units and patterns has been studied in different research frameworks, focusing on either system-internal or system-external aspects, from which no comprehensive view has emerged. The volume aims to fill this gap by studying dynamic processes in the lexicon – understood in a wide sense as not being necessarily limited to the word level – by bringing together approaches directed to morphological productivity as well as approaches analyzing general types of lexical innovation and the role of discourse-related factors. The papers deal with ongoing changes as well as with historical processes of change in different languages and reflect on patterns and specific subtypes of lexical innovation as well as on their external conditions and the speakers' motivations for innovating. Moreover, the diffusion and conventionalization of innovations will be addressed. In this way, the volume contributes to understanding the complex interplay of structural, cognitive and functional factors in the lexicon as a highly dynamic domain.

This book is open access under a CC BY-NC 2.5 license. On April 22, 1915, the German military released 150 tons of chlorine gas at Ypres, Belgium. Carried by a long-awaited wind, the chlorine cloud passed within a few minutes through the British and French

trenches, leaving behind at least 1,000 dead and 4,000 injured. This chemical attack, which amounted to the first use of a weapon of mass destruction, marks a turning point in world history. The preparation as well as the execution of the gas attack was orchestrated by Fritz Haber, the director of the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry in Berlin-Dahlem. During World War I, Haber transformed his research institute into a center for the development of chemical weapons (and of the means of protection against them). Bretislav Friedrich and Martin Wolf (Fritz Haber Institute of the Max Planck Society, the successor institution of Haber's institute) together with Dieter Hoffmann, Jürgen Renn, and Florian Schmaltz (Max Planck Institute for the History of Science) organized an international symposium to commemorate the centenary of the infamous chemical attack. The symposium examined crucial facets of chemical warfare from the first research on and deployment of chemical weapons in WWI to the development and use of chemical warfare during the century hence. The focus was on scientific, ethical, legal, and political issues of chemical weapons research and deployment — including the issue of dual use — as well as the ongoing effort to control the possession of chemical weapons and to ultimately achieve their elimination. The volume consists of papers presented at the symposium and supplemented by additional articles that together cover key aspects of chemical warfare from 22 April 1915 until the summer of 2015.

Recent sociopolitical events have profoundly changed the status and functions of German and influenced its usage. In this study (published by Cambridge in 1984) Michael Clyne revises and expands his original analysis of the German language in *Language and Society in the German-speaking Countries* in the light of such changes as the end of the Cold War, German unification, the redrawing of the map of Europe, increasing European integration, and the changing self-images of Austria, Switzerland and Luxembourg. His discussion includes the differences in the form, function and status of the various national varieties of German; the relation between standard and non-standard varieties; gender, generational and political variation; Anglo-American influence on German; and the convergence of east and west. The result is a wide-ranging exploration of language and society in the German-speaking countries, all of which have problems or dilemmas concerning nationhood or ethnicity which are language-related and/or language-marked.

Musica Poetica provides an unprecedented examination of the development of Baroque musical thought. The initial chapters,

which serve as an introduction to the concept and teachings of musical-rhetorical figures, explore Martin Luther's theology of music, the development of the Baroque concept of *musica poetica*, the idea of the affections in German Baroque music, and that music's use of the principles and devices of rhetoric. Dietrich Bartel then turns to more detailed considerations of the musical-rhetorical figures that were developed in Baroque treatises and publications. After brief biographical sketches of the major theorists, Bartel examines those theorists' interpretation and classification of the figures. The book concludes with a detailed presentation of the musical-rhetorical figures, in which each theorist's definitions are presented in the original language and in parallel English translations. Bartel's clear, detailed analysis of German Baroque musical-rhetorical figures, combined with his careful translations of interpretations of those figures from a wide range of sources, make this book an indispensable introduction and resource for all students of Baroque music.
